INTERNAL RISKS FACTORS

1. We are significantly dependent on the sale of our products namely, "Jaggery Powder". Inability to anticipate and adapt to evolving consumer preferences and demand for products or ensure product quality may adversely impact the demand for our products and customer loyalty and consequently impact our business, results of operations, financial condition and cash flows.

Our company initially started with the manufacturing of Jaggery Powder in the FY 2023-2024. Thereafter, our company entered the segment of value added food products of Jaggery based pre-mixes (Instant Rice Kheer, Jaggery Tea, Jaggery Laddoo, Jaggery Lapsi, and Jaggery Coffee premixes) during the FY 2024-2025. Thereafter, our company started the manufacturing of Khandsari Sugar during FY 2025-2026. Further during the same period our company also ventured into backward integration of cultivation and sale of Sugarcane Seeds ("Cane Seeds").

Our future business prospects are dependent on the demand for our products in Indian markets. Our financial performance is dependent primarily on the sale of our products i.e. Jaggery Powder, Khandsari Sugar, Jaggery-based pre-mix products, Cane seeds and "By Products".

The following table sets forth information on our product mix in the periods indicated:

Any decrease in demand for these products can have an adverse impact on our business, results of operations, financial conditions and cash flows. Further, any disruption in the supply chain for these products, such as delays in delivery or quality issues, may impact our ability to meet customer demand and result in loss of sales.

Demand for our products depends primarily on consumer-related factors such as regional or locality-based tastes, demographics, consumer confidence in our products by B2B and B2C Customers, as well as evolving consumer tastes and preferences. The tastes and preferences of our consumers may also change over time, and we cannot assure you that we will be able to adapt our product portfolio to shift in consumer preferences and tastes. We may also be required to invest in updated technology and processes to develop products having the desired qualities and characteristics and continually monitor and adapt to evolving market demand. Our failure to anticipate, identify or react to changes in these trends could, among other things, lead to reduced demand and price reductions, and could have an adverse effect on our business, results of operations, financial condition and cash flows. Additionally, we are subject to the preferences of consumers in the Indian market in relation to the characteristics, ingredient profile and range of our products. Factors that may affect consumer perception of our products include dietary trends and attention to certain nutritional aspects of foods. Our success depends, in part, on our ability to anticipate the tastes and dietary habits of consumers and to offer products that appeal to their needs and preferences on a timely and affordable basis. We may not be able to introduce new products that are in faster growing and more profitable categories.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

Due to the geographic concentration of the sale of our products in Maharashtra, Madhya Pradesh, Assam and Uttar Pradesh, our operations are susceptible to local and regional factors, such as economic, natural disasters, demographic changes and other unforeseen events and circumstances. Consequently, any significant social, political or economic disruption or natural calamities or civil disruptions in these regions or changes in policies of the state or local governments or the government of India or adverse developments related to competition in these regions, may adversely affect our business, results of operations, financial condition and cash flows.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

For further details in relation to Company's revenue from operations from various States of India, see the sub-head 'Geographical Sales' under the head 'Sales mix and Geographical presence' under the Chapter titled "Our Business" on page no. 173 of this Red Herring Prospectus.

Our Company is engaged in business of Manufacturing of "Jaggery Powder", "Khandsari Sugar", "Jaggery-based pre-mix products" "Cane seeds" and "By-Prodcuts". Few clients may represent a larger part of our customer portfolio, increasing the potential volatility of our results. We cannot assure you that we shall generate the same quantum of business, or any business at all and the loss of business from one or more of them may adversely affect our revenues and results of operations. However, the composition and revenue generated from these customers might change as we continue to add new customers in the normal course of business. While we believe that we shall not face challenges in finding new customers in the ordinary course of business, our results of operations and financial condition may be adversely affected if we remain dependent on few customers.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

For further details in relation to revenue from customers kindly refer to the head "Details of Top Ten Customers" in the Chapter titled 'Our Business' on page no. 174 of this Red Herring Prospectus.

4. Our manufacturing operations are seasonal in nature and any adverse change in sugarcane harvesting season may adversely affect our manufacturing setup including the number of days that our factory would be operational, which would adversely affect our total production, our business, results of operations, financial condition and cash flows.

Our manufacturing operations are dependent upon the availability of sugarcane and are seasonal in nature. The sugarcane crushing season generally commences during October-November and continues until April-May,

subject to climatic conditions, sugarcane availability, rainfall patterns, crop maturity and other agricultural factors. During the crushing season, harvested sugarcane is processed to manufacture our products. As sugarcane begins losing sugar content shortly after harvesting, timely availability and processing of sugarcane is critical to our operations.

Any delay in commencement of the crushing season, reduction in the duration of the crushing season, lower sugarcane availability, adverse weather conditions, inadequate rainfall, water scarcity, pest infestations, crop diseases, changes in cropping patterns or any other factors affecting sugarcane cultivation may adversely impact the quantity and quality of sugarcane available for processing. Such factors may result in reduced crushing season which would reduce the number of days that are factory would be operational and may adversely affect our total production, our business, results of operations, financial condition and cash flows.

The table showcasing the number of days factory was operational during the stub period and last three financial year is provided below:

FY	Period		No. of Days Operational
FY 2023-2024	15-10-2023	09-03-2024	146
FY 2024-2025	03-11-2024	13-02-2025	102

FY 2025-2026	*Crushing and Production for the FY 2026-27 has not yet started.		

Please find below the details of the installed capacity and its utilization:

Khandsari Sugar	NA	NA	NA	NA	NA	NA	7722.00	620.00	08.03	NA	NA	NA

As can be seen from the above table our company has experienced fluctuations in the number of days that our factory was operational during the stub period and the last three financial years, which led to fluctuation in total production of Jaggery Powder and Khandsari Sugar, we cannot assure you that these risks will not arise in the future.

Further, our operating results may fluctuate from period to period due to the seasonal nature of our business. A substantial portion of our manufacturing activities are undertaken during the crushing season and, accordingly, our revenues, profitability, production levels, working capital requirements and cash flows may vary significantly across reporting periods. As a result, the financial results of one reporting period may not be directly comparable with those of any preceding, succeeding or corresponding reporting period.

During periods when crushing operations are not undertaken, we may continue to incur various fixed and operating expenses, including employee costs, maintenance expenses, administrative expenses and other overhead costs, which may not reduce proportionately with the decline in production levels. Any inability to efficiently manage such costs during off-season periods may adversely affect our profitability and financial performance. While we have not experienced any of the aforementioned risks that had an adverse impact on our business operations and financial conditions during the stub period and the last three Financial Years, we cannot assure you that these risks will not arise in the future

For further details in relation to the "seasonal nature of our operations" and "our capacity buildup", kindly refer to the head tilted "Seasonal Nature of Operations" and head titled "our capacity and capacity utilization" in the Chapter titled 'Our Business' on page no. 165 and 187 of this Red Herring Prospectus.

5. Our Company has historically operated with a highly leveraged capital structure and has reported a significant Debt-Equity Ratio. Any inability to service, refinance or reduce our indebtedness may adversely affect our business, results of operations, financial condition and cash flows

Our Company's Debt-Equity ratio stood at 2.62 times, 3.59 times, 3.94 times 5.89 times as at stub period ended on July 31, 2026 and March 31, 2026, March 31, 2025 and March 31, 2024, respectively. Our indebtedness has primarily arisen on account of funding capital expenditure towards expansion of our manufacturing facilities, investment in plant and machinery and meeting substantial working capital requirements associated with the seasonal nature of our operations. Further, a portion of our borrowings comprises of unsecured loans obtained from our Promoters and related parties.

A significant level of indebtedness may expose our Company to various risks, including increased finance costs, restrictions under financing arrangements, reduced financial flexibility, limitations on our ability to obtain additional financing on favourable terms, and increased vulnerability to adverse economic, industry and market conditions. As of stub period ended on July 31, 2026, our finance costs aggregated ₹174.00 lakhs. Any increase in interest rates, tightening of credit markets, reduction in availability of banking facilities, withdrawal of unsecured financial support from Promoters or related parties or deterioration in our operating performance may adversely affect our ability to service our debt obligations.

Further, a substantial portion of our borrowings are secured by certain assets of our Company and/or supported by personal guarantees, collateral security or other credit support provided by our Promoters/Directors and their relatives. Any default in repayment of principal, interest or other obligations under our financing arrangements could result in acceleration of repayment obligations, enforcement of security interests, invocation of guarantees, restrictions on our operations, damage to our reputation and adverse impacts on our financial condition and cash flows.

Although a portion of the Net Proceeds of the Issue is proposed to be utilised towards repayment and/or prepayment of certain borrowings, there can be no assurance that we will not require additional indebtedness in the future to support our business growth, capital expenditure programmes or working capital requirements.

Accordingly, any inability to effectively manage our indebtedness or maintain an optimal capital structure could have a material adverse effect on our business, results of operations, financial condition and cash flows.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

For details with respect to the Indebtedness of our Company, see the Chapter titled "Financial Indebtedness" beginning on page no. 296 of this Red Herring Prospectus.

6. During Stub period ended July 31, 2026, and Financial Years 2025-2026, 2024-2025 and 2023-2024, Purchase of Raw material i.e., Sugarcane accounted for NA, 49.01%, 45.61% & 139.63%, of our revenue from operations, respectively. Inadequate or interrupted supply and price fluctuation of raw material could adversely affect our business, results of operations, cash flow and financial condition.

The primary raw material for our business is Sugarcane. Sugarcane is subject to price volatility and unavailability caused by external conditions, such as commodity price fluctuations within India and globally, weather conditions, supply and demand dynamics, logistics, our bargaining power with the suppliers, inflation and governmental regulations and policies.

The following table sets forth information w.r.t. purchase of Sugarcane during the periods indicated:

Note:
[1] Our Company generated revenue only for a period of 4-5 months during FY 2023-2024. However, our Company generated revenue for 12 months each during FY 2024-2025 & 2025-2026. Thus, the consumption of Raw Material as a percentage of Revenue from operations for FY 2023-2024 is not comparable with FY 2024-2025 & FY 2025-2026.
[2] Harvesting season did not commence till July 31, 2026.

The absence of any long-term supply arrangements with our suppliers/farmers exposes us to the price volatility of raw material. Unexpected increase in the price of the raw material may adversely affect our business, results of operations, financial condition and cash flow. In addition, we do not have a formal hedging policy and do not undertake hedging on any commodity futures platform. If we are unable to manage these costs or to increase the prices of our products to offset these increased costs, our business, results of operations, financial condition and cash flows may be adversely affected.

