SECTION III – RISK FACTORS

An investment in Equity Shares involves a high degree of financial risk. Investors should carefully consider all information in this Draft Red Herring Prospectus, including the risks described below, before making an investment in our Equity Shares. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could suffer, the price of the Equity Shares could decline, and you may lose all or part of your investment. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. Investors should consult their tax, financial and legal advisors about particular consequences to them of an investment in the Issue. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, such financial impact cannot be disclosed in such risk factors. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Any of the following risks, as well as the other risks and uncertainties discussed in this Draft Red Herring Prospectus, could have a material adverse effect on our business and could cause the trading price of our Equity Shares to decline and you may lose all or part of your investment.

This Draft Red Herring Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. See chapter titled “Forward Looking Statements” beginning on page 21 of this Draft Red Herring Prospectus.

To obtain a better understanding of our business, you should read this chapter in conjunction with other chapters of this Draft Red Herring Prospectus, including the chapters titled “Our Business”, “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, “Industry Overview” and “Restated Financial Statements” on page 121, 217, 106 and 173 respectively of this Draft Red Herring Prospectus, together with all other Restated Financial Statements contained in this Draft Red Herring Prospectus. MATERIALITY

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- Some events may have material impact quantitatively;
- Some events may have material impact qualitatively instead of quantitatively.
- Some events may not be material individually but may be found material collectively.
- Some events may not be material at present but may be having material impact in future.

BUSINESS RELATED RISKS

- 1. We are highly dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these customers may have a material adverse effect on our profitability and results of operations.***

We depend on certain customers who have contributed to a substantial portion of our total revenues. In the aggregate, our top five customers accounted for 77.48%, 83.61%, and 77.32%, of our total revenue for the financial year ending March 31, 2024, 2023 and 2022, respectively; There is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers.

Reliance on a limited number of customers for our business may generally involve several risks. These risks may include, but are not limited to, reduction, delay or cancellation of orders from our significant customers; failure to renegotiate favourable terms with our key customers; the loss of these customers; all of which would have a material adverse effect on the business, financial condition, results of operations and future prospects of our Company. In order to retain some of our existing customers we may also be required to offer terms to such customers which we may place restraints on our resources.

Maintaining strong relationships with our key customers is, therefore, essential to our business strategy and to the growth of our business. Some of these customers have been associated with us for the past three years. Some of our customers may place demands on our resources or may require us to undertake additional obligations which have the effect of increasing our operating costs and therefore affect our profitability. Additionally, the loss of any key customer, may significantly affect our revenues, and we may have difficulty securing comparable levels of business from other customers to offset any loss of revenue from the loss of any of our key customers including our largest customer or even our top five customers.

If one or more of our customers were to become insolvent or otherwise unable to pay for the products supplied by us, this could have a have an impact on our business as we may not be able to recoup the unpaid production costs and materials incurred for operation purposes.

2. Our Company has entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.

While our Company believes that all such transactions have been conducted on the arm’s length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with unrelated parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest. In terms of the Companies Act, 2013 and SEBI LODR Regulations, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain related party transactions and we undertake that such related party transactions shall not be done against the interests of the Company and its shareholders as prescribed in the SEBI LODR Regulations. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

For further details of certain material legal proceedings involving our Company, our Promoters, our directors and our Group Companies, see “*Outstanding Litigations and Material Developments*” beginning on page 226 of this Draft Red Herring Prospectus.

5. *Our Company's manufacturing activities are labour intensive and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.*

Our operations and manufacturing process are labour intensive and depends on our ability to retain labour. In case such labour is unavailable or we are unable to identify and retain such labour our business could be adversely affected. We cannot guarantee that we may be able to continue with the same on favourable terms or at all. Any such failure may impact the operations, business process and profitability. Additionally, we have seen an increasing trend in manpower costs in India, which has had a direct impact on our employee costs and consequently, on our margins. Further, the minimum wage laws in India may be amended leading to upward revisions in the minimum wages payable in one or more states. We may

need to increase compensation and other benefits in order to attract and retain key personnel in the future and that may materially affect our costs and profitability. We cannot assure you that as we continue to grow our business in the future, our employee costs coupled with operating expenses will not significantly increase.

6. *We generate a substantial portion of revenue from the region of Gujarat. Any adverse developments affecting our operations in Gujarat region could have an adverse impact on our revenue and results of operations.*

Our Revenue are majorly dependent on the one State i.e., Gujarat. We generate almost 93.18%, 86.58%, and 74.34%, respectively of the total revenue from operation generated for the financial year ended March 31, 2024, 2023 and 2022, respectively. Such geographical concentration of our business in the Gujarat region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in Gujarat region, and our experience in Gujarat region may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, relevant government authorities or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside Gujarat market may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance.

7. *Our Revenue from sale of CCTV contribute significantly to our revenue from operation. Any loss of business from such products may adversely affect our revenues and profitability.*

Our Revenue from sale of CCTV contributes for 64.12%, 68.13%, and 84.16% of our total revenue from operations for the financial year ended March 31, 2024, 2023 and 2022, respectively. Any decline in our quality standards, growing competition and any change in the demand for CCTV may adversely affect our ability to retain clients of CCTV. We cannot assure that we shall generate the same quantum of business, or any business at all, from this segment, may adversely affect our revenues and profitability. However, the composition and revenue generated from this segment might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

8. *Majority of our Revenue from operation is derived from our assembling activities. Any disruption in the continuous operations of our assembling facilities would have a material adverse effect on our business, results of operations and financial.*

Our Revenue is majorly generated from assembling, trading and consulting services. Our revenue from assembling activities, contributes 64.12%, 68.13%, and 84.16% of our total revenue from operations for the financial year ended March 31, 2024, 2023 and 2022, respectively. We have our workshop at 414, Maple Trade Centre, Near Surdhara Circle, Thaltej, Ahmedabad, Gujarat-380054, India where we undertake assembling activities of CCTV. Any disruption to our assembling facilities may result in production shutdowns. These facilities are subject to certain operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government and regulatory authorities. Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted supply of our products is critical to our business. Further, our electricity requirements for our assembling facilities are directly sourced from local utilities. While we maintain power back-up in the form of UPS machine, we cannot assure you that we will successfully be able to prevent disruptions in our assembling processes in case of non-availability of adequate supply of power. In particular, if operations at our assembling facilities were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, terrorism, adverse weather conditions, labour dispute or unrest, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. Interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

- 9. The Company is dependent on the continuing operation of its manufacturing facilities. Any significant interruption in manufacturing at its facilities could have a material adverse effect on business, results of operations and financial condition.**

The Company manufactures all of the products at its workshop situated at 414, Maple Trade Centre, Near Surdhara Circle, Thaltej, Ahmedabad, Gujarat-380054, India, which are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, natural disasters, directives from the government. In case of any disruption at such facilities, it may adversely affect the manufacturing cycle and may lead to time over-run in the execution of orders. All of these manufacturing facilities require a significant amount and continuous supply of electricity and any shortage or non-availability of electricity may adversely affect the operations and working of the Company.

- 10. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.**

As per our Restated Financial Statements, our cash flows from operating, investing and financing activities are as set out below:

Net Cash Generated/(Used) from Investing Activities	(185.80)	(18.74)	(2.86)
Net Cash Generated/(Used) from Financing Activities	371.64	190.61	117.89

For further details and reasons of such negative cash flow, please see chapter titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on page 217 of this Draft Red Herring Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

- 11. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks. Despite our internal control systems, we may be exposed to operational risks, including fraud, petty theft and embezzlement, which may adversely affect our reputation, business, financial condition, results of operations and cash flows.**

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. We cannot assure you that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may affect ability to accurately report, or successfully manage, our financial risks, and to avoid fraud, which may in turn adversely affect our business, financial condition or results of operations.

Further, given the high volume of transactions we process on a daily basis, notwithstanding the internal controls that we have in place, we may be exposed to the risk of fraud or other misconduct by employees, contractors, or customers. Fraud and other misconduct can be difficult to detect and deter. Certain instances of fraud and misconduct may go unnoticed or may only be discovered and successfully rectified after substantial delays. Even when we discover such instances of fraud or theft and pursue them to the full extent of the law or with our insurance carriers, there can be no assurance that we will recover any of the amounts involved in these cases. In addition, our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect, which may adversely affect our reputation, business, financial condition, results of operations and cash flows

- 12. Our Company has higher debt-equity ratio which requires significant cash flows to service our debts obligations, and this, together with the conditions and restrictions imposed by our financing arrangements, fluctuations in the interest rates may limit our ability to operate freely and grow our business.**

The table below sets forth the details of our total outstanding borrowings and debt to equity ratio for fiscals March 31, 2024, 2023 and 2022:

Particulars	As of March 31, 2024	As of March 31, 2023	As of March 31, 2022
Total borrowings (₹ in lakhs) ⁽¹⁾	964.86	532.84	313.28
Debt-Equity Ratio (times) ⁽²⁾	1.45	4.90	3.57

(1) Total Borrowings = Restated Long-Term Borrowings plus Restated Short-Term Borrowings.

(2) Debt to Equity ratio is calculated as Total Debt divided by equity.

Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated from our business, which depends on the timely repayment by our customers. Our financing agreements and instruments contain certain restrictive covenants that limit our ability to undertake fund raising activities, any of which could adversely affect our business, results of operations and financial condition.

If our future cash flows from operations and other capital resources become insufficient to pay our debt obligations or our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets, our financial condition at such time and the terms of our other outstanding debt instruments. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest or principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our creditworthiness or credit rating, which could harm our ability to incur additional indebtedness on acceptable terms.

13. Our expansion into product categories and business verticals and increase in the number of products offered may expose us to new challenges and more risks.

We may face challenges in inspecting and controlling quality, regulatory requirements, handling, storage and delivery of our products. We may also need to price aggressively in our product categories to retain and attract consumers, which may not be possible in instances where a product manufacturer imposes restrictions on our ability to offer such products at a discount and which would adversely affect our gross margins.

We may also make substantial investments in launching such new products on our platform. Expansion of our offerings or business verticals may also strain our management and operational resources. It may also be difficult for us to achieve profitability with new products and as a result, our profit margins may be lower than we anticipate, which would adversely affect our results of operations. We cannot assure you that we will be able to recover our investments in introducing any new products or that any such new products will be successful by any measure.

14. We depend on a certain supplier for our raw materials and other components required for our operations and we do not have long-term agreements with suppliers for our raw materials or products and an increase in the cost of, or a shortfall in the availability or quality of such raw materials or products could have an adverse effect on our business, financial condition and results of operations.

Our business is significantly affected by the availability, cost and quality of the raw materials and products. We usually do not enter into long-term supply contracts with any of our raw material or products suppliers. Our raw materials or products are majorly procured in the domestic market from Gujarat. We are dependent on external suppliers for certain of the materials /components. The prices and supply of these and other raw materials and components depend on factors beyond our control, including general economic conditions, competition, production levels, transportation costs and duties. If, for any reason, our suppliers of raw materials and components should curtail or discontinue their delivery of such materials to us in the quantities we need or at prices that are competitive or expected by us, our ability to meet the requirements of our customers could be impaired and our earnings and business could suffer. Further, we may not be able to pass on any increase in the cost of manufacturing our products to our customers, which may adversely affect our results of operations. If we are unable to source raw materials from key suppliers in a timely manner, our production processes and results of operations may be adversely impacted. There can be no assurance that we would be able to source required quantities or qualities of raw materials in a cost-effective manner in future periods. In addition, we usually do not enter into long-term supply contracts with any of our raw material suppliers and typically source raw materials from third-party suppliers under contracts of shorter period or the open market. The absence of long-term contracts at fixed prices exposes us to volatility in the prices of raw materials that we require and we may be unable to pass these costs onto our customers, which may reduce our profit margins.