The sugarcane is a seasonal crop. Primarily the sugarcane crop is grown as a long-duration crop, planted during the spring (February-April) and/or autumn (September-October) seasons and harvested after 10 to 18 months, depending on the variety and climatic conditions. It is a highly versatile and adaptable crop, but its cultivation is tied to specific seasonal conditions, particularly water availability, rainfall and temperature, making it a seasonal

crop globally, not just in India. The primary impact of seasons on the business is pricing in relation to the procurement of the sugarcane, which may have an adverse effect on our business, results of operations, financial condition and cash flows.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

For further details in relation to raw material consumed kindly refer to the head "Raw Materials" in the Chapter titled 'Our Business' on page no. 176 of this Red Herring Prospectus.

7. We are dependent on harvesting and transportation contractors for the timely harvesting and delivery of sugarcane to our manufacturing facility. Any disruption in harvesting and transportation services may adversely affect our business, results of operations, financial condition and cash flows.

Our Company procures its primary raw material, sugarcane, directly from farmers located in the vicinity of our manufacturing facility. Prior to each crushing season, we enter into seasonal arrangements with harvesting and transportation contractors for harvesting of sugarcane and transportation of the harvested crop to our factory premises. Accordingly, our ability to procure sugarcane in a timely manner is dependent upon the availability and performance of such harvesting and transportation contractors.

Sugarcane begins losing its sugar content shortly after harvesting and therefore requires timely harvesting and transportation to ensure optimum recovery and efficient production. Any delay, interruption or disruption in harvesting and transportation activities due to shortage of labour, non-availability of transportation vehicles, disputes with contractors, strikes, accidents, adverse weather conditions, fuel shortages, increase in transportation costs, regulatory restrictions or any other unforeseen circumstances may adversely affect the timely procurement of sugarcane and impact our manufacturing operations.

The data relating to expenses incurred by our company on procurement of raw material for the stub period and last 3 financial years are provided hereunder:

Expense	For the period ended July 31, 2026 [2]		FY 2025-2026		FY 2024-2025		FY 2023-2024	
	₹ in Lakhs	% of Revenue from operations	₹ in Lakhs	% of Revenue from operations	₹ in Lakhs	% of Revenue from operations	₹ in Lakhs	% of Revenue from operations
Harvesting and Transportation (H &T) Expense	-	-	1,447.76	19.23	867.72	14.82	1,568.45	43.24

Note:
(1) Our Company generated revenue only for a period of 4-5 months during FY 2023-2024. However, our Company generated revenue for 12 months each during FY 2024-2025 & 2025-2026. Thus, the consumption of Harvesting and Transportation (H &T) Expense as a percentage of Revenue from operations for FY 2023-2024 is not comparable with FY 2024-2025 & FY 2025-2026.
[2] Harvesting season did not commence till July 31, 2026.

Further, we cannot assure you that harvesting and transportation contractors will continue to provide their services on commercially acceptable terms or at all. Any significant increase in harvesting and transportation charges may increase our procurement costs, which we may not be able to pass on to our customers. In addition, any inability to engage adequate harvesting and transportation contractors during the crushing season may result in interruption in the supply of sugarcane, lower sugar recovery, reduced production levels and delays in meeting our operational requirements.

Further, a substantial portion of the sugarcane supplied to our manufacturing facility is sourced from rural and village areas where transportation infrastructure may be limited. Any deterioration in road connectivity, transportation networks, communication systems or other public infrastructure may disrupt the movement of sugarcane to our factory premises and adversely affect our operations. Any such disruption in harvesting and transportation services may have a material adverse effect on our business, results of operations, financial condition and cash flows.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

For further details in relation to procurement of raw materials and harvesting and transportation arrangements, kindly refer to the head "Procurement Process for Raw Materials" in the chapter titled 'Our Business' on page no. 176 of this Red Herring Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business, results of operations, financial condition and growth.

For further details in relation to the cashflow, see Annexure III titled "Restated Statement of Cashflow" under Chapter titled 'Restated Financial Information' beginning on page no. 243 of this Red Herring Prospectus.

Further, as our business continues to grow, there can be no assurance that similar inadvertent instances of non-compliance with applicable statutory or regulatory requirements will not occur in the future. Consequently, it may divert the attention of our Promoters & Directors and use our Company's resources and accordingly, we may incur significant expenses in such proceedings. The said proceedings may also require us to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations. Further, in addition to that, there could be other litigations & claims filed against our Company, Promoters, Directors, Key Managerial Personnels, Senior Managerial Personnel, Group Companies and Subsidiary Companies which our Company may not be aware of as on the date of this Red Herring Prospectus.

Further, there have been no defaults or re-scheduling/ re-structuring in relation to borrowings availed by our Company from any banks and/or financial institutions during the stub period and last three Financial Years. Further, we are susceptible to changes in interest rates and the risks arising therefrom. Certain of our financing agreements, the lenders are entitled to charge the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread.

For details with respect to the secured borrowings, see the Chapter titled "Financial Indebtedness" beginning on page no. 296 of this Red Herring Prospectus.

12. Our Company has borrowings re-payable on demand and if the said funds are demanded for repayment at any point in time and our Company is not in a position to arrange for the interim funds to make such repayments or for meeting its working capital, this may have an adverse effect on our business, results of operations, financial condition and cash flows.

The said borrowing re-payable on demand as on stub period ended on July 31, 2026 constitutes cash credit to the extent of ₹ 353.99 lakhs and other loans availed from the directors to the extent of ₹ 2,544.71 lakhs. The same is availed for the purpose of meeting the working capital requirements of our Company. If the said funds are demanded for repayment at any point in time and our Company is not in a position to arrange for the interim funds to make such repayments or for meeting its working capital, this may have an adverse effect on our business, results of operations, financial condition and cash flows.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

For details with respect to the loan repayable on demand, see the chapter titled "Financial Indebtedness" beginning on page no. 296 of this Red Herring Prospectus.

13. Our Company has in the past taken unsecured borrowings re-payable on demand from our Directors and (a) if the said funds are demanded for repayment at any point in time and our Company is not in a position to arrange for the interim funds to make such repayments or for meeting its working capital, (b) if such unsecured loans are not made available to our company from our directors in the future; this may have an adverse effect on our business, results of operations, financial condition and cash flows.

(a) if the said funds are demanded for repayment at any point in time and our Company is not in a position to arrange for the interim funds to make such repayments or for meeting its working capital, (b) if such unsecured loans are not made available to our company from our directors in the future; this may have an adverse effect on our business, results of operations, financial condition and cash flows.

For details with respect to the unsecured loans, see the Chapter titled "Financial Indebtedness" beginning on page no. 296 of this Red Herring Prospectus.

14. The significant increase in our Profit After Tax ("PAT") margin in recent fiscals may not be sustainable and any inability to maintain our profitability levels could adversely affect our business, results of operations and financial condition.

Our PAT margin has increased from 8.49% in Fiscal 2024 to 9.39% in Fiscal 2025 and further to 15.40% in Fiscal 2026. The improvement in our profitability has been driven by factors such as higher revenue from operations, improved operating leverage, increased capacity utilisation, changes in product mix, better absorption of fixed costs, operational efficiencies and a reduction in finance costs during Fiscal 2026. However, there can be no assurance that we will be able to sustain such levels of profitability in future periods.

There can be no assurance that we will be able to maintain such margins in future periods. Our future profitability is subject to numerous factors beyond our control, including fluctuations in sugarcane availability and procurement costs, changes in demand for our jaggery powder and value-added products, pricing pressure from customers and competitors, changes in product mix, adverse movements in inventory values, increases in employee, logistics, manufacturing and finance costs, withdrawal or reduction of government incentives or subsidies, and changes in regulatory requirements. Our finance costs have historically increased with the growth of our operations and borrowings, and any inability to achieve corresponding growth in revenues or operating efficiencies may adversely impact our profitability.

Any increase in our borrowing levels, interest rates or working capital requirements may result in higher finance costs in future periods, which could adversely impact our profits and margins. Our business is also working capital intensive and requires significant funding for procurement of sugarcane and maintenance of inventory.

Further, our operations are seasonal in nature and fluctuations in production volumes, capacity utilisation, inventory levels, customer demand, product mix and realization prices may adversely affect our operating performance. If our revenue growth does not keep pace with increases in costs or if we are unable to maintain operational efficiencies achieved in recent periods, our PAT margin may decline. As a result, our historical growth in profitability and PAT margin may not be indicative of our future performance, and any decline in profitability may adversely affect our business, cash flows, results of operations and financial condition.

15. One of our Promoter holds a position in a political organization and any adverse developments relating to his public or political activities, or any perception thereof, may adversely affect our reputation, business and the market price of our Equity Shares.

One of our Promoter, Mr. Dattatray Kashinath Kulkarni, who is also our Executive Director and Chief Financial Officer, presently holds the position of the "President" of Bharatiya Janata Party (BJP) for Dharashiv District, since June 2, 2025. While our Company's business operations are conducted independently of any political affiliation, public perception of our Company may be influenced by the activities, statements, decisions or reputation associated with our Promoter in his political capacity.

Any actual or perceived controversy, adverse publicity, political disputes, allegations, investigations, changes in political affiliations, conflicts of interest, or other developments involving our Promoter's political activities, irrespective of whether such matters are directly related to our Company or its operations, could adversely affect the reputation of our Company and our management. Such developments may also result in negative media

coverage, increased public scrutiny, customer concerns, supplier apprehensions, employee dissatisfaction or adverse investor sentiment. Further such developments could also affect our relationships with customers, suppliers, lenders, regulatory authorities and other stakeholders. There can be no assurance that such events, if they occur, will not result in reputational harm or adversely impact our ability to conduct business on favorable terms.

In addition, market participants may associate the value of our Equity Shares with the reputation and public standing of our Promoters. Accordingly, any adverse developments relating to our Promoter's political activities or public profile may negatively affect investor confidence and could lead to volatility in, or a decline in, the market price and liquidity of our Equity Shares.

However, our Company commenced deduction and payment of ESIC contributions and filing of the requisite returns in respect of its eligible employees only from March 2026 onwards. We intend to continue making investments to expand the capacity of our manufacturing facilities to aid our growth efforts and consolidate our presence. Our company's growth trajectory hinges on deploying raised funds for capacity expansion.

Problems that could adversely affect our expansion plans include issues with procurement of equipment or machinery, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory and other regulatory approvals and other external factors which may not be within the control of our management.

Further, we cannot assure you that the future expansions will be completed as planned or on schedule and if they are not completed in a timely manner, or at all, our budgeted costs and investments may be insufficient to meet our future capital expenditure requirements. While these subsidies have historically contributed to our cost management and enhanced our competitiveness, there is no guarantee that they will continue in their current form. The state government may alter or discontinue these programs due to budgetary constraints, policy changes, or shifts in political priorities. 24. Information relating to our installed production capacity, capacity utilisation and historical production levels included in this Red Herring Prospectus is based on third-party certifications, management estimates and certain assumptions. Our actual future production capacity, capacity utilisation and production levels may differ from such information.

Certain information relating to our installed production capacity, production volumes and capacity utilisation disclosed in this Red Herring Prospectus has been derived from our internal records, operational data, technical assessments, third-party certifications and other information obtained from independent professionals and experts [i.e., Chartered Engineer's Certificate dated September 22, 2026 issued by Ajay P. Kothari). Such information may have been determined based on various assumptions, estimates and methodologies, including assumptions relating to operating days, machine efficiency, production cycles, recovery rates, product mix, maintenance schedules, availability of raw materials and other operational factors.

While we believe such assumptions and methodologies are reasonable and the disclosures have been prepared in good faith, there can be no assurance that third parties, investors, analysts or regulatory authorities would reach the same conclusions if different assumptions, methodologies or criteria were applied. Further, any errors, limitations or inaccuracies in such assumptions, estimates or certifications may affect the accuracy of the production capacity and its utilisation information presented in this Red Herring Prospectus.

Our future production capacity and capacity utilisation levels may vary significantly from historical levels due to several factors, including breakdown of machinery, unplanned shutdowns, delays in maintenance activities, labour shortages, interruptions in electricity or fuel supply, availability and pricing of sugarcane and other raw materials, adverse weather conditions, changes in product mix, regulatory restrictions, market demand fluctuations and other factors beyond our control. In addition, any future expansion, modification or reconfiguration of our manufacturing facilities may result in actual capacity outcomes that differ from the assumptions used for historical capacity calculations.

Accordingly, investors should not place undue reliance on historical capacity utilisation levels, production figures or installed capacity disclosures as indicators of our future operational performance. If our actual production capacity, capacity utilisation or production output is materially lower than expected then the same would materially and adversely affect our business, financial condition, cash flows, results of operations and future growth prospects.

For further details kindly refer to the head titled "capacity and capacity utilization" in the Chapter titled 'Our Business' on page no. 187 of this Red Herring Prospectus.

25. The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same.

These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently revise these fund requirements as well.

Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter *"Objects of the Issue"* will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

For further details relating to fund requirement and deployment see head "Requirement of Funds" under Chapter titled "Objects of the Issue" on beginning on page no. 112 of this Red Herring Prospectus.

26. Any variation in the utilization of our Net Proceeds would be subject to certain compliance requirements, including prior Shareholders' approval.

We propose to utilise the Net Proceeds towards the proposed objects of the Issue, *kindly refer the head "Proposed Schedule of Implementation and Utilisation of the Net Proceeds" under chapter titled "Objects of the Issue" on page no. 113 of this Red Herring Prospectus.* We cannot determine with any certainty if we would require the Proceeds this Issue, to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. Further, the Net Proceeds are intended to be utilised by our Company only and none of the members of our Promoter Group or Group Companies will receive any portion of the Net Proceeds. The planned use of the Net Proceeds is based on current conditions and is subject to changes in external circumstances, costs, other financial conditions or business strategies. Any variation in the planned use of the Net Proceeds will be made in compliance with Companies Act, SEBI ICDR Regulations, SEBI Listing Regulations and other applicable laws and would also require Shareholders' approval by passing a special resolution and our Promoters will be required to provide an exit opportunity to the Shareholders who do not agree to such proposal to vary the objects and may involve considerable time or cost overrun and in such an eventuality it may adversely affect our operations or business.

27. Our current/proposed manufacturing facility is located on land taken on lease and our Registered Office and warehouses are taken on lease thus for aforementioned land/properties we have only leasehold/rental rights. If we are unable to renew these leases or relocate on commercially suitable terms, it may have an adverse effect on our business, results of operation, financial condition and cash flows. Though there have not been any such instances during the stub period and last three Financial Years, we cannot assure you that in future such instance may not arise.

For further details in relation to the property kindly refer to the head "Property" in the chapter titled 'Our Business' on page no. 188 of this Red Herring Prospectus.

28. Any slowdown or interruption to our manufacturing operations or under-utilization of our existing or future manufacturing facilities may have an adverse impact on our business, results of operations, financial condition and cash flows.

Any slowdown or interruption to our manufacturing operations may have an adverse impact on our business, results of operations, financial condition and cash flow. In addition, planned shutdowns of our manufacturing facility for maintenance, statutory inspections and testing may be required, or manufacturing facility may be shut down for capacity expansion and equipment upgrades.

Under-utilization of our existing or future manufacturing facilities may have an adverse impact on our business, results of operations, financial condition and cash flow. Capacity utilization is affected by our ability to accurately forecast customer demand, to carry out uninterrupted operations, the availability of raw materials, and industry/ market conditions. In the event there is a decline in the demand for our products, or if we face prolonged disruptions at our facility including due to interruptions in the supply of water, electricity or as a result of labor unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our existing or future manufacturing facilities, resulting in operational inefficiencies which could have an adverse effect on our business, results of operations, financial condition and cash flows.

While we have not experienced any under-utilization of our manufacturing facilities during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

For further details *with respect to our installed capacity and capacity utilization, kindly refer the head "Capacity and Capacity Utilization" under the Chapter titled "Our Business" on page no. 187 of this Red Herring Prospectus.*

29. Our manufacturing facility is concentrated in the state of Maharashtra. Any significant social, political, economic or seasonal disruption, natural calamities or civil disruptions in said State could have an adverse effect on our business, results of operations, financial condition and cash flows.

Our manufacturing facility is in Maharashtra. *For further details with respect to our Manufacturing Facility, kindly refer the head titled "Facility" under the Chapter titled "Our Business" on page no. 180 of this Red Herring Prospectus.*

Due to the geographic concentration of our manufacturing facilities, our operations are susceptible to local and regional factors, such as economic and weather conditions, natural disasters, political changes and other unforeseen events and circumstances. Any natural calamity or economic slowdown in Maharashtra could adversely affect, amongst others, manufacturing operations and may require us to modify our business strategy, or require us to incur significant capital expenditure or could also result in a temporary or permanent suspension of our operations. Further, any such adverse development affecting continuing operations at our manufacturing facilities could result in significant loss due to an inability to meet production schedules, which could adversely affect our business, results of operations, financial condition, cash flow and reputation within the industry.

While we have not experienced the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

30. An inability to comply with environmental laws and other applicable regulations in relation to our manufacturing facility may adversely affect our business, results of operations, financial condition and cash flow.

Our business operations, in particular our day-to-day manufacturing operations, are subject to a broad range of regulations and accordingly, we are required to maintain licenses under such legislations. Any violations of these laws and regulations can result in fines, penalties or litigation, which may adversely affect our business, results of

operations, financial condition and cash flows. For instance, we are subject to laws and government regulations in relation to safety, health and environmental protection. These Environmental Laws and relevant regulations impose controls on air and water discharge, noise levels, storage handling, employee exposure to hazardous substances and other aspects of our manufacturing.

We cannot assure you that there will not be any such future changes in the regulatory framework, which may cause commercial and operational challenges for our Company. If we fail to meet the environmental requirements, we may be subject to administrative, civil and criminal proceedings by Government entities, as well as civil proceedings by environmental groups and other individuals, which could result in substantial fines and penalties against us as well as revocation of approvals and permits and orders that could limit or halt our operations.

While we have not experienced the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

31. Our products are largely commodity products and are subject to significant fluctuations in market prices, which may adversely affect our revenues, margins, profitability and cash flows.

A substantial portion of our revenue is derived from the sale of jaggery powder, khandsari sugar and other sugarcane-based products. These products are generally traded as commodities and their market prices are influenced by numerous factors beyond our control, including availability and pricing of sugarcane, crop yield, weather conditions, changes in agricultural practices, government policies, demand-supply imbalances, seasonal factors, inflation, transportation costs, competitive pricing pressures and overall market conditions. Our ability to pass on "increases in input costs" to our customers may be limited, particularly in periods of weak market demand or heightened competition.

The prices of our principal products may fluctuate significantly over short periods of time. Any decline in selling prices, particularly if not accompanied by a corresponding reduction in raw material and operating costs, could adversely affect our gross margins and profitability. Conversely, increases in raw material costs, especially sugarcane procurement costs and harvesting and transportation expenses, may not always be recoverable through higher selling prices. As a result, our operating results may be exposed to margin compression during periods of adverse commodity price movements.

We also maintain significant inventories of finished goods in the ordinary course of business. Commodity price volatility may result in inventory valuation risks and losses where inventory is procured or manufactured at costs higher than prevailing market prices. Further, fluctuations in commodity prices may affect customer purchasing patterns, inventory holding decisions and overall market demand for our products.

In addition, government interventions in the sugar and agricultural sectors, including policies relating to sugarcane procurement, exports, imports, subsidies, minimum support mechanisms, taxation and other regulatory measures, may directly or indirectly influence the prices of our products and raw materials. Any adverse changes in such policies may increase market volatility and negatively affect our business operations and profitability.

Historically, our financial performance has benefited from favorable market conditions, product mix and operating efficiencies. However, there can be no assurance that commodity prices will remain favorable or stable in the future. Any prolonged decline in the market prices of our products, significant volatility in commodity markets or inability to effectively manage pricing risks could materially and adversely affect our business, financial condition, results of operations, cash flows and the market price of our Equity Shares.

32. Counterfeit, cloned, look-alike and pass-off products sold by third parties may adversely affect our sales, brand reputation, customer confidence and results of operations.