We face a risk that one or more of our existing suppliers may discontinue their supplies to us, and any inability on our part to procure raw materials or products from alternate suppliers in a timely manner, or on commercially acceptable terms, may adversely affect our business, financial condition and results of operations. Purchases made from our top 10 suppliers for

the financial year ended March 31, 2024, 2023 and 2022, respectively were ₹ 3456.78 Lakhs, ₹ 880.38 Lakhs and ₹ 891.33 Lakhs, respectively representing 93.92%, 90.97%, and 92.24% respectively of our total raw material or products purchases.

- 15. *Our Registered Office, workshop, warehouse and branch office are not owned by us are taken on rental basis. If we are unable to renew existing rental agreements or relocate our operations on commercially reasonable terms, there may be a material adverse effect on our business, financial condition, results of operations and cash flows could be adversely affected.***

Our registered office, workshop, warehouse and branch office are not owned by us are taken on rental basis. For further details, see “*Our Business*” beginning on page 121 of this Draft Red Herring Prospectus. If we are unable to renew certain or all of these rental agreements on commercially reasonable terms or at all and we cannot relocate our offices in a timely manner, we may suffer a disruption in our operations, and our results of operations, financial condition and cash flows may be materially and adversely affected. Further, we cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new offices and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

- 16. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price to be decided by the Company in consultation with the Book Running Lead Manager in accordance with the SEBI ICDR Regulations.***

Our Promoters’ average cost of acquisition of Equity Shares in our Company could be lower than the Price decided by our Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title “*Capital Structure*” beginning on page 73 of this Draft Red Herring Prospectus.

- 17. *We have not yet placed orders in relation to the funding Capital Expenditure towards setting up of Display Centre in Ahmedabad, Gujarat which is proposed to be financed from the Issue proceeds of the IPO. In the event of any delay in placing the orders, may result in time and cost over-runs and our business, prospects and results of operations may be adversely affected.***

We intend to use Rs. 419.12 lakhs of the Net Proceeds for Funding Capital Expenditure towards setting up of Display Centre in Ahmedabad, Gujarat. We are yet to place orders for the capital expenditure for setting up of Display Centre except payment of Rs. 5.02 lakhs as booking amount towards purchase of display centres, for further details, see “*Objects of the Issue*” on page 85. We have not entered into any definitive agreements to utilize the Net Proceeds for this object of the Issue and have relied on the quotations received from third parties for estimation of the cost. While we have obtained the quotations from various vendors in relation to such capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. Additionally, in the event of any delay in placement of such orders, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations.

For setting up of Display Centre will require us to obtain certain approvals, which are routine in nature. For further details, see “*Objects of the Issue*” on page 85. There can be no assurance that we will be able to obtain these registrations and approvals. Further, in the event of any unanticipated delay in receipt of such approvals, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly. For details, see “*Objects of the Issue*” on page 85 of this Draft Red Herring Prospectus.

- 18. *We require working capital for our smooth day-to-day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.***

Our business demands on working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. We intend to continue growing by expanding our business operations. This may result in increase in the quantum of our current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “*Objects of the Issue*” beginning on page 85 of this Draft Red Herring Prospectus.

19. *Within the parameters as mentioned in the chapter titled “Objects of the Issue” beginning on page 85 of this Draft Red Herring Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use the Net Proceeds for the purposes described in the section titled “Objects of the Issue” on page 85 of this Draft Red Herring Prospectus. The Objects of the Issue comprise of funding of capital expenditure requirements of our Company towards setting up of Display Centre in Ahmedabad, Gujarat, working capital requirements and general corporate purposes. We intend to deploy the Net Proceeds in financial year 2024-2025, such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled “Objects of the Issue” beginning on page 85 of this Draft Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “Objects of the Issue” beginning on page 85 of this Draft Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorize to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

20. *Our trading activities are exposed to fluctuations in the prices of traded goods.*

Our Company is dependent on third party suppliers for procuring the traded goods. We are exposed to fluctuations in the prices of these traded goods as well as their unavailability. We may be unable to control the factors affecting the price at which we procure the materials. We also face the risks associated with compensating for or passing on such increase in our cost of trades on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of traded goods may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations.

21. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, business operations and financial condition.*

As on date of this Draft Red Herring Prospectus, we have not made any alternate arrangements for meeting our capital requirements for objects of the issue. We meet our capital requirements through, owned funds, debt and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the net issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “Objects of the Issue” beginning on page 85 of this Draft Red Herring Prospectus.

22. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since, the Proceeds from the Issue is less than Rs.10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, as per the Section 177 of the Companies Act, 2013 and applicable laws, the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

23. *Failure or disruption of our information technology systems may adversely affect our business, financial condition, results of operations, cash flows and prospects.*

We have implemented various information technology solutions to cover key areas of our operations including sourcing, planning, accounting and data security. However, these systems are potentially vulnerable to damage or interruption from a variety of sources, which could result in a material adverse effect on our operations. Our ability to keep our business operating depends on the proper and efficient operation and functioning of the information technology systems, which are susceptible to malfunctions and interruptions (including those due to equipment damage, power outages, computer viruses and a range of other hardware, software and network problems). Such malfunction or disruptions could interrupt our business operations and result in economic losses. Any failure of our information technology systems could also cause damage to our reputation which could harm our business. Any of these developments, alone or in combination, could have a material adverse effect on our business, financial condition, results of operations and cash flows.

There is no assurance that we will not experience disruption in our information technology systems in the future and we will be able to remedy such disruption in timely manner, or at all. Any such disruption of our information technology systems could have a material adverse effect on our business, results of operation and financial condition.

Any failure in overhauling or updating our information technology systems in a timely manner could cause our operations to be vulnerable to external attacks and inefficient. Hence, any failure or disruption in the operation of these systems or the loss of data due to such failure or disruption (including due to human error or sabotage) may affect our ability to conduct our normal business operations, which may materially adversely affect our business, financial condition, results of operations, cash flows and prospects. In addition, technological advances from time to time may result in our systems, methods or processing facilities becoming obsolete.

24. *We are highly dependent on our promoters and directors for our business. The loss of or our inability to attract or retain such persons could have a material adverse effect on our business performance, results of operations, financial condition and cash flows.*

Our success depends heavily upon the continuing services of Promoters and Directors who are the natural person in control of our Company. They have established cordial relations with various customers and suppliers over the past several years, which have immensely benefitted our Company's current customers and supplier relations. We believe that our relation with our Promoters, who have rich experience in our industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoters are also part of certain other firms / ventures and may continue to do so. If they divert their attention to such other concerns, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our Promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Further, we also depend significantly on our directors for executing their day-to-day activities. If our Promoters / Directors is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected. In addition, we depend on our Directors / Promoters for the extension of unsecured loans and advances from time to time. For details, see chapter titled "*Financial Indebtedness*" beginning on page 215 of this Draft Red Herring Prospectus.

25. *Our Company has availed unsecured loans from our directors which may be recalled on demand.*

As on March 31, 2024, we have outstanding unsecured loan amounting to Rs. 390.26 Lakhs from our directors which are repayable on demand to them. For further details of our unsecured loans, please refer the chapter titled "*Financial Indebtedness*" beginning on page 215 of this *Draft Red Herring Prospectus*. These loans may not be repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. In such cases, we may be required to repay the entirety of the unsecured loans. We may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favourable to it. Failure to repay unsecured loans in a timely manner may have a material adverse effect on our business, results of operation financial condition and cash flow.

26. *Our Company has not entered into any long-term contracts with our customers and we typically operate on the basis of orders received on hand. Inability to maintain regular order flow would adversely impact our revenues and profitability.*

We have not entered into any fixed contracts with our customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, quality consistency, fluctuation in demand for our

Company's products and customer's inventory management. Although we place a strong emphasis on quality, pricing and timely delivery of our products and after sales service such as feedback on the trends in their market, personal interaction by the top management with the customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company

- 27. *We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect our business operations and our sales could be diminished if we are associated with negative publicity.***

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect our business operations and our sales could be diminished if we are associated with negative publicity. Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our Company, brand, or products or any other unforeseen events could affect our reputation and our results from operations. However, no such instances occurred in the past.

- 28. *We operate in a highly competitive industry. Any inability to compete effectively may lead to a lower market share or reduced operating margins.***

We operate in a highly competitive industry with a number of other distributors that deals in competing products. As a result, to remain competitive in the market we must continuously strive to reduce our distribution costs and improve our operating efficiencies and expand our products offering. If we fail to do so, it may have an adverse effect on our market share and results of operations.

Many of our competitors may be larger than us and may benefit large distribution network and operating efficiencies. There can be no assurance that we can continue to effectively compete with such distributors in the future, and failure to compete effectively may have an adverse effect on our business, financial condition and results of operations. Moreover, the competitive nature of the distribution industry in steel prices may result in lower prices for our products and decreased profit margins, which may materially adversely affect our revenue and profitability

- 29. *Our Company has limited storage capacity which can result in stock out cost and loss of customer adversely affecting our business and results of operations.***

Large warehousing capacity is the key growth driver in our business. Large warehousing ensures a regular supply of goods into the marketplace by being able to procure goods in bulk quantities and then releasing them to various customers in the varied quantities required by them timely. Maintaining consistent stock levels helps prices to stay stable, making it easier for businesses to forecast profit and loss. Large warehousing facility also helps in attracting a variety of customers by providing them with a wide range of products and meeting their order requirements in a timely manner. Though our Company currently stocks our entire stock in workshop cum warehouse and also in registered office if require, we cannot guarantee that this space will be sufficient to store our future procurements. Inability to meet customer demand due to inadequate storage may adversely affect our Company's reputation, business and results of operation. Further, our Company also intends to purchase Display Centre from IPO proceeds where inventories will also be stored. For details, see "Objects of the Issue" on page 85 of this Draft Red Herring Prospectus.

- 30. *Our Company has limited space for our display centre.***

Large Display centre is the key growth driver in our business. Large display centre ensures acquiring more customers, live demonstrations, strengthening brand image, tangible interaction with customers. Large display centre also helps in attracting a variety of customers. Though our Company's current display centre is in our registered office. We cannot guarantee that this space will be sufficient for our future procurements and may adversely affect our Company's reputation, business and results of operation. Further, our Company also intends to setup a display centre from IPO proceeds. For details, see "Objects of the Issue" on page 85 of this Draft Red Herring Prospectus. A display centre with appropriate space can significantly enhance our business by providing a space for meaningful dealers & distributor interactions along with other customers, strengthening the brand, and driving sales. It also offers logistical benefits and valuable market insights, contributing to the overall growth and success of the business.

- 31. *We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.***

Our business operation required skilled and creative manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and

competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

32. *We may not be able to accurately manage our inventory, this may adversely affect our goodwill and business, financial condition and results of operations.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. In the past we have not experienced any instances of disruptions to the delivery of product to our customer occurred for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could have led to delayed or lost deliveries or damaged products and disrupt supply of these products., but there is not guarantee that these instances will not happen in future to improve our line capability. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we overstock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation

33. *We are dependent on third party transportation providers for the supply of raw materials and products. Accordingly, continuing increases in transportation costs or unavailability of transportation services for them, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects.*

We use third party transportation providers for the delivery of our raw material and products. Transportation strikes could have an adverse effect on our receipt of raw materials and our ability to deliver our products to our customers. In addition, transportation costs in India have been steadily increasing over the past several years. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects. In addition, India's physical infrastructure is less developed than that of many developed nations, and problems with its road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including our supply of raw materials and the delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

34. *The Company's customers operate in various industry segments/verticals and fluctuations in the performance of the industries in which the customers operate may result in a loss of customers, a decrease in the volume of work undertake or the price at which the company offer its products.*

The Company's business operations are exposed to fluctuations in the performance of the industries in which its significant customers operate. Customers may also decide to reduce spending on services due to a changing economic environment and other factors relating to the industry in which they operate. For instance, in the period of pandemic wherein all the industries are facing a slowdown and cash crunch due to the lockdown and other restrictions imposed by several State Governments, had resultant in a widespread impact on the industry. A loss of any significant customers, a decrease in the volume of work that the company's customers outsource or a decline in prices of the products offered by the company may materially and adversely affect its business, operations, financial condition and results of operations.