Our business depends significantly on the reputation, quality perception, market acceptance and recognition of our brands and products, including our Jaggery Powder, Khandsari sugar, Jaggery based Premixes Products. As our products gain wider acceptance in existing and new markets, they may become susceptible to counterfeiting, imitation, cloning, unauthorized use of trademarks, deceptive packaging practices, look-alike products and other forms of passing-off by third parties. Such products may be marketed using names, packaging, logos or product presentations that are similar to ours, thereby creating confusion among consumers, distributors, retailers and other market participants.

The manufacture and sale of counterfeit or pass-off products may adversely affect consumer perception of the quality, safety and authenticity of our products even where such products are not manufactured, distributed or authorised by us. Customers may associate any defects, quality issues, contamination, inferior ingredients or non-compliance with regulatory standards relating to such counterfeit products with our brands, resulting in loss of goodwill, erosion of brand equity and reduced customer loyalty.

Further, counterfeit and look-alike products may be sold at lower prices than our genuine products and may divert sales channels, negatively impacting our revenues, market share and profitability. The risk of such practices is heightened in markets where products are sold through multiple intermediaries, wholesalers, retailers or unorganised distribution networks.

Although we may take steps to protect our intellectual property rights, trademarks, packaging and branding, including initiating civil, criminal or administrative proceedings where appropriate, there can be no assurance that such measures will be successful, timely or cost-effective. Monitoring and enforcing our rights may require substantial management attention, legal expenditure and other resources, and remedies available under applicable laws may not always adequately prevent infringement or unauthorized use of our brands.

Any proliferation of counterfeit, cloned, imitation or pass-off products, or any inability on our part to adequately protect our brands and product identity, could materially and adversely affect our reputation, customer relationships, sales, business, financial condition, results of operations, cash flows and the market price of our Equity Shares.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

33. Our business is dependent on the quality, safety and consistency of our products. Any customer complaints, adverse consumer feedback or quality-related concerns regarding our products in the future could adversely affect our reputation, business and results of operations.

We are engaged in the manufacture and sale of Jaggery Powder, Khandsari Sugar, Jaggery based premixes products. The success of our business depends significantly on maintaining consistent product quality, safety standards, customer satisfaction and consumer confidence. While we have not received any material customer complaints relating to our products in the past, there can be no assurance that customer complaints, quality concerns or adverse consumer feedback will not arise in the future.

Our products are intended for human consumption and are therefore subject to stringent quality, food safety and regulatory requirements. Any actual or alleged issues relating to product quality, contamination, packaging defects, labelling errors, storage conditions, shelf life, taste, consistency or compliance with applicable standards could result in customer complaints, product returns, adverse publicity or loss of customer confidence. Even unfounded allegations or negative publicity concerning our products may adversely affect consumer perception of our brands and products.

In addition, negative customer experiences or adverse feedback disseminated through social media, digital platforms or other public channels could spread rapidly and adversely affect our brand image and reputation. Such developments may have a material adverse effect on our business, financial condition, results of operations, cash flows and the market price of our Equity Shares.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

34. There can be no assurance that we will be successful in implementing our business strategies or managing our future growth, and any failure to do so could materially and adversely affect our business, financial condition, results of operations and cash flows.

Our business has experienced significant growth in recent years, driven by expansion of our manufacturing operations, increased production volumes, growth in revenues, diversification of our product portfolio, increasing capacity utilisation and expansion of our customer base and geographical reach. Our future growth strategy is dependent upon several factors, including increasing production and sales volumes, maintaining and improving capacity utilisation levels, expanding our market presence, introducing and scaling value-added products, enhancing operational efficiencies, securing adequate working capital and debt financing, managing our supply chain effectively and retaining key managerial and operational personnel.

Our continued growth will place significant demands on our managerial, operational, financial, compliance and internal control systems. As our business expands, we may face challenges in managing inventory, maintaining product quality standards, controlling operating costs, integrating new business initiatives, strengthening processes and systems and ensuring timely availability of raw materials, particularly sugarcane. Any inability to effectively manage these challenges may adversely impact our operations and profitability.

Further, several of the assumptions underlying our growth strategy may not materialise as anticipated. Increased competition, adverse changes in consumer preferences, fluctuations in raw material availability and prices, changes in government policies, regulatory developments, inability to expand our customer base, failure to penetrate new markets, inability to achieve expected benefits from product diversification or capacity expansion initiatives, and broader economic or industry downturns could adversely affect our growth prospects.

In addition, our historical financial performance may not be indicative of our future performance. A significant portion of our growth has been achieved during a period of operational scale-up, expansion of production activities and increased market penetration. There can be no assurance that we will be able to sustain historical growth rates, capacity utilisation levels, revenue growth or profitability margins in future periods.

If we are unable to successfully execute our business strategies, effectively manage our growth, adapt to changing market conditions or achieve our anticipated operational and financial objectives, our business, financial condition, cash flows, results of operations and future prospects could be materially and adversely affected. Any such developments may also adversely affect investor confidence and the market price of our Equity Shares.

For further details kindly refer to the head titled "Business Strategies" in the Chapter titled 'Our Business' on page no. 179 of this Red Herring Prospectus.

36. Negative publicity against our Company, Promoters, Group Companies, key customers or any of their affiliates may adversely affect our reputation, business, results of operations, financial condition and cash flows.

Our reputation and goodwill are important for maintaining relationships with our customers, suppliers, lenders, regulatory authorities and other stakeholders. Our business is dependent upon maintaining the confidence of our existing and prospective customers. Any adverse publicity relating to the quality of our products, our business practices, our compliance record, our corporate governance standards, our Promoters, Group Companies or our key business counterparties may lead to reputational damage. Such reputational harm may result in loss of existing customers, reduced ability to attract new customers, termination or non-renewal of business arrangements, increased scrutiny by regulatory authorities, difficulties in obtaining financing on favorable terms and a decline in demand for our products.

Further, a significant portion of our revenue is derived from a limited number of customers. Any negative publicity or adverse developments affecting such customers or their affiliates, including financial difficulties, regulatory

proceedings, insolvency, fraud allegations, product quality concerns or adverse media attention, may impair their business operations and purchasing capacity, which may in turn adversely affect our revenues and business prospects. In addition, any perception that our business is associated with such entities may adversely affect our own reputation, even where we are not directly involved in the underlying matter.

In recent years, information and opinions can be rapidly disseminated through digital media, social media platforms and other communication channels, often without verification. Negative publicity or misinformation concerning our Company or any of the aforementioned persons or entities may spread rapidly and may not be capable of timely correction. Any such adverse publicity may divert management attention, require substantial resources to address stakeholder concerns and adversely affect investor confidence.

While we have not experienced any material adverse impact arising from such circumstances during the stub period and last three Financial Years, we cannot assure you that negative publicity or adverse perceptions concerning our Company, our Promoters, Group Companies, customers or any of their affiliates will not arise in the future. Any such event could have a material adverse effect on our reputation, business, results of operations, financial condition and cash flows.

While all the above-mentioned related party transactions have been conducted on an arm's length basis in accordance with the Companies Act 2013 and other applicable laws and are in the ordinary course of business, there can be no assurance that we could not have achieved more favourable commercial terms with other parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest which may be detrimental to our Company. Further, there can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

For further details on our related party transactions, kindly refer the chapter titled "Related Party Transactions" and note no. 28 titled "Statement of Related Party Transactions" under the Chapter titled "Restated Financial Statements" on page no. 276 and page no. 260 respectively of this Red Herring Prospectus.

40. Our business is working capital intensive and insufficient cash flows or inability to borrow funds to meet our working capital requirements may materially and adversely affect our business, financial condition and results of operations.

Inspite of our best efforts for efficient management of working capital, our business activities are capital intensive and requires significant amount of working capital to carry out manufacturing activities. Our working capital requirements are primarily met through financing arrangements with various lenders. We may continue to incur additional indebtedness in the future. Our ability to meet our debt service obligations and our ability to repay our outstanding borrowings will depend primarily upon the cash flow produced by our business. There can be no assurance that we will generate sufficient revenue from our businesses to service existing or proposed borrowings. Further, at the time of approaching various financing institutions to fund our working capital requirements, the financial institutions may require us to meet certain conditions precedent. We may not be able to fulfill all or any of the conditions or agree on terms acceptable to these lender institutions, in which case they would have no obligation to provide any financing to us. The inability of our company to obtain requisite financing may adversely affect our business, financial condition and results of operations.

For details with respect to the Financial Indebtedness, see the Chapter titled "Financial Indebtedness" beginning on page no. 296 of this Red Herring Prospectus.

41. **Our Promoters viz Mrs. Dipali Dattatraya Kulkarni and Mr. Dattatray Kashinath Kulkarni have provided personal guarantees for loan facilities obtained by our Company and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their role as a promoter and directors and thereby, impact our business and operations.**

Our Promoters Mrs. Dipali Dattatraya Kulkarni and Mr. Dattatray Kashinath Kulkarni have provided personal guarantee towards loan facilities taken by our Company. Any default or failure by our Company to repay the loans in a timely manner, or at all could trigger repayment obligations of our Promoters in respect of such loans, which in turn, could have an impact on their ability to effectively service their role as a promoter and directors of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that our Promoters withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. Accordingly, our business, results of operations, financial condition and prospects may be adversely affected by the revocation of the personal guarantee provided by our Promoters. Though there have not been any such instances during the stub period and last three Financial Years, we cannot assure you that in future we may not face such situation

For details with respect to the financial indebtedness, see the chapter titled "Financial Indebtedness" beginning on page no. 296 of this Red Herring Prospectus.

42. **Our Promoter & Director and a member of Promoter Group viz Mr. Dattatray Kashinath Kulkarni, Promoter & Director and Mr. Mukund Kashinathrao Kulkarni, member of promoter group, have provided properties as collateral for loan facilities obtained by our Company and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger seizure and auction of such properties by the financial institutions which may impact Mr. Dattatray Kashinath Kulkarni ability to effectively service his role as a promoter and directors and thereby, impact our business and operations.**

Our Promoter & Director and a member of Promoter Group viz Mr. Dattatray Kashinath Kulkarni, Promoter & Director and Mr. Mukund Kashinathrao Kulkarni, member of promoter group, have provided properties as collateral for loan facilities obtained by our Company. Any default or failure by our Company to repay the loans in a timely manner, or at all could trigger seizure and auction of such properties by the financial institutions which in turn, could have an impact on Mr. Dattatray Kashinath Kulkarni's ability to effectively service his role as a promoter and directors of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that our Promoter & Director and a member of Promoter Group withdraw or terminate such collateral, our lenders for such facilities may ask for alternate properties as collateral, repayment of amounts outstanding under such facilities, or even terminate such facilities. Accordingly, our business, results of operations, financial condition and prospects may be adversely affected by the revocation of such collateral provided by our Promoter & Director and a member of Promoter Group. Though there have not been any such instances during the stub period and last three Financial Years, we cannot assure you that in future we may not face such situation

For details with respect to the financial indebtedness, see the chapter titled "Financial Indebtedness" beginning on page no. 296 of this Red Herring Prospectus.

43. **As on the date of this Red Hearing Prospectus, we do not have any active credit rating and/or have not obtained a credit rating from any credit rating agency. Our inability to obtain or maintain a favourable credit rating in the future may adversely affect our ability to access debt financing on competitive terms, which could materially and adversely affect our business, financial condition, cash flows and results of operations.**

As of the date of this Red Herring Prospectus, we do not have any active credit rating and/or have not obtained a credit rating from any credit rating agency, in relation to our borrowings or our overall credit profile. Consequently, prospective lenders, financial institutions and other counterparties may have limited independent assessments of our creditworthiness and financial strength. Our ability to obtain debt financing on commercially acceptable terms may therefore depend largely on lenders' internal credit evaluation processes, prevailing market conditions, the value of security available to be offered by us, our financial performance and other factors beyond our control.

Our business is capital intensive and we have historically relied on debt financing to support our operations, working capital requirements, capital expenditure and business growth and although a portion of the Net Proceeds of the Issue is proposed to be utilised towards repayment and/or prepayment of certain borrowings, there can be

no assurance that we will not require additional indebtedness in the future to support our business growth, capital expenditure programmes or working capital requirements. Any inability to obtain a credit rating, or to obtain and maintain a favourable credit rating in the future, may result in higher borrowing costs, additional collateral requirements, more restrictive financing covenants, lower sanctioned credit limits, shorter repayment tenures or reduced access to funding sources. Further, lenders may place increased reliance on promoter guarantees, security over assets or other credit enhancement mechanisms, which could limit our financial flexibility.

In the event we seek credit ratings in the future, there can be no assurance that we will obtain ratings at levels that are favorable or comparable to those of our competitors. Any rating assigned may be lower than investor or lender expectations and may be revised, suspended or withdrawn at any time by the relevant rating agency. Any such outcome could adversely affect lender perception of our credit profile and our ability to raise debt capital on competitive terms.

If adequate debt financing is unavailable, or is available only at higher costs, we may be required to defer or scale back capital expenditure plans, reduce investments in capacity expansion, increase reliance on working capital management measures or seek alternative sources of funding that may be more expensive or dilutive. Any of the foregoing could materially and adversely affect our business, financial condition, cash flows, results of operations and future growth prospects."

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

For details with respect to the Indebtedness of our Company, see the Chapter titled "Financial Indebtedness" beginning on page no. 296 of this Red Herring Prospectus.

44. Our insurance coverage may not be adequate, or we may incur uninsured losses or losses more than our insurance coverage.

Our existing insurance coverage includes protection for various aspects, viz., assets like Plant, Property & Equipment (PPE), inventory and employee, insured by various types of insurance coverages like, stock burglary insurance, stock fire insurance, asset fire policy, asset burglary insurance, employee insurance policy, etc.

The insurance coverage of our Company with respect to tangible assets as at the end of the respective year is provided hereunder:

(₹ in lakhs)

Particulars	July 31, 2026	March 31, 2026	March 31, 2025	March 31, 2024
Tangible Asset	9,366.39	12,269.15	10,549.68	10,187.63
Total insurance coverage	6,956.00	6,956.00	9,718.00	7,956.00
Insurance coverage as a percentage of Tangible Asset	74.27%	56.70%	92.12%	78.09%

Notwithstanding the insurance coverage that we have undertaken, we may not be fully insured against certain business risks. We cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part, or on time. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business, results of operations, financial condition and cash flows could be adversely affected.

Further, while we believe that we have obtained insurance against losses that are most likely to occur in our line of business, there may be certain losses that may not be covered by our Company, which we have not ascertained as of the date. Therefore, we cannot assure you that we will continue to accurately ascertain and maintain adequate insurance policies for losses that may be incurred in the future.

Our Company has not made any claim for any insurance during the period FY 2023-2024, FY 2024-2025 and FY 2025-2026 and Stub period ended July 31,2026. However, in the event we are unable to succeed in our claims arising from such claims in future, our business, results of operations, financial condition and cash flows could be adversely affected.

For details with respect to the insurance, see the head "Insurance" under the Chapter titled "Our Business" beginning on page no. 191 of this Red Herring Prospectus.

45. We may be exposed to product liability claims, product recalls and other claims relating to the quality or safety of our products, and any such claims may not be adequately covered by insurance, which could materially and adversely affect our business, financial condition, results of operations and reputation.

We are engaged in the manufacture and sale of Jaggery Powder, Khandsari Sugar, Jaggery based premixes products intended for human consumption. As a manufacturer and supplier of food products, we are subject to risks associated with product quality, safety, contamination, adulteration, improper storage, transportation issues, labelling defects, packaging defects, spoilage, non-compliance with applicable food safety standards and other factors that may adversely affect the quality or safety of our products. Any actual or alleged defect, contamination, quality issue, product failure, consumer illness, injury or other adverse event associated with our products could expose us to product liability claims, consumer complaints, litigation, regulatory investigations or enforcement actions.

Further, our products are distributed through various channels and may be handled, stored or transported by third parties after leaving our manufacturing facilities. Any deterioration in product quality occurring during such stages, even if not attributable to us, may nevertheless result in claims being made against us and could adversely affect consumer confidence in our products and brands.

Although we maintain quality control procedures and comply with applicable food safety and regulatory requirements, there can be no assurance that our products will not be subject to quality-related incidents, product recalls or liability claims in the future. Any requirement to recall products from the market may result in significant costs, diversion of management resources, disruption of operations, loss of sales and damage to our reputation and brand value.

As on the date of this Red Hearing Prospectus, we have not taken any product liability insurance, as a result, we may be required to bear substantial costs and liabilities directly.

Any significant product liability claim, adverse regulatory action, product recall, quality-related incident or uninsured loss could materially and adversely affect our reputation, customer relationships, business operations, financial condition, cash flows, results of operations and the market price of our Equity Shares.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

For details with respect to the insurance, see the head "Insurance" under the Chapter titled "Our Business" beginning on page no. 191 of this Red Herring Prospectus.

46. The requirements of being a publicly listed company may strain our resources. Further non-compliance of the regulatory requirements applicable to publicly listed companies may lead to suspension of our Company.

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large, that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the exchange Listing Regulations, which will require us to file audited annual and unaudited half-yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or, we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business operations, which may adversely affect our business, prospects, results of operations, financial condition and our reputation.

47. Lack of experience of our Directors and Key Managerial Personnel in managing a Public Listed Company.

Our directors (except one of our Independent Directors who are also the Independent Directors of another Listed Company), and key managerial personnel do not have prior experience of managing a public-listed company. As a result, they may face a learning curve in understanding and complying with the ongoing obligations and regulatory requirements applicable to listed entities, including compliance of LODR, ICDR, SAST, PIT, listing

agreement etc. While the directors and key managerial personnel possess relevant knowledge and operational experience, their lack of exposure to public listed Company may result in delays or missteps in implementing policies, procedures, and controls necessary for effective management and compliances of a public listed company. This may have an impact on our ability to comply with applicable laws and regulations, which may adversely affect our business, prospects, results of operations, financial condition and our reputation.

For details w.r.t. to experience of our Directors and Key Managerial Personnels, kindly refer to chapter titled "Our Management" beginning on page no. 211 of this Red Herring Prospectus.

48. The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue price.

Our Promoters' average cost of acquisition of Equity Shares in our Company is as follows:

Name of the Promoters	Number of Equity Shares held as on the date of this certificate	Average cost of acquisition per share (₹)
Dattatray Kashinath Kulkarni	26,24,875	0.19
Dipali Dattatraya Kulkarni	96,25,000	4.00

** Data as certified by Statutory Auditor, M/s. A N Gawade & Co. LLP, Chartered Accountants, by way of their certificate dated November 18, 2026.*

49. Our business is manpower intensive. Our business may be adversely affected by work stoppages, increased wage demands by our employees/labour force(workforce), or an increase in minimum wages, and if we are unable to engage new workforce at commercially attractive terms.

Our operations are manpower intensive and we are dependent on our workforce for a significant portion of our operations. The success of our operations depends on the availability of and maintaining good relationships with our workforce. Shortage of skilled/unskilled personnel or disruptions caused by disagreements with workforce could have an adverse effect on our business, results of operations, financial condition and cash flows.

Disputes, strikes, work stoppages, work slow-downs or lockouts at our manufacturing facility or other problems with our workforce, may adversely affect our ability to continue our business operations. Any labour unrest directed at us could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. Although we have not experienced any labour unrest / disputes / strikes / work stoppages / work slow-downs / lockouts during the stub period and last three Financial Years, we cannot assure you that we will not experience disruptions in work or our operations in the future.

Our success also depends on our ability to attract, hire, train and retain skilled personnels. An inability to recruit, train and retain suitably qualified and skilled personnel could adversely impact our business, results of operations, financial condition and cash flows. As of stub period ended July 31, 2026 and March 31, 2026, number of permanent employees associated with our Company were 173 and 155, respectively, all of whom are skilled employees. The unskilled employees of our company are wage workers and work on a contractual basis.

The following table sets forth the details regarding rate of attrition of our skilled employees in the periods indicated:

Particulars	Period ended July 31, 2026	FY 2025-2026	FY 2024-2025	FY 2023-2024
Attrition rate	14.63%	65.59%	74.50%	18.65%

The attrition levels witnessed by our Company are primarily attributable to the seasonal nature of our business operations, which require engagement of a significant number of contractual and seasonal personnel during the sugarcane crushing season. Upon completion of the season, a portion of such workforce ceases to be associated with the Company, resulting in employee turnover. Further, employee movement also arise on account of personal reasons, availability of alternative opportunities, geographical preferences and workforce rationalisation initiatives undertaken by the Company. While attrition may impact operational efficiency if not managed effectively, we have implemented various employee retention and engagement measures, including competitive compensation structures, training and development initiatives, employee welfare programs and strengthening of human resource systems. We believe these measures will assist us in retaining skilled personnel and maintaining continuity of operations; however, we cannot assure that employee attrition will not adversely affect our business, results of operations, financial condition and cash flows in the future.