35. *Delays or defaults in client payments could result in a reduction of our profits.*

We may be subject to working capital risks due to delays or defaults in payment by clients. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated, to our customers may in turn cause delay in payment or refusal of payment by customers. Such defaults/delays by our customers in meeting their payment

obligations to us may have a material effect on our business, financial condition and results of operations. However, no such instances have occurred in the past.

36. *Our success also depends to an extent on our research and development capabilities and failure to derive the desired benefits from our product research and development efforts may hurt our competitiveness and profitability.*

Our success is dependent on our ability to develop new products and continue to work on and improve production capabilities. We make investments in product research and development, in particular, to improve the quality of our products and expand our new product offerings, which we believe are factors crucial for our future growth and prospects. We cannot assure you that our future product research and development initiatives will be successful or be completed within the anticipated time frame or budget, or that our newly developed or improvised products will achieve wide market acceptance from our customers. Even if such products can be commercially successful, there is no guarantee that they will be accepted by our customers and achieve anticipated sales target or in a profitable manner. Additionally, there can be no guarantee that the time and effort that we spend in research and development would be beneficial to the Company. There can be assurance that costs incurred by us towards research and development may in the future actually reduce the costs incurred by us towards production of these products. In addition, we cannot assure you that our existing or potential competitors will not develop products which are similar or superior to our products. It is often difficult to project the time frame for developing new products and the duration of market window for these products, there is a substantial risk that we may have to abandon a potential product that is no longer commercially viable, even after we have invested significant resources in the development of such product. If we continue to fail in our product launching efforts, our business, prospects, financial condition and results of operations may be materially and adversely affected.

37. *There has been delay in filing of forms with the Registrar of Companies as per the stipulated timelines prescribed under the Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future, for delay in such compliances could impact the reputation and financial position of the Company to that extent.*

Our Company in the past have made delay in filings of some RoC forms as per the stipulated timelines prescribed under the Companies Act, 2013. Although, our Company has paid requisite late fees for such filings, no show cause notice in respect of the same has been received by our Company till date, any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.

The details of ROC late filings are as follows:

[^] The delays were attributed to the maternity leave taken by our Director, Ms. Mitali Dasharathbharathi Gauswami, as well as the Company's consultant's pre-occupation with other company-related matters.

Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company till date, in respect of above. In the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and our directors, in which event the financials of our Company and our directors may be affected.

For further details of certain material legal proceedings involving our Company, our Promoters, our directors, see “Financial Information” beginning on page 173 of this Draft Red Herring Prospectus.

40. The recent outbreak of the novel coronavirus could have a significant effect on our results of operations, and could negatively impact our business, revenues, financial condition and results of operations.

An outbreak of COVID-19 was recognized as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Since May 2020 many of these measures our operations and to build confidence in the safety protocols deployed at our office. If we do not respond appropriately to the pandemic, or if customers do not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future. Further, the lockdown was again imposed by the government in some parts of India during April 2021, which was partially relaxed in June 2021, during this lockdown although we have continued with our business, the execution of our business operations was delayed by few weeks. We cannot predict the degree to, or the time period over, which our business will be affected by the COVID-19 outbreak. For example, this pandemic could necessitate further lockdowns, resulting in significant additional effects on our revenue, financial condition and results of operations. There are numerous uncertainties associated with the COVID-19 outbreak, including the number of individuals who will become infected, availability of a vaccine or a cure that mitigates the effect of the virus, the extent of the protective and preventative measures imposed by governments and whether the virus' impact will be seasonal, among others. Consequently, there may be adverse effects of this pandemic on our short-term business operations and our financial results may be impacted.

41. Employee misconduct including misuse of confidential data and failure to maintain confidentiality of information could harm us and is difficult to detect and deter.

We could be harmed by employee misconduct if our customers' confidential information is misappropriated by us or our employees, our customers may consider us liable for that act and seek damages and compensation from us, in addition, to seeking termination of the contract. While there have been no instances during the last three financial year of information technology breach or instances of cyber-attack, assertions of misappropriation of confidential information or the intellectual property of our customers against us, if successful, could have a material adverse effect on our business, financial condition and results of operations. Even if such assertions against us are unsuccessful, they may cause us to incur reputational harm and substantial cost.

Although we closely monitor our employees, misconduct, including acts of bribery, corruption or fraud by employees or executives, such acts could include binding us to transactions that exceed authorized limits or present unacceptable risks,

or they may hide unauthorized or unlawful activities from us, which may result in substantial financial losses and damage to our reputation and loss of business from our customers. Employee or executive misconduct could also involve the improper use or disclosure of confidential information, which could result in regulatory sanctions and serious reputational or financial harm, including harm to our brand. While we have not experienced any such employee misconduct in the past, it is not always possible to deter employee or executive misconduct and the precautions taken and systems put in place to prevent and detect such activities may not be effective in all cases. Any instances of such misconduct could adversely affect our business and our reputation.

42. *In addition to normal remuneration, other benefits and reimbursement of expenses some of our directors (including our Promoters) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our directors including our Promoters are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our directors would always exercise their rights as shareholders to the benefit and best interest of our Company. For further information, see the chapters titled “*Our Management*” and “*Our Promoters and Promoter Group*” beginning on page 152 and 166 respectively of this *Draft Red Herring Prospectus* and the section titled “*Financial Information*” beginning on page 173 of this *Draft Red Herring Prospectus*.

43. *If we are unable to manage our growth effectively and further expand into new markets our business, future financial performance and results of operations could be materially and adversely affected.*

The success of our business will depend on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist including by continuing to strengthen our existing product portfolio with attractive growth and profitability prospects, to strive for cost efficiency, attracting and retaining talented employees and focusing on consistently meeting quality standards. As we continue to grow our business and expand into newer markets, we may face several challenges, including • acquiring new customers; • identifying customer requirements and preferences in such markets; • obtaining approvals and certifications for our products in such jurisdictions; • making accurate assessments of the resources we will require; • preserving a uniform culture, values and work environment; • developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems; • recruiting, training and retaining sufficient skilled management, technical and marketing personnel; • maintaining high levels of customer satisfaction; and • adhering to expected performance and quality standards. In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations. Our operating expenses and capital requirements may increase significantly pursuant to our expansion plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively, further expand into new markets or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

44. *We may not be fully insured for all losses we may incur.*

Although we attempt to limit and mitigate our liability for damages arising from negligent acts, errors or omissions through contractual provisions, limitations of liability set forth in our contracts may not be enforceable in all instances or may not otherwise protect us from liability for damages. In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our clients, are generally not limited under those agreements. We have taken insurance policies, details of which are mentioned in the section titled, “Insurance” under the chapter titled, “*Our Business*” on page 121 of this *Draft Red Herring Prospectus*. Although we believe we have adequate insurance coverage but that coverage may not continue to be available on reasonable terms or to be available in sufficient amounts to cover one or more large claims, and our insurers may disclaim coverage as to any future claim. Insurance coverage may be an inadequate remedy where the loss suffered is not easily quantifiable, for example, in the event of severe damage to our reputation. The successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, reputation, results of operations, financial condition and cash flows.

45. *We are subject to various laws and extensive government regulations and if we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required in the ordinary course of our business, including environmental, health and safety laws and other regulations, our business financial condition, results of operations and cash flows may be adversely affected.*

We are required to comply with Indian laws, among other things, relating to occupational health and safety (including laws regulating the generation, storage, handling, use and transportation of waste materials, the emission and discharge of hazardous waste materials into soil, air or water, and the health and safety of employees) and mandatory certification requirements for our facilities and products. For regulations and policies applicable to our Company, see “*Key Industry Regulations and Policies*” beginning on page 140 of this *Draft Red Herring Prospectus*. There can be no assurance that we will be in compliance at all times with such laws, regulations and the terms and conditions of any such consents or permits. If we violate or fail to comply adequately with these requirements, we could be fined or otherwise sanctioned by the relevant regulators.

Our business and operations are subject to a number of approvals, licenses, registrations and permissions, in addition to extensive government regulations for the protection of the environment and occupational health and safety. We have either made or are in the process of making an application or renewal for obtaining necessary approvals that are not in place or have expired. Further, we may also need to apply for additional approvals including the renewal of approvals which may expire from time to time, in the ordinary course of business. We cannot assure you that these approvals will be granted by the relevant authorities. In the event these approvals are not granted, we will have to make alternate arrangements, which may adversely impact our business, financial condition, results of operations, cash flows and prospects. For further details of pending renewals and pending material approvals, see “*Government and Other Statutory Approvals*” on page 232 of this *Draft Red Herring Prospectus*. If we fail to retain, renew or receive any of such approvals, licenses, registrations, permissions or renewals, in a timely manner or at all, our business, financial condition, results of operations, cash flows and prospects may be adversely affected.

Further, our government approvals and licenses are onerous and require us to make substantial compliance-related expenditure. If we fail to comply or a regulator claims that we have not complied and orders closure of our offices where it is found to be non-compliant with the applicable norm our business, prospects, financial condition, results of operations and cash flows may be adversely affected.

In addition, we may be subject to additional laws, regulations and rules with respect to environment protection, health and safety in the jurisdiction we currently operate. Our inability to control the costs involved in complying with these and other relevant laws and regulations could have an adverse effect on our business, financial condition, results of operations and cash flows.

46. If we fail to keep our technical knowledge and process know-how confidential, we may suffer a loss of our competitive advantage.

We possess extensive technical knowledge about our products and such technical knowledge has been developed through our own experiences. Our technical knowledge is an independent asset of ours, which may not be adequately protected by intellectual property rights. Some of our technical knowledge is protected only by secrecy. As a result, we cannot be certain that our technical knowledge will remain confidential in the long run. Certain proprietary knowledge may be leaked (either inadvertently or wilfully), at various stages of the business process. A significant number of our employees have access to confidential information and there can be no assurance that this information will remain confidential. Moreover, certain of our employees may leave us and join our various competitors. In the event that the confidential technical information in respect of our products or business becomes available to third parties or to the general public, any competitive advantage we may have over other companies in our sector could be compromised. If a competitor is able to reproduce or otherwise capitalise on our technology, it may be difficult, expensive or impossible for us to obtain necessary legal protection. Consequently, any leakage of confidential technical information could have an adverse effect on our business, results of operations, financial condition and future prospects.

47. Pricing pressure from customers may adversely affect our gross margin, profitability and ability to increase our prices.

Our customers often pursue price reduction initiatives and objectives with their suppliers including us. Adopting cost cutting measures while maintaining stringent quality standards may lead to a decrease in our margins, which may have a material adverse effect on our business, financial condition, results of operations and future prospects. Our customers typically negotiate for larger discounts in price as the volume of their orders increases. If we are unable to efficiently generate sufficient cost savings in the future to offset price reductions or if there is any reduction in consumer demand for consumer goods, our sales, gross margin and profitability may reduce, which may have a material adverse effect on our business, financial condition, results of operations and future prospects.