We cannot assure you that attrition rates for our employees will not increase. Further, we are subject to stringent labour laws, and any violation of these laws may lead regulators or other authorities to order a suspension of certain or all of our operations. We may need to increase compensation and other benefits either to attract and retain key personnels or due to increased wage demands by our employees, or an increase in minimum wages and that may adversely affect our business, results of operations, financial condition and cash flows.

The following table sets forth the details regarding our employee benefits expense in the periods indicated:

(*₹ in lakhs*)

Name of the Product	For the period ended July 31, 2026	FY 2025-2026	FY 2024-2025	FY 2023-2024
Employee benefit expenses	140.77	463.55	389.08	294.03
Employee benefit expenses as a % of the revenue from operations	4.02%	6.16%	6.64%	8.11%

For further details, see head "Human Resource" under the Chapter titled "Our Business" beginning on page no. 189 of this Red Herring Prospectus.

50. Our Company relies on contract labours during the operating season of factory for carrying out certain manufacturing process and our operations may be adversely affected by shortage of labours, strikes, work stoppages or delay/non-payment of wages by the contractors to the labours.

As our Factory is operated only during harvesting season of Sugarcane i.e., October/November to February/March [herein after called as the operating season], our company relies on contract labours during the operating season for carrying out certain manufacturing process. Accordingly, our Company hire contract labours for particular season and hence the said labours are also called seasonal labours. As on the date of this Red Herring Prospectus based on our operational requirements, we have engaged 45 contract labours for the current crushing season.

The success of our operations depends on availability such labours during the operating season and any shortage of labours during the operating season could have an adverse effect on our business and results of operations. Although we have not experienced any labour shortage during the stub period and last three Financial Years, we cannot assure you that we will not experience shortage of labours and/or disruption in our operations in the future.

Disputes, strikes, work stoppages, work slow-downs or lockouts at our Factory or other problems with our workforce, may adversely affect our ability to continue our business operations. Any labour unrest directed at us could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. Although we have not experienced any labour unrest / disputes / strikes / work stoppages / work slow-downs / lockouts during the stub period and last three Financial Years, we cannot assure you that we will not experience disruptions in work or our operations in the future.

Further, we engage independent contractors through whom we engage these seasonal labours for our Factory operations. Although, we deal with these labours directly at our Factory location, we are not responsible for any wage payments to be made to such labours directly, as the same is to be made by the Independent contractors. In the event of any default on part of the independent contractors to make such payments, we may become liable for such payments. While there have not been any instances where we have become liable to make such payments, during the stub period and last three Financial Year, we cannot assure you that we will not experience such issues in the future.

For further details, see head "Human Resource" under the Chapter titled "Our Business" beginning on page no. 189 of this Red Herring Prospectus.

51. We depend on the skills and experience of our Promoters/Directors, Key Managerial Personnel and Senior Management Personnels for our business and future growth.

We primarily benefit from the strategic guidance of our Promoters and our Directors. If their involvement in our business reduces in the future, we may be unable to implement our plans as anticipated or maintain administrative control as we currently do, which in turn could adversely affect our business, results of operations, financial condition and prospects. As our Promoters are presently also promoters/shareholders of other businesses including "Shree Siddhivinayak Foodtech Farmer Producer Company Limited" any increased focus on such business may divert their attention from our business.

Furthermore, our future performance will also depend on the continued service of our Key Managerial Personnel and Senior Management Personnels and the loss of any such employee and the inability to find an adequate replacement may adversely affect our business, results of operations, financial condition.

For details of our Promoters, our Directors, our Key Managerial Personnel and our Senior Management Personnel, see Chapter titled "Our Promoters and Promoter Group" and "Our Management" beginning on page no. 228 and 211 respectively of this Red Herring Prospectus.

52. We operate in a competitive market and any increase in competition may adversely affect our business, results of operations, financial condition and cash flows.

The industry we serve is highly competitive, characterized by a mix of small and medium companies. We face intense competition from various domestic companies in India as well as from the unorganized sector. We expect competition could increase with new entrants coming into the agro processing industry, who may have more flexibility in responding to changing business and economic conditions and existing players consolidating their positions. Further, expansion in new products (Khansari sugar retails packs & new premix) will require substantial advertising and promotional expenditures and some of our competitors may have access to significantly greater resources, including the ability to spend more on advertising and marketing and hence the ability to compete more effectively. Competitors may, whether through consolidation or growth, present more credible integrated or lower cost products than we do, which may have a negative effect on our business. We cannot assure you that we can continue to compete effectively with our competitors. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising by competitors, may affect the competitiveness of our products, which may affect our business, results of operations, financial condition and cash flows.

For details in relation to our Competition and marketing Strategies, see head titled "Marketing Strategies" & "Competition" under Chapter titled "Our Business" beginning on page no. 179 and 190 respectively of this Red Herring Prospectus.

53. We may not successfully protect our technical know-how, which may result in the loss of our competitive advantage.

We have developed technical know-how relating to the manufacturing process of our products. Our technical know-how has been derived from the past experience of our key employees and management team as well as our research and development efforts. Certain proprietary knowledge may be leaked, either inadvertently or wilfully, at various stages of the manufacturing process. Certain of our employees have access to confidential product information and packaging, amongst others, and we cannot assure you that this information will remain confidential. Moreover, certain of our employees may leave us and join our various competitors. Such technical know-how cannot be protected under the Indian legal system by way of registration with competent authorities, and as a result, we have to rely on employee confidentiality undertakings, a less effective means of protection. Further, if the confidential technical information in respect of our products or business becomes available to third parties or the public, any competitive advantage we may have over our competitors could be harmed. Consequently, any leakage of confidential technical information could have an adverse effect on our business, results of operations, financial condition and cash flows.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions during the stub period and last three Financial Years, we cannot assure you that these risks will not arise in the future.

54. Our inability to adopt new technologies to adhere to our quality product standards could adversely affect our business, results of operations, financial condition and cash flows.

Our manufacturing facilities are equipped with manufacturing processes which is equipped with process-specific automation and control systems. However, we cannot assure you that in the future, we will be able to successfully make timely and cost-effective enhancements, additions or replacements to our current technological infrastructures. Our industry is subject to technological changes with the constant introduction of new and enhanced processes, machinery and technologies. Our inability to successfully adopt and implement such technological changes may increase our costs, which may adversely affect our business, results of operations, financial condition and cash flows. Though there have not been any such instances during the stub period and last three Financial Years, we cannot assure you that in future we shall be able to successfully make timely and cost-effective adoption of technology.

For details in relation to adoption of technology, kindly refer head titled "Technology, Automation and Information Systems" under Chapter titled "Our Business" on page no. 191 of this Red Herring Prospectus.

55. Technology failures could disrupt our operations and adversely affect our business, results of operations, financial condition and cash flows.

IT systems are critical to our ability to manage our manufacturing process, inventory management, financial management, data handling and supply chain management, to maximize efficiencies and optimize costs. If we do not allocate and effectively manage the resources necessary to implement and sustain the proper IT infrastructure, we could be subject to transaction errors and processing inefficiencies. Challenges relating to the revamping or implementation of new IT structures can also subject us to certain errors, inefficiencies and disruptions. Our IT systems and the systems of our third party IT service providers may also be vulnerable to a variety of interruptions due to events beyond our control, including, but not limited to, natural disasters, terrorist attacks,

telecommunications failures, computer viruses, hackers and other security issues. Though there have not been any such instances during the stub period and last three Financial Years, we cannot assure you that in future we shall not face such risk.

For details in relation to adoption of technology, kindly refer head titled "Technology, Automation and Information Systems" under Chapter titled "Our Business" on page no. 191 of this Red Herring Prospectus.

56. We may be subject to fraud, theft, employee negligence or similar incidents.

Our operations may be subject to incidents of theft or damage to inventory. Our industry typically encounters some inventory loss on account of employee theft, vendor fraud and general administrative error. We maintain large amounts of inventory at our warehouse facilities. We cannot assure you that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our business, results of operations, financial condition and cash flows. Additionally, in case of losses due to theft, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. If we incur a significant inventory loss due to third-party or employee theft and if such loss exceeds the limits of, or is subject to exclusion from, coverage under our insurance policies, it could have an adverse effect on our business, results of operations, financial condition and cash flows. Though there have not been any such instances during the stub period and last three Financial Years, we cannot assure you that in future such instance may not arise.

57. We may require raising additional equity or debt in the future in order to continue to grow our business, which may not be available on favorable terms or at all.

Our strategy to grow our business may require us to raise additional funds or refinance our existing debt for our working capital or Capex. We cannot assure you that such funds will be available on favorable terms or at all. Additional debt financing may increase our financing costs. Our financing agreements may contain terms and conditions that may restrict our ability to operate and manage our business, such as terms and conditions that require us to maintain certain pre-set debt service coverage ratios and leverage ratios and require us to use our assets, including our cash balances, as collateral for our indebtedness. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows. Any issuance of equity to raise additional funds, on the other hand, would result in a dilution of the shareholding of existing shareholders. If we are unable to raise additional funds on favorable terms or at all as and when required, our business, results of operations, financial condition and prospects could be adversely affected.

58. Failures in internal control systems could cause operational errors which may have an adverse effect on our reputation, business, results of operations, financial condition and cash flows.

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. Internal control systems comprising policies and procedures are designed to ensure sound management of our operations, safekeeping of our assets, optimal utilization of resources, reliability of our financial information and compliance. We are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems and our actions may not be sufficient to guarantee effective internal controls in all circumstances. Given the size of our operations, it is possible that errors may repeat or compound before they are discovered and rectified. Our management information systems and internal control procedures that are designed to monitor our operations and overall compliance may not identify every instance of non-compliance or every suspicious transaction. If internal control weaknesses are identified, our actions may not be sufficient to correct such internal control weaknesses. These factors may have an adverse effect on our reputation, business, results of operations, financial condition and cash flows. Though there have not been any such instances during the stub period and last three Financial Years, we cannot assure you that in future such instance may not arise.

59. Our Company may not be able to pay dividends in the future. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures and the terms of our financing arrangements.

Any dividends to be declared and paid in the future are required to be recommended by our Board of Directors and approved by its Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act. Our Company's ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows, sufficient profitability, working capital requirements and capital expenditure requirements. We cannot assure you that we will generate sufficient cash flow to cover our operating expenses and, as such, pay dividends to our Company's shareholders in future.

For details relating to the payment of dividend in the past and the dividend policy of our company kindly see chapter titled "Dividend Policy" on page no. 237 of this Red Herring Prospectus.

60. After the completion of the Issue, our Promoters & Promoter Group will continue to collectively hold majority of the shareholding in our Company, which will allow them to influence the outcome of matters requiring shareholder approval.

As on the date of this Red Herring Prospectus, our Promoters & Promoter Group collectively hold ~100% of the share capital of our Company. After the completion of the Issue, our Promoters & Promoter Group will continue to collectively hold majority of the shareholding in our Company and will continue to exercise significant influence over our business policies and affairs and all matters requiring Shareholders' approval, including the composition of our Board, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures or any other matter requiring special resolution. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of our Promoters. The interests of the Promoters as our controlling shareholders could conflict with our interests or the interests of our other shareholders. We cannot assure you that the Promoters will act to resolve any conflicts of interest in our favour and any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

For details of shareholding of our Promoter and Promoter Group, see sub-head "Shareholding of our Promoters and Promoter Group" under the head "Notes to Capital Structure" under Chapter titled "Capital Structure" on page no. 101 of this Red Herring Prospectus.

EXTERNAL RISK FACTORS

Risk related to India

1. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of laws and regulations, may adversely affect our business and financial performance.

The regulatory and policy environment in India is evolving and subject to frequent changes. The Government of India ("GoI") may introduce new laws, regulations or policies or amend existing ones, which may impose additional compliance requirements, require us to obtain new approvals or licences or otherwise place onerous obligations on our business. Such changes may adversely affect our operations, cost structure and future growth. Any uncertainty, delay or change in the enforcement of applicable laws or regulations may materially and adversely affect our business, financial condition, cash flows and results of operations.

2. **Natural or man-made disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could adversely affect our business.**

Our business, financial condition and results of operations may be adversely affected by natural or man-made disasters and other unforeseen events that are beyond our control. These include earthquakes, floods, cyclones, storms, fires, explosions, cloudbursts, landslides, extreme weather conditions, epidemics, pandemics (such as COVID-19), strikes, civil unrest, terrorist attacks, military conflicts and other disruptive events. Such incidents may damage our facilities or inventory, disrupt operations, require temporary shutdowns, affect workforce availability and supply chains or increase costs relating to insurance, security and business continuity.

India has, from time to time, experienced natural calamities, civil disturbances, protests and regional unrest, including farmer protests, localised conflicts and instances of communal or political tensions. In addition, strained international relations-particularly between India and neighbouring countries, may result in military tensions or security concerns. Past conflicts along the India-Pakistan border and periodic terrorist incidents demonstrate the vulnerability of the region to geopolitical instability. Any escalation of such tensions may adversely affect investor confidence, disrupt economic activity and negatively impact the Indian securities markets, including the price of our Equity Shares.

Global geopolitical developments, including conflicts involving Russia–Ukraine, the U.S.–Israel–Iran region, Israel–Hamas–Hezbollah–Iran and Houthi rebel activity, have led to volatility in global financial markets, fluctuations in commodity prices, increases in logistics and supply-chain costs, heightened borrowing costs and capital outflows from emerging markets. Such developments may continue to create uncertainty and economic instability, which in turn could adversely affect our business and growth prospects.

India, as well as other countries in Asia, is susceptible to outbreaks of contagious diseases. Any renewed or future outbreak similar to COVID-19 could lead to travel restrictions, supply-chain disruptions, reduced economic activity and operational challenges for our business. Events of this nature are outside our control and may indirectly impact input costs, demand conditions and economic stability in India.

Any of the above events, individually or collectively, could materially and adversely affect our operations, cash flows, financial condition and the market price of our Equity Shares.

3. **Any downgrade in India's credit or sovereign ratings by independent rating agencies may adversely affect overall economic conditions, which in turn could negatively impact the trading price of our Equity Shares and our ability to raise financing.**

India's sovereign credit rating plays a critical role in determining the cost and availability of financing for Indian companies. Any downgrade in India's credit or sovereign ratings by international rating agencies, due to factors such as fiscal imbalances, changes in tax or monetary policy, deterioration in macroeconomic indicators, geopolitical developments or a decline in foreign exchange reserves, may adversely impact India's economic environment. These factors are beyond our control.

A downgrade of India's sovereign rating could negatively affect our access to domestic and overseas debt markets and may result in higher borrowing costs, more restrictive financing terms or reduced availability of credit. This could adversely impact our ability to raise funds for working capital, capital expenditure, expansion initiatives or other business requirements and in turn negatively affect our business, financial condition, results of operations and growth prospects.

Further, adverse revisions in India's credit ratings may weaken investor sentiment, increase market volatility and affect the performance of the Indian securities markets, which may negatively impact the trading price of our Equity Shares.

4. **We may be affected by competition laws and labour laws, the adverse application or interpretation of which could adversely affect our business.**

The Competition Act, 2002, as amended ("Competition Act"), regulates practices that may have an Appreciable Adverse Effect on Competition ("AAEC") in India. Any arrangement or understanding that causes or is likely to cause an AAEC is void and may result in substantial penalties. Agreements involving price fixing, limiting production or supply, market sharing, bid-rigging or collusive bidding are presumed to have an AAEC and are prohibited. The Competition Act also restricts abuse of dominant position by enterprises.

Further, the combination (merger control) provisions require certain acquisitions, mergers or amalgamations exceeding specified asset or turnover thresholds to be mandatorily notified to and pre-approved by the Competition Commission of India ("CCI"). The CCI also possesses extraterritorial jurisdiction to investigate agreements, conduct or combinations occurring outside India if they have an AAEC in India.

As we may enter into commercial arrangements or evaluate strategic transactions from time to time, the applicability or interpretation of the Competition Act to such transactions cannot be predicted with certainty. Any investigation, enforcement action, adverse order or penalty by the CCI or even adverse publicity associated with such proceedings, could materially and adversely affect our business, financial condition, results of operations, reputation and prospects.

Further, the GoI introduced new laws relating to social security, occupational safety, industrial relations and wages namely, the Code on Social Security, 2020 ("Social Security Code"), the Occupational Safety, Health and Working Conditions Code, 2020, the Industrial Relations Code, 2020 and the Code on Wages, 2019, which consolidate, subsume and replace numerous existing central labour legislations. (collectively, the "Labour Codes"). The President of India has accorded consent to the Labour Codes and the said code was brought into force w.e.f. November 21, 2025. The implementation of these Labour Codes they may increase the financial burden on our Company and could adversely impact our profitability. For instance, under the Social Security Code, a new concept of deemed remuneration has been introduced, such that where an employee receives more than half (or such other percentage as may be notified by the Central Government) of their total remuneration in the form of allowances and other amounts that are not included within the definition of wages under the Social Security Code, the excess amount received shall be deemed as remuneration and accordingly be added to wages for the purposes of the Social Security Code and the compulsory contribution to be made towards the employees' provident fund.

Uncertainty in the interpretation, applicability or enforcement of competition laws & labour laws, and any changes or future amendments thereto, may require significant management time and resources, increase compliance costs and could adversely affect our operations or restrict our ability to grow our business.

5. Financial instability in other countries may cause increased volatility in Indian and other financial markets.

The Indian economy and financial markets are significantly influenced by global economic and market conditions, including those in the United States, Europe, China and emerging markets in Asia. Although economic conditions vary across countries, adverse developments or financial instability in one major economy can trigger a loss of investor confidence across other emerging markets, including India. Such contagion effects may lead to capital outflows, increased market volatility and a decline in the performance of the Indian securities markets.

Past episodes of global financial turmoil, including disruptions in Asian and Russian markets, deterioration of credit conditions in the United States and volatility in other international markets, have adversely affected the Indian economy. Further the rising inflation and tightening monetary policy globally may directly or indirectly impact India's economic stability.

China is one of India's major trading partners and concerns regarding a potential slowdown in the Chinese economy or strained bilateral relations may adversely affect trade volumes and India's export growth. Additionally, global developments such as trade disputes, rising protectionism and economic slowdowns in large economies may lead to risk aversion, reduced liquidity and volatility in international capital markets, thereby affecting the Indian financial system.

Although various governments and regulators have introduced policy measures to stabilise financial markets, the long-term impact of such measures remains uncertain and global financial instability or the perception of instability may restrict capital availability, increase borrowing costs, reduce investor appetite and adversely affect liquidity in the Indian markets. Events such as the COVID-19 pandemic have also demonstrated how rapidly global shocks can disrupt economic activity, impact financial markets and weaken business environments worldwide.

Any significant deterioration in international market conditions, geopolitical tensions, global credit stress or prolonged volatility may adversely affect the Indian economy and financial sector and in turn, materially and adversely impact our business, financial condition, cash flows, results of operations and the trading price of our Equity Shares.

6. Substantial past, ongoing and future changes in the Indian tax tegime could adversely affect our business, financial condition and the trading price of our Equity Shares

India's tax regime has undergone significant reform in recent years, including changes to direct and indirect taxes and remains subject to frequent amendments at the Central and State levels. There can be no assurance that the tax

rates, exemptions, incentives or slabs currently available to us will continue in the future or that new taxes, cesses or surcharges will not be introduced. Any such changes may increase our overall tax burden and adversely affect our profitability.

The implementation of the Goods and Services Tax ("GST") with effect from July 1, 2017, replaced multiple indirect taxes with a unified tax structure. While GST was intended to simplify the indirect tax framework, periodic changes in classification, rates, input credit eligibility and compliance requirements continue to create uncertainty. Any future amendments in GST law or its interpretation, including those relating to valuation, place of supply or denial of input tax credits, may increase our compliance costs or expose us to additional tax liabilities, penalties or litigation.

Further, the General Anti-Avoidance Rules ("GAAR"), applicable from assessment year 2018-19, empower Indian tax authorities to declare arrangements as "impermissible avoidance arrangements" if considered to be primarily designed to obtain a tax benefit. Given the limited jurisprudence available on the application of GAAR, there is uncertainty regarding how tax authorities may interpret or invoke these provisions. Any adverse application of GAAR could result in denial of tax benefits, re-computation of income or other adjustments that may adversely affect our financials.