48. Our Company's failure to maintain the quality standards of the products or keep pace with the technological developments could adversely impact our business, results of operations and financial condition.

Our products depend on recent inventions and developments as we manufacture and market the products as per the market trends. Any failure to maintain the quality standards may affect our business. Although we have put in place strict quality

control procedures, we cannot assure that our products will always be able to satisfy our customers quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations. Also, rapid change in our customers expectation on account of changes in technology or introduction of new products or for any other reason and failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition. While, we believe that we have always introduced new products based on consumers need to cater to the growing demand of our customers and also endeavour regularly update our existing technology, our failure to anticipate or to respond adequately to changing technical, market demands and/or client requirements could adversely affect our business and financial results.

- 49. The logo “  ” has been registered under the name of our company. Any failure to protect our intellectual property could have a material adverse effect on our business. We are, and may also in the future be, subject to intellectual property infringement claims, which may be expensive to defend and may disrupt our business.**

As on date of this Draft Red Herring Prospectus, the logo “  ” has been registered under Class 9 of the Trade Mark Act, 1999 which is valid up to August 09, 2027. The said trademark belongs to our brand, if Company withdraws it or terminates this arrangement or do not renew it, we will not be able to make use of the said trademark, name or logo in connection with our business and consequently, we may be required to invest significant resources in changing our logo which may adversely affect our reputation and business. We have been conducting our business using our logo and our customers associate our logo with our Company and its operations. Our ability to compete effectively depends in part upon our ability to protect our rights in trademarks and other intellectual property that we have been registered. We seek to protect our logos, brand names and websites’ domain names by relying on trademarks and domain name registrations. However, our efforts to protect our intellectual property may not be adequate. The use of our name and logo is vital to our competitiveness and success and for us to attract and retain our customers and business partners. Further, we cannot assure you that the measures we have taken will be sufficient to prevent any misappropriation or infringement of our intellectual property.

- 50. Our financing agreements contain covenants that limit our flexibility in operating our business. If we are not in compliance with certain of these covenants and are unable to obtain waivers from the respective lenders, our lenders may accelerate the repayment schedules, and enforce their respective security interests, leading to a material adverse effect on our business and financial condition.**

A portion of borrowings is secured by hypothecation of current assets (both present and future), mortgage of our properties and of our promoters personal properties, *for further details, please refer the chapter titled “Financial Indebtedness” beginning on page 215 of this Draft Red Herring Prospectus.* Our existing financing arrangements contain a number of restrictive covenants that impose significant operating and financial restrictions on us and may limit our ability to, without prior consents from the lenders, engage in acts that may be in our long-term best interest, including restrictions on our ability to, among other matters, make regular inspections and audits.

If we are not in compliance with certain of these covenants and are unable to obtain waivers from the respective lenders or if any events of default occur, our lenders may accelerate the repayment schedules or terminate our credit facilities.

Further, certain of our subsisting loans may be recalled at any time at the option of the lender. There can be no assurance that the lenders will not recall such borrowings or if we will be able to repay loans advanced to us in a timely manner or at all. Subsequently, if we are unable to pay our debt, affected lenders could also proceed against any collateral granted to them to secure such indebtedness. Further, such covenant defaults could result in cross-defaults in our other debt financing agreements. In the event our lenders accelerate the repayment of our borrowings, there can be no assurance that we will have sufficient assets to repay our indebtedness.

If our future cash flows from operations and other capital resources become insufficient to pay our debt obligations or our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets, our financial condition at such time and the terms of our other outstanding debt instruments. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest or principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our creditworthiness or credit rating, which could harm our ability to incur additional indebtedness on acceptable terms.

- 51. Our Promoters and their relatives have provided personal guarantees for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing**

documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters and their relatives and thereby, impact our business and operations.

Our Promoters and their relatives have extended personally guarantee towards loan facilities taken by our Company. Any default or failure by us to repay the loans in a timely manner, or at all could trigger repayment obligations of our guarantors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoters of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details, please refer the chapter titled “Financial Indebtedness” beginning on page 215 of this Draft Red Herring Prospectus.

52. *We might infringe upon the intellectual property rights of others and may be susceptible to claims from third parties, affecting our operations and financial condition.*

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty as to whether we are infringing on any existing third-party intellectual property rights, which may require us to alter our technologies, obtain licenses or cease some of our operations. We may also be susceptible to claims from third parties asserting infringement and other related claims. If such claims are raised, those claims could: (a) adversely affect our relationships with current or future customers; (b) result in costly litigation; (c) cause product shipment delays or stoppages; (d) divert management’s attention and resources; (e) subject us to significant liabilities; (f) require us to enter into potentially expensive royalty or licensing agreements and (g) require us to cease certain activities. While in the last three financial years we have not been involved in litigation or incurred litigation expenses in connection with third party intellectual property rights, in the case of an infringement claim made by a third party, we may be required to defend such claims at our own cost and liability and may need to indemnify and hold harmless our customers. Furthermore, necessary licenses may not be available to us on satisfactory terms, if at all. In addition, we may decide to settle a claim or action against us, which settlement could be costly. We may also be liable for any past infringement that we are not aware of. Any of the foregoing could adversely affect our business, financial condition and results of operations.

53. *Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.*

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled “Financial Indebtedness” beginning on page 215 of this Draft Red Herring Prospectus.

54. *We are exposed to counterparty credit risk and any delay in receiving payments or non-receipt of payments may adversely impact our results of operations.*

We are subject to counterparty credit risk and a significant delay in receiving large payments or non-receipt of large payments may adversely impact our results of operations. Our operations involve extending credit to our customers in respect of sale of our products and consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. As a result of such industry conditions, we have and may continue to have high levels of outstanding receivables. There is no assurance that we will accurately assess the creditworthiness of our customers. Further, macroeconomic conditions which are beyond our control, such as a potential credit crisis in the global financial system, could also result in financial difficulties for our customers, including limited access to the credit markets, insolvency or bankruptcy. Such conditions could cause our customers to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of dues from customers also depends on our ability to complete our contractual commitments and subsequently bill for and collect from our clients. While we have not faced such incidents in the past, if we are unable to meet our contractual obligations, we may experience delays in the collection of, or be unable to collect, our customer balances, which could adversely affect our results of operations and cash flows.

55. *Our Promoters and Promoter Group will continue to retain a majority shareholding in our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After the completion of the Issue, our Promoters and Promoter Group is expected to hold [●]% of the Post Issue Equity Share Capital. Further, the involvement of our Promoters in our operations, including through strategy, direction and customer relationships have been integral to our development and business and the loss of any of our Promoters may have a material adverse effect on our business and prospects.

Accordingly, our Promoters and Promoter Group will continue to exercise significant influence over our business and all matters requiring shareholders' approval, including the composition of our Board of Directors, the adoption of amendments to our constitutional documents, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, investments and capital expenditures. This concentration of ownership may also delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of our Promoters and Promoter Group. Further, the Promoters' shareholding may limit the ability of a third party to acquire control. The interests of our Promoters and Promoter Group, as our Company's controlling shareholder, could conflict with our Company's interests, your interests or the interests of our other shareholders. There is no assurance that our Promoters and Promoter Group will act to resolve any conflicts of interest in our Company's or in investor favor.

56. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" beginning on page 172 of this *Draft Red Herring Prospectus*.

57. *The determination of the Price Band is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchange.*

The determination of the Price Band is based on various factors and assumptions, and will be determined by our Company in consultation with the Book Running Lead Manager. Furthermore, the Issue Price of our Equity Shares has been determined by book building method. These will be based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page 96 of this *Draft Red Herring Prospectus*) and may not be indicative of the market price of our Equity Shares upon listing on the Stock Exchange. The price of our Equity Shares upon listing on the Stock Exchange will be determined by the market and may be influenced by many factors outside of our control.

58. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Our restated financial statements, including the financial statements provided in this *Draft Red Herring Prospectus*, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this *Draft Red Herring Prospectus*, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled "Presentation of Financial Industry and Market Data" beginning on Page 19 of this *Draft Red Herring Prospectus*.

Accordingly, the degree to which the Indian GAAP financial statements included in this *Draft Red Herring Prospectus* will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this *Draft Red Herring Prospectus* should accordingly be limited. India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim

financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards, i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

EXTERNAL RISKS

59. An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

60. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by book building method. The price band is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 96 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- i. quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- ii. changes in revenue or earnings estimates or publication of research reports by analysts;
- iii. results of operations that vary from those of our competitors;
- iv. speculation in the press or investment community;
- v. new laws and governmental regulations applicable to our industry;
- vi. future sales of the Equity Shares by our shareholders;
- vii. general market conditions; and
- viii. domestic and international economic, legal and regulatory factors unrelated to our performance

61. We have issued Equity Shares during the last one year at a price below the Issue Price.

Our Company had issued equity shares pursuant to conversion of loan into equity shares of 4,00,000 on May 07, 2024 and bonus shares of 66,00,003 equity shares on May 09, 2024 in the ratio of 11:2 i.e., 11 Bonus Equity Shares for every 2 Equity Shares held, in the last 12 months which may be lower than the Issue Price. The Equity Shares allotted to shareholders pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time. For further details, see “Capital Structure” on page 73 of this Draft Red Herring Prospectus. The prices at which Equity Shares have been issued by us in last one year should not be taken to be indicative of the Issue Price and the trading price of our Equity Shares after listing.

62. Our Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for our Equity Shares will develop or, if developed, does not guarantee the liquidity of such market for the Equity Shares. Investors might not be able to rapidly sell the Equity Shares at the quoted price if there is no active trading in the Equity Shares. The Issue Price of the Equity Shares has been determined by our Company in consultation with the BRLM through the Book Building Process. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

63. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the NSE Emerge Platform in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the NSE Emerge. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

64. *Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoters or other shareholders may adversely affect the trading price of the Equity Shares.*

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

65. *There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

66. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹100,000, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source.

The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows. The Government of India had announced the union budget for financial year 2024 and the Finance Act, 2023 received assent from the President of India on March 31, 2023. There is no certainty on the impact that the Finance Act, 2023 may have on our business and operations or in the industry we operate in.

67. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager have appointed Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

68. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the exchange control regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain restrictions) if they comply with the pricing guidelines and reporting requirements specified by the Reserve Bank of India. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the approval of the Reserve Bank of India will be required for such transaction to be valid.

Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as Department of Industrial Policy and Promotion) and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the Consolidated FDI Policy and the FEMA Rules. These investment restrictions shall also apply to subscribers of offshore derivative instruments. Neither the Consolidated FDI Policy nor the FEMA Rules provide a definition of the term "beneficial owner". The interpretation of "beneficial owner" and enforcement of this regulatory change may differ in practice, which may have an adverse effect on our ability to raise foreign capital. We cannot assure you that any required approval from the Reserve Bank of India or any other governmental agency can be obtained on any particular terms or at all.

69. *Natural calamities, climate change and health epidemics could adversely affect the Indian economy and our business, financial condition, and results of operations. In addition, hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect our business, financial condition and results of operations.*

Our operations including our offices may be damaged or disrupted as a result of natural calamities. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations. Damage or destruction that interrupts our provision of services could adversely affect our reputation, our relationships with our customers, our management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our offices. Any of the above factors may adversely affect our business, financial condition and results of operations. India has from time-to-time experienced instances of social, religious and civil unrest and hostilities between neighbouring countries. Military activity or terrorist attacks in the future could influence the Indian

economy by disrupting communications and making travel more difficult and such political tensions could create a greater perception that investments in Indian companies involve higher degrees of risk. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies.

70. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

71. *Changing laws, rules and regulations and legal uncertainties, including adverse application or interpretation of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2023 ("Finance Bill"), has introduced various amendments. The Finance Bill has received assent from the President of India on March 31, 2023, and has been enacted as the Finance Act, 2023. We cannot predict whether any amendments made pursuant to the Finance Act, 2023 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

72. *Regulation of greenhouse gas emissions and climate change issues may adversely affect our operations.*

Many governments are moving to enact climate change legislation and treaties at the international, national, state, provincial and local levels. Where legislation already exists, regulations relating to emission levels and energy efficiency are generally becoming more stringent. Some of the costs associated with meeting more stringent regulations can be offset by increased energy efficiency and technological innovation. However, if the current regulatory trend continues, meeting more stringent regulations is anticipated to result in increased costs, and this may have a material adverse impact on our financial condition and results of operations. Further, India and many other nations are signatories to international agreements related to climate change including the 1992 United Nations Framework Convention on Climate Change, which is intended to limit or capture emissions of greenhouse gas, such as carbon dioxide and the 2016 Paris Agreement, which extended the potentially binding set of emissions targets to all nations. Our compliance with any new environmental laws or regulations, particularly relating to greenhouse gas emissions, may require significant capital expenditure or result in the incurrence of fees and other penalties in the event of non-compliance. We cannot guarantee that future legislative, regulatory, international law, industry, trade or other developments will not negatively impact our operations and the demand for the products we sell. If any of the foregoing were to occur, our business, financial condition and results of operations may be adversely affected.

73. *Our business is substantially affected by prevailing economic, political and other conditions political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

We are incorporated in and all our operations are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations and cash flows are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations and cash flows, may include:

- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporates;
- volatility in, and actual or perceived trends in trading activity on India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets; and
- other significant regulatory or economic developments in or affecting India or its manufacturing sector.

On February 24, 2022, Russian military forces invaded Ukraine. Although the length, impact and outcome of the ongoing military conflict in Ukraine is highly unpredictable, this conflict and responses from international communities could lead to significant market and other disruptions, including significant volatility in commodity prices and supply of energy resources, instability in financial markets, supply chain interruptions, political and social instability, changes in consumer or purchaser preferences as well as increase in cyberattacks and espionage.

To date, we have not experienced any material interruptions in our supply chain and distribution network in connection with these conflicts. We have no way to predict the progress or outcome of the conflict in Ukraine as the conflict, and any resulting government reactions, are rapidly developing and beyond our control. The extent and duration of the military action, sanctions and resulting market disruptions could be significant and could potentially have a substantial impact on the global economy and our business for an unknown period of time. Any of the abovementioned factors could affect our business, financial condition and results of operations.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

74. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

75. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

76. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition

77. Changing regulations in India could lead to new compliance requirements that are uncertain. The regulatory environment in which we operate is evolving and is subject to change.

The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements. The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, financial condition, results of operations and prospects.

78. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

In recent months, consumer and wholesale prices in India have exhibited increased inflationary trends, as the result of an increase in crude oil prices, higher international commodity prices, and higher domestic consumer and supplier prices. The Consumer Price Index increased from 3.4% (average) in Fiscal 2019 to 4.8% (average) in Fiscal 2020 to an estimated 6.2% (average) in Fiscal 2021 although the RBI has enacted certain policy measures designed to curb inflation, these policies may not be successful. In February 2022, hostilities between Russia and the Ukraine commenced. The market price of oil has risen sharply since the commencement of these hostilities which could have an inflationary effect in India. Continued high rates of inflation may increase our expenses related to salaries or wages payable to our employees, raw materials and other expenses. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our business, financial condition and results of operations.

79. *A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian Law.*

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the SEBI SAST Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of SEBI SAST Regulations.

80. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition. The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have in the past experienced substantial dislocations, liquidity disruptions and market corrections.

81. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Investors are not permitted to withdraw their Bids after Bid/ Issue Closing Date.*

Pursuant to the SEBI ICDR Regulations, Qualified Institutional Buyers and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Similarly, Retail Individual Investors can revise or withdraw their Bids at any time during the Bid/ Issue Period and until the Bid/ Issue Closing Date, but not thereafter. Therefore, Qualified Institutional Buyers and Non-Institutional Investors will not be able to withdraw or lower their Bids following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations or otherwise at any stage after the submission of their Bids.

Our Company is engaged in the business of providing security and surveillance solutions by offering comprehensive range of CCTV cameras which serves different verticals like retail, government, educational and infrastructure, among others. Our Company in the year 2022 expanded its product portfolio by selling different sizes and features of televisions, touch panels and monitors manufactured by third parties under our brand name. We also provide services including video management software which provides surveillance feature to our customers in a single monitor and location. One of the keys to the business process of our Company is demonstration of our products, which requires a full-fledged display center. Presently, we display our products in our registered office. As a part of our growth strategy, we plan to expand our operation which requires an exclusive with larger space of display centre for brand awareness and selling opportunities for our Company as well as our dealers and distributors. Our dealers and customers would get an easy access to wide array of products and services through our display centre leading to better experience and convenience for them. This may be regarded as marketing infrastructure or infrastructure to support the marketing activities. We intend to utilise a portion of our Net Proceeds towards setting up of an exclusive with larger space of display centre.

Objectives of capital expenditure towards setting up of Display Centre:

Tangible Interaction: Dealer/Distributor can physically interact with products, which is often more compelling than viewing them online or in a catalogue. Our customers would also get an easy access to wide array of products and services through our display centre leading to better customer experience and convenience for the customer. This also provides an opportunity for consumers to touch and feel the product before buying. This would also help our dealers and distributors to grow their business by availing solutions that allow them to acquire and retain consumers by offering various products and services from the same location and improve their business operations.

Demonstrations: Live demonstrations can be conducted, showcasing the functionality and quality of products in a controlled environment. Facilitates personal interaction, fostering stronger relationships with dealers/distributors also provides opportunities for in-depth consultations, where sales representatives can tailor solutions to specific dealers and distributors requirements.

Direct customer feedback and insights: A physical display centre gives B2B sales force direct and immediate customer feedback. We can see and feel our visitors' reactions and respond to them immediately. Rationale for Increase in working capital gap from FY 2023-24 to FY 2024-25

Our Company is expanding its product offerings and market reach. The fund raise is instrumental in supporting this growth initiative. The Company initially started with providing security and surveillance solutions products (CCTV cameras and its ancillary products) and was manufacturing and selling in the same category up to Fiscal year 2022. In FY 2022-23, the Company added television, touch panels and monitors business into its portfolio which received good market response. We are also widening our product range within the existing categories and constantly upgrading the existing products with new features (e.g., Face detection feature, 2-way audio feature, etc). This strategy allows us to offer a more extensive variety of products to our customers and compete effectively in the market.

A wider range of collections attracts a wider customer base and drives sales. By diversifying our product range, which includes CCTV cameras, TVs, monitors and touch panels, we will gain market recognition as a security systems and electronics brand in the market. For this purpose, we plan to set up display centre in Ahmedabad, Gujarat through the proceeds of this Issue. However, in order to stock this expanded inventory, we need to increase our working capital to maintain optimal inventory levels.

The rationale behind the increased working capital requirements resulting from the establishment of the display centre as part of the Company's expansion strategy lies in several key factors:

1. **Diversification of Product Range:** By expanding into televisions, touch panels and monitors of different specifications and sizes, the Company requires a larger inventory to adequately showcase and supply these range of products, thereby increasing the working capital tied up in inventory.
2. **Market Penetration and Brand Visibility:** The display centre serves as a platform to enhance the Company's brand visibility and penetrate new markets. However, achieving these objectives requires substantial marketing and promotional efforts, which entail upfront investments in advertising, promotions, and other marketing activities, thereby impacting working capital requirements.
3. **Operational Costs of Running the Display centre:** Operating a display centre involves various ongoing expenses, including utilities, salaries for staff, maintenance, and security. These operational costs add to the Company's overhead expenses, necessitating sufficient working capital requirements.

4. **Infrastructure and Technology Investments:** Setting up and equipping the display centre with adequate infrastructure and technology, including furniture, display tables, etc will require upfront investments. These investments will also contribute to the overall increase in working capital requirements.
5. **Cash Flow Considerations:** Expanding into our existing product line and establishing a display centre entails cash outflows for various purposes, including inventory procurement, store setup, marketing, and operational expenses. Managing cash flow effectively is crucial to ensuring liquidity and covering expenses without compromising the Company's ability to meet its financial obligations.
6. **Market Dynamics and Seasonal Variations:** Sales of electronic items, including televisions and touch panels, are subject to seasonal fluctuations and market dynamics. Anticipating these variations and maintaining adequate working capital reserves to address fluctuations in demand is essential for sustaining operations and optimizing sales performance throughout the year.
7. **Competitive Positioning and Growth Opportunities:** The establishment of a display centre strengthens the Company's competitive positioning and creates opportunities for long-term growth and profitability. However, realizing these growth opportunities requires prudent financial management and sufficient working capital to support the expansion initiatives effectively.

In conclusion, the rationale for the increased working capital requirements resulting from the establishment of the display centre stems from the strategic objectives of product diversification, market expansion, brand visibility, operational sustainability, technological investments, cash flow management, and capitalizing on growth opportunities.

To grow sustainably it is important that the products are priced competitively to our customers. To achieve competitive pricing, we need to source it at right price which is possible only when supplier credit terms are shorter. We intend to bring down the supplier's credit days to as low as 20 days which would help us to command competitive pricing from our suppliers.

Shorter payment terms are vital to securing products at competitive prices. By reducing vendor payable days, we can negotiate better terms with suppliers, ensuring we can offer more attractive prices to our customers. Through all such initiatives as described above, will increase our working capital requirements.

Utilization of Fund Raise

A portion of the net proceeds from the fund raise will be dedicated to funding our working capital requirements, including inventory expansion and the reduction of vendor payable days. By investing in working capital, we are strengthening our ability to seize growth opportunities, optimize our inventory, and maintain competitive pricing, ultimately benefiting our customers and shareholders.

As on May 24, 2024, the Company has an order book of ₹ 3,174.79 lakhs in hand to be executed during the next 6 months. In summary, the need for a higher working capital post the fund raise is rooted in the strategic growth initiatives. As we expand into premium product categories, widen the product ranges, enter new markets, and negotiate more favourable supplier terms, a robust working capital position becomes essential to fuel these endeavour's effectively. The fund raise is a strategic move that ensures we have the financial capacity to meet these requirements and continue delivering value to the customers while driving sustainable growth for the company.

The table below sets forth the details of holding levels (in days) for Fiscal 2022, Fiscal 2023, Fiscal 2024 as well as projections for Fiscal 2025

Particulars	Actual March 31, 2022	Actual March 31, 2023	Actual March 31, 2024	Estimate March 31, 2025
Debtors (in days)	14	77	69	50
Creditors (in days)	27	41	47	20
Inventory (in days)	170	113	123	142

Justification for "Holding Period" levels derived from our Restated Financial Statements

Particulars	Justification
Inventory days	The Company has inventory days of around 113-123 days in Fiscal 2023 and Fiscal 2024. From Fiscal 2025 the Company has estimated Inventory to be around 142 days since the Company is planning to

Particulars	Justification
	expand its current product lines. Also, to take the advantage of discounts or favourable pricing, company will be required to make bulk purchase resulting into increase in inventory. The higher inventory days is also because the Company is expanding into retail and wholesale market by opening a display centre by the end of August 2024 which will result in more inventory at the display centre.
Trade Receivables	The holding levels of trade receivables were between 69-77 days in Fiscal 2023 and Fiscal 2024. From the current Fiscal 2025 the average days will be around 50 days as due to the setting up of the display centre. The Company will start selling to the retail customers with immediate payment terms. This significant change will reduce the average holding period of the Debtors and infuse cashflow in the Company to pay off the real time operating expenses.
Trade Payables	Combination of lesser credit terms and increased business volume to product suppliers will help us to get better price from them. This would enable us to offer competitive price to our customers. The Trade payables in Fiscal 2024 was average 47 days and expecting to keep payables as low as 20 days by Fiscal 2025 to negotiate better rates with the supplier. The working capital gap has increased due to this significant change in the Company's trade payable policy.
Short Term Loan & Advances	This includes mostly advances given to employees and TDS receivable and other statutory receivables. Since Company is expanding its business there will be increase in short term loan & advances along with gradual increase in advance to employees and statutory receivables. As the business expands relatively GST Input credits will also increase.
Other Current Assets	Other current assets relate to advance to suppliers and other prepaid expenses. To procure the raw materials at competitive prices and to get the discount, the Company will have to make advance payment to its suppliers.
Short Term Provisions	Short Term provisions majorly includes Income tax payable (net of Advance tax and TDS) and current portion of the gratuity provision made. Since business is growing, we have allocated reserve fund for liabilities related to taxes, and other such regulatory compliances.
Short Term borrowings	This includes Cash Credit facilities availed from bank, Secured loans repayable on demand from bank and principal repayment of the respective current year's Term Loans availed by the company. The sanctioned cash credit facility by Bank is Rs. 587.00 Lacs which is renewable every year.
Other Current Liabilities	Other current liabilities include statutory dues and taxes payable like GST, Profession Tax, Provident Fund, TDS, etc. This also related majorly to advances received from customers against the supply of products as part of the Company's policy to minimize the risk of bad debts and cancellation of orders. This figure is expected to gradually increase due to increase in size of overall business of the company.

SECTION VI – ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this chapter has been extracted from the websites of and publicly available documents from various sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with this Issue has independently verified the information provided in this chapter. Industry sources and publications, referred to in this chapter, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL ECONOMIC OVERVIEW

The baseline forecast is for the world economy to continue growing at 3.2 percent during 2024 and 2025, at the same pace as in 2023. A slight acceleration for advanced economies, where growth is expected to rise from 1.6 percent in 2023 to 1.7 percent in 2024 and 1.8 percent in 2025 will be offset by a modest slowdown in emerging market and developing economies from 4.3 percent in 2023 to 4.2 percent in both 2024 and 2025. The forecast for global growth five years from now at 3.1 percent is at its lowest in decades. Global inflation is forecast to decline steadily, from 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025, with advanced economies returning to their inflation targets sooner than emerging market and developing economies. Core inflation is generally projected to decline more gradually.

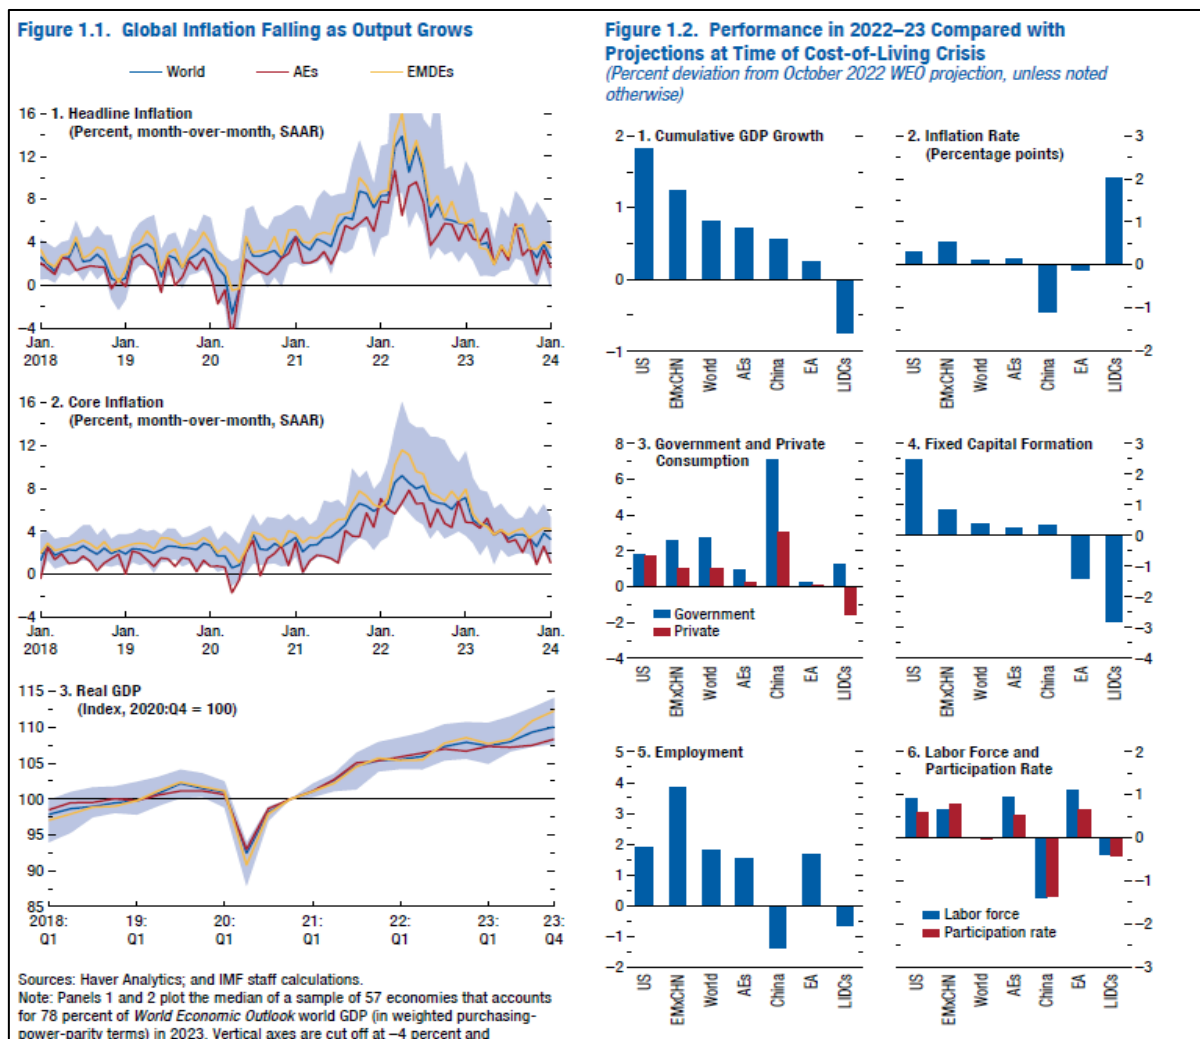

The global economy has been surprisingly resilient, despite significant central bank interest rate hikes to restore price stability. The pace of convergence toward higher living standards for middle- and lower-income and causing target undershoots. At the same time, as central banks take a less restrictive stance, a renewed focus on implementing medium-term fiscal consolidation to rebuild room for budgetary maneuver and priority investments, and to ensure debt sustainability, is in order. Cross-country differences call for tailored policy responses. Intensifying supply-enhancing countries has slowed, implying a persistence in global economic disparities. Risks to the global outlook are now broadly balanced. On the downside, new price spikes stemming from geopolitical tensions, including those from the war in Ukraine and the conflict in Gaza and Israel, could, along with persistent core inflation where labour markets are still tight, raise interest rate expectations and reduce asset prices. A divergence in disinflation speeds among major economies could also cause currency movements that put financial sectors under pressure. High interest rates could have greater cooling effects than envisaged as fixed-rate mortgages reset and households contend with high debt, causing financial stress.

Global economy remains resilient despite uneven growth.

The global economy remains remarkably resilient, with growth holding steady as inflation returns to target. The journey has been eventful, starting with supply-chain disruptions in the aftermath of the pandemic, a Russian-initiated war on Ukraine that triggered a global energy and food crisis, and a considerable surge in inflation, followed by a globally synchronized monetary policy tightening. Yet, despite many gloomy predictions, the world avoided a recession, the banking system proved largely resilient, and major emerging market economies did not suffer sudden stops. Moreover, the inflation surge—despite its severity and the associated cost-of-living crisis—did not trigger uncontrolled wage-price spirals. Instead, almost as quickly as global inflation went up, it has been coming down. On a year-over-year basis, global growth bottomed out at the end of 2022, at 2.3 percent, shortly after median headline inflation peaked at 9.4 percent. According to our latest projections, growth for 2024 and 2025 will hold steady around 3.2 percent, with median headline inflation declining from 2.8 percent at the end of 2024 to 2.4 percent at the end of 2025. Most indicators point to a soft landing. Markets reacted exuberantly to the prospect of central banks exiting from tight monetary policy. Financial conditions eased, equity valuations soared, capital flows to most emerging market economies excluding China have been buoyant, and some low-income countries and frontier economies regained market access there will be less economic scarring from the pandemic—the projected drop in output relative to prepandemic projections—for most countries and regions, especially for emerging market economies, thanks in part to robust employment growth. Astonishingly, the US economy has already surged past its prepandemic trend.

Resilient growth and faster disinflation point toward favorable supply developments, including the fading of earlier energy price shocks, the striking rebound in labor supply supported by strong immigration flows in many advanced economies. Decisive monetary policy actions, as well as improved monetary policy frameworks, especially in emerging market economies, have helped anchor inflation expectations. However, the transmission of monetary policy may have been more

mutated this time around in countries such as the United States, where an increased share of fixed-rate mortgages and lower household debt levels since the global financial crisis may have limited the drag on aggregate demand up to now.

Despite these welcome developments, numerous challenges remain, and decisive actions are needed. First, while inflation trends are encouraging, we are not there yet. Somewhat worryingly, the most recent median headline and core inflation numbers are pushing upward. This could be temporary, but there are reasons to remain vigilant. Most of the progress on inflation came from the decline in energy prices and goods inflation below its historical average. The latter has been helped by easing supply-chain frictions, as well as by the decline in Chinese export prices. But services inflation remains high sometimes stubbornly so and could derail the disinflation path. Bringing inflation down to target remains the priority. Second, the global view can mask stark divergence across countries. The exceptional recent performance of the United States is certainly impressive and a major driver of global growth, but it reflects strong demand factors as well, including a fiscal stance that is out of line with long-term fiscal sustainability. This raises short-term risks to the disinflation process, as well as longer-term fiscal and financial stability risks for the global economy since it risks pushing up global financing costs. Something will have to give in the euro area, growth will pick up this year, but from very low levels, as the trailing effects of tight monetary policy and past energy costs, as well as planned fiscal consolidation, weigh on activity. Continued high wage growth and persistent services inflation could delay the return of inflation to target. However, unlike in the United States, there is scant evidence of overheating and the European Central Bank will also need to carefully calibrate the pivot toward monetary easing to avoid an excessive growth slowdown and inflation undershoot. While labor markets appear strong, that strength could prove illusory if European firms have been hoarding labor in anticipation of a pickup in activity that does not materialize.

Disinflation amid Economic Resilience

Economic activity was surprisingly resilient during the global disinflation of 2022-23. Growth in employment and incomes has held steady as favorable demand and supply developments have supported major economies, despite rising central bank interest rates aimed at restoring price stability. As inflation converges toward target levels and central banks pivot toward policy easing, a tightening of fiscal policies aimed at curbing high government debt levels, with higher taxes and lower

government spending, is expected to weigh on growth. The pace of expansion is also expected to remain low by historical standards as a result of factors including the long-term consequences of the COVID-19 pandemic, Russia's invasion of Ukraine, weak growth in productivity, and increasing geoeconomics fragmentation.

In late 2023, headline inflation neared its prepandemic level in most economies for the first time since the start of the global inflation surge. In the last quarter of 2023, headline inflation for advanced economies was 2.3 percent on a quarter-over-quarter annualized basis, down from a peak of 9.5 percent in the second quarter of 2022. For emerging market and developing economies, inflation was 9.9 percent in the last quarter of 2023, down from a peak of 13.7 percent in the first quarter of 2022, but this average was driven by high inflation in a few countries; for the median emerging market and developing economy, inflation declined to 3.9 percent. This progress notwithstanding, inflation is not yet at target in most economies.

As global inflation descended from its peak, economic activity grew steadily, defying warnings of stagflation and global recession. During 2022 and 2023, global real GDP rose by a cumulative 6.7 percent. That is 0.8 percentage point higher than the forecasts made at the time of the October 2022 World Economic Outlook (WEO). The United States and several large emerging market and middle-income economies displayed the greatest overperformance, with aggregate demand supported by stronger-than-expected private consumption amid still-tight—though easing—labor markets.

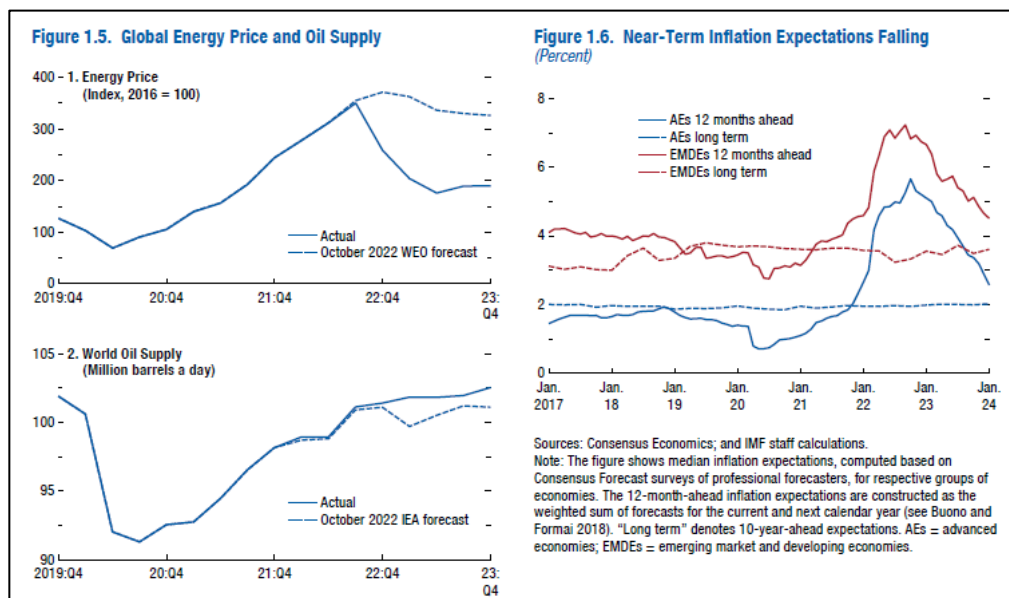

Households in advanced economies supported their spending by drawing down accumulated pandemic-era savings. Larger-than-expected government spending further supported the expansion of aggregate demand in most regions. The overall budgetary stance measured by the structural fiscal balance was more expansionary than expected, on average. Among large economies, the additional budgetary support, compared with October 2022 WEO forecasts, was estimated at 2 percent of GDP in the United States and 0.2 percent of GDP in the euro area, whereas in China,¹ the fiscal stance was mildly tighter than expected, by 0.7 percent of GDP. The euro area also displayed the smallest upside growth surprise, reflecting weak consumer sentiment and the lingering effects of high energy prices.

In parallel, global headline inflation declined broadly in line with expectations, averaging just 0.1 percentage point more than predicted in the October 2022 WEO for 2022 and 2023. However, in lower-income countries, inflation was on average higher than expected, reflecting cases in which pass-through into domestic prices from international food, fuel, and fertilizer costs, as well as from currency depreciation, was greater than expected. Price pressures in some lower-income countries were significant. These factors also caused these economies to grow more slowly than expected, suggesting a negative supply shock. In China, inflation fell unexpectedly, with the decrease reflecting sharply lower domestic food prices and pass-through effects on underlying (core) inflation. The resilience in global economic activity was compatible with falling inflation thanks to a post pandemic expansion on the supply side.

A greater-than-expected rise in the labor force amid robust employment growth supported activity and disinflation in advanced economies and several large emerging market and middle-income economies. The labor force expansion reflected, in some economies, increased inflows of migrants, with faster growth in the foreign-born than in the domestic-born labor force since 2021 as well as higher labor force participation rates. Exceptions to this pattern include China, where labor market weakness, in the context of subdued demand, was broad based across sectors, and lower-income countries, where supply-side challenges held job creation back.

Inflation (and Expectations) in Decline

The fall in headline inflation since 2022 reflects the fading of relative price shocks—notably those to energy prices—as well as lower core inflation. The decline in energy prices reflects not only increased global energy supply, but also the effects of tight monetary policies. The monetary tightening by central banks in major advanced economies during 2022–23 may have contributed strongly to lowering energy prices owing to its high degree of synchronization and the associated effect on curbing world energy demand.

Core inflation has declined as a result of the fading of effects of pass-through from past shocks to headline inflation, as well as because labor market pressures have eased. Pass-through effects include the effects of past relative price shocks notably those to the price of energy and supply shifts in various industries on prices and costs in other industries through supply-chain inputs and wage demands. Near-term inflation expectations are an important pass-through channel because of their implications for both wage and price setting and have declined toward target levels in both advanced economies and emerging market and developing economies, although measures of financial-market-based inflation expectations have recently shown signs of a pickup in the US. Longer-term inflation expectations have remained anchored, despite the string of large shocks since 2020 with decisive communication and action by central banks safeguarding the credibility of their inflation targets and contributed little to recent movements in core inflation.

Labor markets remain tight, especially in the United States, but the recent decline in the ratio of vacancies to the number of unemployed people amid a rise in unemployment rates suggests an easing across several economies. Nominal wage growth has generally remained contained in advanced economies since 2022, especially in the euro area, implying a moderation in real (inflation-adjusted) wages. Real wages are now close to or slightly below the level they were on before the pandemic in these economies. Wage-price spirals in which prices and wages accelerate together for a sustained period have generally not taken hold. Nevertheless, wages at the bottom of the wage distribution have risen faster than the average since the start of the pandemic, compressing the distribution. The roles of these factors in reducing core inflation have diverged across major economies. IMF staff analysis suggests that the rapid fading of pass-through from past relative price movements—in particular from energy price shocks—has played a larger role in the euro area and the United Kingdom than in the United States in reducing core inflation (the staff's methodology was the same as that used in Dao and others 2023). In the United States, labor market tightness and, more broadly, strong macroeconomic conditions, which partly reflect the effects of earlier fiscal stimulus as well as strong private consumption, are the main source of remaining upward pressure on underlying inflation. In the United Kingdom, labor market tightness predating the pandemic may partly explain why inflation has been higher than in the US or euro area following the onset of the pandemic. Accordingly, IMF staff estimates of the gap between actual and potential output levels in 2023 are positive for the United States, at 0.7 percent, and negative for the euro area and for the United Kingdom, at -0.3 percent.

The Outlook: Steady Growth and Disinflation

Latest projections are for the global economy to continue growing at a similar pace as in 2023 during 2024–25 and for global headline and core inflation to decline steadily. There is little change in the forecast for global growth since the January 2024 WEO Update, with some adjustments for major economies including a further strengthening in the projection for the United States, offset by modest downward revisions across several other economies. The forecast for global growth remains higher, however, than in the October 2023 WEO. The outlook for inflation is broadly similar to that in the October 2023 WEO, with a downward revision for advanced economies, offset by an upward revision for emerging market and developing economies. Medium-term prospects for growth in world output and trade remain the lowest in decades, with

the pace of convergence toward higher living standards slowing for middle- and lower-income countries. The baseline forecasts for the global economy are predicated on a number of projections for global commodity prices, interest rates, and fiscal policies.

- **Commodity price projections:** As explained in the Commodity Special Feature in this chapter, prices by, on average, 9.7 percent, with oil prices falling by about 2.5 percent. The decreases reflect abundant spare capacity and strong non-OPEC+ (Organization of the Petroleum Exporting Countries plus selected nonmember countries, including Russia) supply growth. Coal and natural gas prices are expected to continue declining from their earlier peaks, by 25.1 percent for coal and 32.6 percent for natural gas in 2024, with the gas market becoming increasingly balanced on account of fuel commodities are projected to fall in 2024 new supply, dampened demand, and high storage levels. The forecast for nonfuel commodity prices is broadly stable in 2024, with prices for base metals expected to fall by 1.8 percent, on account of weaker industrial activity in Europe and China. Food commodity prices are predicted to decline by 2.2 percent in 2024. Compared with those in the January 2024 WEO Update, forecasts for food prices have been revised slightly downward, driven by expectations of abundant global supplies for wheat and maize.
- **Monetary policy projections:** With inflation projected to continue declining toward targets and longer-term inflation expectations remaining anchored, policy rates of central banks in major advanced economies are generally expected to start declining in the second half of 2024. Among major central banks, by the fourth quarter of 2024, the Federal Reserve's policy rate is expected to have declined from its current level of about 5.4 percent to 4.6 percent, the Bank of England to have reduced its policy rate from about 5.3 percent to 4.8 percent, and the European Central Bank to have reduced its short-term rate from about 4.0 percent to 3.3 percent. For Japan, policy rates are projected to rise gradually, reflecting growing confidence that inflation will sustainably converge to target over the medium term despite Japan's history of deflation.

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

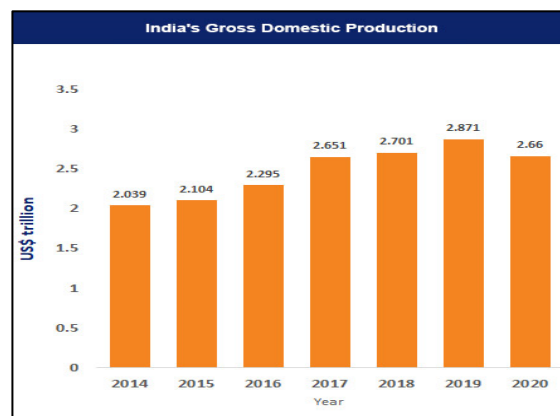

Market Size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its

energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritize lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- As of April 12, 2024, India's foreign exchange reserves stood at US\$ 643.162 billion.
- In 2023, India saw a total of US\$ 49.8 billion in PE-VC investments.
- Merchandise exports in March 2024 stood at US\$ 41.68 billion, with total merchandise exports of US\$ 437.06 billion during the period of April 2023 to March 2024.
- India was also named as the 48th most innovative country among the top 50 countries, securing 40th position out of 132 economies in the Global Innovation Index 2023. India rose from 81st position in 2015 to 40th position in 2023. India ranks 3rd position in the global number of scientific publications.
- In March 2024, the gross Goods and Services Tax (GST) stood at second highest monthly revenue collection at Rs.1.78 lakh crore (US\$ 21.35 billion), of which CGST is Rs. 34,532 crore (US\$ 4.14 billion), SGST is Rs. 43,746 crore (US\$ 5.25 billion).

- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 5.69% in December 2023.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 8.06 billion) in India during January-April 2024.
- The wheat procurement during RMS 2023-24 (till May) was estimated to be 262 lakh metric tonnes (LMT) and the rice procured in KMS 2023-24 was 385 LMT. The combined stock position of wheat and rice in the Central Pool is over 579 LMT (Wheat 312 LMT and Rice 267 LMT).

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDIAN ELECTRONICS SYSTEM DESIGN & MANUFACTURING INDUSTRY

Introduction

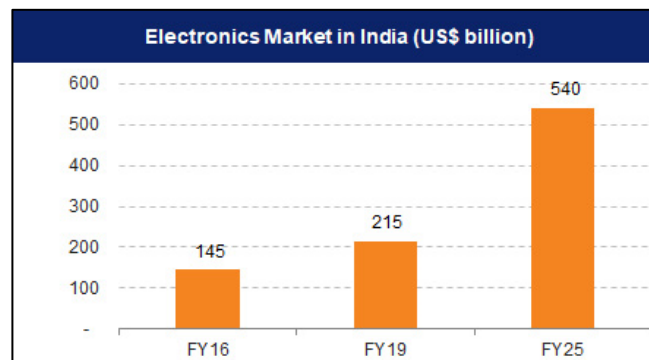

The Indian electronics system design and manufacturing (ESDM) sector is one of the fastest growing sectors in the economy and is witnessing a strong expansion in the country. The ESDM market in India is well known internationally for its potential for consumption and has experienced constant growth. Indian manufacturers are attracting the attention of multinational corporations due to shifting global landscapes in electronics design and manufacturing capabilities, as well as cost structures. Companies from all over the world are striving to develop local capacities in India not only to serve the domestic market but also to cater to international markets.

The Electronics System Design & Manufacturing (ESDM) industry includes electronic hardware products and components relating to information technology (IT), office automation, telecom, consumer electronics, aviation, aerospace, defence, solar photovoltaic, nano electronics and medical electronics. The industry also includes design-related activities such as product designing, chip designing, Very Large-Scale Integration (VLSI), board designing and embedded systems.

India witnessed a substantial spike in demand for electronic products in the last few years; this is mainly attributed to India's position as second-largest mobile phone manufacturer worldwide and surge in internet penetration rate. The Government of India attributes high priority to electronics hardware manufacturing, as it is one of the crucial pillars of Make in India, Digital India, and Start-up India programs.

The Electronics System Design & Manufacturing (ESDM) sector plays a vital role in the government's goal of generating US\$ 1 trillion of economic value from the digital economy by 2025. With various government initiatives aiming to boost domestic manufacturing, India has already started witnessing initial movement with increased production and assembly activities across products such as mobile phones and other consumer electronics.

Market Size

The Indian electronics manufacturing industry is projected to reach US\$ 520 billion by 2025. The demand for electronic products is expected to rise to US\$ 400 billion by 2025 from US\$ 33 billion in FY20. Electronics market has witnessed a growth in demand with market size increasing from US\$ 145 billion in FY16 to US\$ 215 billion in FY19—the market witnessed a growth of 14% CAGR from 2016-19. Electronics system market is expected to witness 2.3x demand of its current size (FY19) to reach US\$ 500 billion by FY25. The top products under the ESDM sector with the highest CAGR include IT/OA at 54%, followed by industrial electronics at 38% and automotive electronics at 10%.

In FY23, the imports of electronics goods stood at US\$ 73.46 billion, whereas exports stood at US\$ 22.68 billion. During April-October 2023, the imports of electronics goods stood at US\$ 51.33 billion and exports stood at US\$ 15.48 billion. Electronics design segment, growing at 20.1%, was 22% of the ESDM market size in FY19; it is anticipated to be 27% of the ESDM market size in FY25. India is one of the largest consumer electronics markets in the Asia Pacific Region and is home to considerable talent for electronic chip design and embedded software.

India has committed to reach US\$ 300 billion worth of electronics manufacturing and exports of US\$ 120 billion by 2025-26. Major Government initiatives such as 'Digital India', 'Make in India' and supportive policies including a favourable FDI Policy for electronics manufacturing have simplified the process of setting up manufacturing units in India. India is the second fastest digitizing economy amongst the 17 leading economies of the world. The Government of India aims to make Electronics Goods amongst India's 2-3 top-ranking exports by 2026. Electronics Goods exports are expected to increase from the projected US\$ 15 billion in 2021-22 to US\$ 120 billion by 2026.

Investments/ Developments

Major Government initiatives such as 'Digital India', 'Make in India' and supportive policies including a favorable FDI Policy for electronics manufacturing have simplified the process of setting up manufacturing units in India. Post-COVID, the Government of India aims to increase India's contribution by around US\$ 400 billion worth of electronics goods including exports worth US\$ 120 billion, which would account for 9-10% of the overall global value chains, from the current supply potential of 1-2%.

Union Budget 2023-24 has allocated Rs. 16,549 crore (US\$ 2 billion) for the Ministry of Electronics and Information Technology, which is nearly 40% higher on year. The budget for FY23 had allocated Rs. 14,300 crore (US\$ 1.73 billion) for the IT ministry. The Indian startup ecosystem is experiencing a surge over the years, due to rapid technological advancements, increasing internet penetration, growing digital infrastructure, rising startup culture, government initiatives like Digital India, Make in India, and Startup India, as well as a large pool of skilled workforce.

India has witnessed an exceptional surge in the creation and funding of startups as the country has solidified its position as a major global centre for innovation and businesses. However, securing adequate funding remains a significant task for startups, often leading to survival challenges.

In 2023, the funding scenario for tech startups turned bleak amid the global uncertainty, witnessing a 67% YoY plunge in total funding to US\$ 6.0 billion. This decline came after the peak funding levels observed in 2021 (US\$ 24.1 billion) and 2022 (US\$ 18.2 billion), where investors displayed confidence in Indian tech startups. In 2023, the number of deals declined to 824. However, the decline appears to be cyclical than a long-term trend. STPI Signs MoUs to strengthen tech startup ecosystem: AIC STPINEXT Initiatives (STPINEXT), a special purpose vehicle of Software Technology Parks of India (STPI), an organisation under the Ministry of Electronics and Information Technology (MeitY) has signed two memorandums of understanding (MoUs), one with HDFC Bank, and another with Excelpoint Systems India Pvt. Ltd., a niche technology player for fostering entrepreneurship and nurturing tech startups in the country. These partners would play a critical role in supporting and handholding the startups in the growth journey through technical guidance & assistance, mentoring, pitching to investors, funding support, and market connect & access etc.

Road Ahead

Local electronics design and production are being positively influenced by ongoing domestic consumption, changing dynamics in the global supply chain, and a plethora of policy initiatives to assist indigenous manufacturing in the current period is most advantageous. The smooth implementation of new initiatives and the reversal of restrictive laws will go a long way toward boosting international business confidence in India's business environment and attracting manufacturing investments. In India, Sony, Samsung, LG Electronics, Panasonic, and other companies are the market leaders in the ESDM sector. Government efforts are concentrated on bridging the digital gap. Projects like "Digital India," "Smart Cities," "ePanchayats," "National Optical Fiber Network," etc. enhanced consumer demand for electronic goods around the nation. India's middle class is rapidly expanding, which has improved the affordability of electronics products. The demand for electronic goods has increased as consumers' preferences for products and devices with smart technology (like smart LED TVs) and inventive designs have changed and disposable incomes have increased. The personal disposable income in India increased at a CAGR of 15.6% between FY07 and FY11, which is directly correlated with consumers' desire to spend money on electronics. Fueled by strong policy support, huge investments by public and private stakeholders and a spike in demand for electronic products, the ESDM sector in India has bright prospects ahead of it and is predicted to reach US\$ 220 billion by 2025, expanding at 16.1% CAGR between 2019-2025.

The financial statements are presented as per schedule III to Companies Act, 2013

b) Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements and the results of operations during the reporting periods. Although these estimates are based upon management's knowledge of current events and actions, actual results could differ from those estimates and revisions, if any, are recognised in the current and future periods.

c) Revenue Recognition

The Company follows the accrual method of accounting and all claims, receivable and liabilities are provided on that basis. All revenue is recognized on accrual basis except non-recruiting income is accounted otherwise.

Sale of goods

Sales are recognised, net of returns and trade discounts, on transfer of significant risks and rewards of ownership to the buyer. Sales excludes Goods & Service Tax

Revenue from sale of services is recognized net of goods and service tax and as and when the services are rendered.

Interest incomes/expenses are recognised using the time proportion method based on the rates implicit in the transaction

d) Property, Plant and Equipment

Property, plant and equipment are carried at cost less accumulated depreciation / amortisation and impairment losses, if any. The cost of Property, Plant and Equipment comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses.

e) Depreciation

i. Property, Plant & Equipment

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value.

Depreciation on tangible fixed assets has been provided on the written down value method as per the useful lives as prescribed in Schedule II to the Companies Act, 2013.

Assets	Estimated uselives
Plant & Machinery	15 Years
Furniture & Fixtures	10 Years
Factory Premises (Owned)	30 Years
Office Equipment	5 Years
Computers	
End User Eq. (Laptop, PC)	3 Years
Server & Network	6 Years
Motor Vehicles	8 Years

ii. Intangible Assets

Intangible Assets are stated at acquisition cost, net of accumulated amortization and accumulated impairment losses, if any. Intangible Assets are amortized on straight line basis over a period of five years being the estimated useful life.

Intangible asset are recognised as per Accounting Standard 26 Intangible Asset.

An intangible asset is recognised if and only if

- (a) it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise; and
- (b) the cost of the asset can be measured reliably.

f) Inventories

Inventories are valued at the lower of cost and the net realisable value after providing for obsolescence and other losses, where considered necessary. Cost is generally determined on weighted average basis except for inventory segregated for a specific order / project, in which case it is valued at their specific costs of purchase. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges.

g) Foreign currency transactions

Initial recognition:

Transactions in foreign currencies entered into by the Company are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction.

Measurement at the balance sheet date:

Foreign currency monetary items (other than derivative contracts) of the Company, outstanding at the balance sheet date are restated at the year-end rates. Non-monetary items of the Company are carried at historical cost.

Treatment of exchange differences:

Exchange differences arising on settlement / restatement of foreign currency monetary assets and liabilities of the Company are recognised as income or expense in the Statement of Profit and Loss.

h) Employee benefits**Short-term employee benefits**

All employee benefits payable within twelve months of rendering the service are classified as short term benefits. Such benefits include salaries, wages, leave encashment, incentives etc. and the same are recognised in the period in which the employee renders the related service.

Defined contribution plans

The Company's contribution to provident fund is considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.

Defined benefit plans

For defined benefit plans in the form of gratuity (unfunded), the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost.

i) Taxation

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

j) Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

k) Borrowing costs

Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan.

l) Earnings per Share

Basic earnings per share is computed by dividing the profit/(loss) after tax (including the post tax effect of extra ordinary items, if any) by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed using the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares, if any.

m) Impairment of assets

The carrying values of assets/ cash generating units at each balance sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

n) Operating Cycle:

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current. As a result, current assets comprise elements that are expected to be realised within 12 months after the reporting date and current liabilities comprise elements that are due for settlement within 12 months after the reporting date.

o) Changes in Accounting Policies in the Periods/ Years Covered in the Restated Financials

There is only change in Significant Accounting Policies which needs to be adjusted in the Restated Summary Statements includes the impact of provision of gratuity made on actuarial valuation basis report.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”). The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued, issued the Consolidated FDI Policy Circular of 2020 (“**FDI Policy**”), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that: (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the SEBI SAST Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Issue shall be on the basis of the FEMA Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Nondebt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India.