India's direct tax laws, including the Income Tax Act, 2025 (repead the Income Tax Act, 1961) are subject to frequent amendments through annual Finance Acts. Such changes may relate to deduction eligibility, withholding tax requirements, compliance obligations, reporting standards, transfer pricing rules or reassessment procedures. Differing interpretations by tax authorities, judicial bodies or state-level revenue authorities may lead to prolonged disputes and increased litigation risk and corresponding financial exposure.

Frequent changes or adverse interpretations of tax, corporate, foreign investment, environmental and sector-specific laws may expose us to higher compliance requirements, additional liabilities, penalties or litigation.

Given the evolving nature of India's taxation regime, future changes, whether relating to income tax, GST, customs duty, stamp duty or other fiscal regulations, may materially and adversely affect our business, financial condition, results of operations, cash flows and the trading price of our Equity Shares.
Further, any increase, modification or introduction of taxes, duties, cess or levies at the central or state level may also adversely impact our performance.

7. If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our consumers thereby reducing our margins.

Inflation rates in India have been volatile in recent years and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business including increased costs of wages and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our consumers, whether entirely or in part and this may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase the price of our products to pass the increase in costs on to our consumers. In such case, our business, results of operations, financial condition and cash flows may be adversely affected.

Further, the Government of India has previously initiated economic measures to combat high inflation rates and it is unclear whether these measures will remain in effect. We cannot assure you that inflation levels in India will not worsen in the future.

8. Investors may not be able to enforce a judgment of a foreign court against us, our Directors, Key Managerial Personnel, Senior Management Personnel in India respectively, except by way of a lawsuit in India.

Our Company, its Directors, Key Managerial Personnel, Senior Management Personnel and assets are all located in India. Therefore, it may be difficult for investors to serve process on or enforce judgments against these parties outside India. Additionally, Indian courts are unlikely to enforce foreign judgments that they consider excessive, inconsistent with public policy or contrary to Indian law.

Enforcement of foreign judgments in India is governed by Sections 13 and 44A of the Code of Civil Procedure (CPC), 1908. India is not a party to any international treaty on recognition or enforcement of foreign judgments but has reciprocal arrangements with a few jurisdictions such as the United Kingdom, United Arab Emirates,

Singapore and Hong Kong. Only monetary decrees can be enforced under these agreements, excluding taxes, fines or penalties.

Judgments from non-reciprocating jurisdictions, including the United States, cannot be directly enforced in India. The party obtaining such a judgment may file a fresh suit in an Indian court within three years based on the foreign judgment. However, Indian courts may award damages differently and may not enforce foreign judgments viewed as excessive or against Indian public policy. There is also no guarantee of timely resolution.

Furthermore, anyone seeking to enforce and repatriate amounts recovered under a foreign judgment in India must obtain prior approval from the RBI. Approval may not be granted promptly or at all and any repatriated amount could be subject to income tax under applicable laws.

9. The industry is highly fragmented and competitive and increased competition pressure may adversely affect our results of operations.

We operate in an industry that is highly fragmented, characterised by the presence of numerous organised and unorganised players. Low entry barriers and increasing demand have encouraged both new entrants and existing participants to expand their operations, resulting in intense competition. Many competitors may have greater financial resources, longer operating histories, larger scale of operations, better market reach, stronger supplier relationships or more established brands compared to us.

Competitive factors in our industry generally include pricing, product or service quality, customer experience, distribution reach, supply-chain reliability, brand recognition and the ability to innovate. Increased competition may lead to pricing pressure, higher marketing and promotional expenses, greater customer acquisition and retention costs and reduced margins. Competitors with stronger financial or operational capabilities may also be able to respond more effectively to changing market conditions or customer preferences.

Any inability on our part to compete effectively with existing players or new entrants or to maintain or enhance our market position, may materially and adversely affect our business, revenues, profitability, financial condition and results of operations.

10. Our business is substantially affected by prevailing economic, political, geopolitical and other conditions in India and regional and global economic and market conditions. Political, macroeconomic, demographic and other changes could adversely affect economic conditions in India, which could materially adversely affect our business, results of operations and negatively affect our stock price.

Economic growth in India is influenced by a variety of factors, including government policy, fiscal and monetary conditions, inflation levels, interest rate movements, consumer spending patterns, industrial output, availability of credit and overall business confidence. Any adverse developments in these factors could reduce the level of economic activity in India. For example, prolonged inflationary pressures, increases in interest rates, tightening of liquidity or a slowdown in GDP growth could dampen customer demand, increase our operating costs, affect our access to capital and delay or reduce client spending in our sector. These developments may, in turn, adversely impact our revenues, profitability and cash flows.

Political developments in India, such as changes in government, shifts in policy priorities, introduction of new regulatory frameworks, delays in policy implementation or changes in taxation (including GST and indirect tax regimes), may also affect the markets in which we operate. Political instability, social unrest or significant changes in the regulatory environment could negatively affect the business climate and lead to reduced investment activity or disruptions in operations.

Furthermore, India's economy is increasingly integrated with global markets. Geopolitical tensions, global economic uncertainty, recessionary conditions in major economies, fluctuations in commodity prices, currency depreciation and supply-chain disruptions (including those arising from conflicts, pandemics or trade restrictions) can affect India's macroeconomic stability. Such external shocks may lead to higher input costs, reduced availability of raw materials, delays in procurement or volatility in foreign exchange rates, all of which could adversely affect our business operations and financial performance.

Any of the above domestic or global developments may reduce investor confidence or create volatility in the Indian equity markets. As a result, the trading price of our Equity Shares may be adversely affected, irrespective of our operational performance. Accordingly, adverse economic, political, geopolitical or market conditions in India or globally could materially adversely affect our business, results of operations, financial condition and the price of our Equity Shares.

11. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is still developing compared to many developed countries. Any disruption or congestion in port, rail, road or other transportation networks, electricity supply, telecommunications or other essential public facilities could adversely impact our business operations.

Such disruptions may lead to delays in the movement of goods, increased operational costs or interruptions in our day-to-day activities. Deterioration or inadequacy of infrastructure could also negatively affect the overall efficiency of the national economy, which in turn may adversely affect our business, financial condition, results of operations and cash flows.

12. A slowdown in economic growth in India or in the States in India, in which we operate, could cause our business to suffer.

Our business and financial performance are closely linked to the overall health of the Indian economy and the economies of the States in which we operate. Any slowdown in economic growth, due to factors such as increases in interest rates, fluctuations in commodity and energy prices, adverse weather conditions affecting agriculture or other macroeconomic developments, could reduce demand for our products and services, impact our revenue and constrain our growth.

The Indian economy is also influenced by global economic developments. Slowdowns, financial instability or loss of investor confidence in other countries, particularly the United States, Europe, China and emerging Asian markets, may lead to volatility in Indian financial markets, affect exchange rates, increase borrowing costs and reduce liquidity, which could negatively impact our business and financial performance.

Changes in government policy in response to domestic or global economic developments, including infrastructure, trade, taxation and investment policies, may further affect economic conditions and our operations. Any combination of these factors could materially and adversely affect our business, cash flows, results of operations and the market price of our Equity Shares.

13. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Our business and financial performance may be affected by changes in interest rates. Any increase in prevailing interest rates may raise our borrowing costs, increase our finance expenses and reduce our profitability. Higher interest rates may also affect our ability to raise additional funds in the future, whether through bank borrowings or other forms of financing and may limit our financial flexibility for expansion, working capital requirements or other business needs. If interest rates remain high or become more volatile, our cost of funds could increase significantly, which may adversely affect our business, financial condition, results of operations and cash flows.

Fluctuations in interest rates may also influence overall economic activity, including levels of consumer spending, liquidity in the market and corporate investment decisions. A period of high or unstable interest rates may reduce demand for our products and services and may impact the financial stability of our customers and suppliers, as higher borrowing costs and tighter liquidity conditions could limit their ability to meet their financial obligations on time. These factors, individually or collectively, may adversely affect our revenues, operational performance, cash flows and the market price of our Equity Shares.

14. Volatile conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.

The Indian securities market has historically exhibited significant volatility due to a combination of external factors, including fluctuations in global economic conditions, geopolitical developments and movements in foreign portfolio investor ("FPI") flows, which are influenced by global liquidity and risk sentiment. Macroeconomic uncertainties in India—such as inflation, currency movements, fiscal and monetary policy changes or shifts in government regulations or tax policies may further impact market stability. Additionally, sector-specific developments, variations in corporate earnings, high levels of derivatives and speculative trading activity and sentiment-driven investor behavior may contribute to sharp price movements. These external factors, individually or collectively, may adversely affect market conditions and the trading price of the Equity Shares after listing. While policymakers and regulators in India and other jurisdictions have taken measures to stabilize financial markets, the long-term effectiveness of these efforts is uncertain. Any adverse economic developments or financial disruptions globally could materially and adversely affect our business, financial condition, results of operations and the trading price or liquidity of our Equity Shares.

15. **Industry risks related to unethical practices by certain market participants affect overall performance of emerging Companies.**

The industry in which we operate is exposed to risks arising from unethical or non-compliant business practices by certain market participants, including misleading marketing, inaccurate product claims, inappropriate pricing practices and other forms of misconduct. Such actions by a few players may create a negative perception of the industry as a whole, resulting in heightened scrutiny from consumers and stricter regulatory oversight, including tighter entry norms, enhanced compliance requirements and more stringent codes of conduct. As these regulatory measures apply uniformly across the industry, emerging companies such as ours may face increased compliance costs, operational constraints and reputational challenges. Any unethical business practices by other industry participants or intermediaries, even if we are not involved, may adversely affect market sentiment, industry performance and consequently our business, financial condition and results of operations.

16. **Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Red Herring Prospectus.**

The financial statements included in this Red Herring Prospectus under chapter "Restated Financial Statements" beginning on page no. 238 are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations. No attempt has been made to reconcile this information to other accounting principles, such as U.S. GAAP or IFRS.

Indian GAAP differs from accounting and auditing standards used in other countries and such differences may be material to the financial information presented herein. The degree to which this information is meaningful depends on familiarity with Indian GAAP, the Companies Act and SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures contained in this Red Herring Prospectus should therefore be limited.

17. **Increasing employee compensation in India may erode some of our Company's competitive advantage and may reduce our Company's profit margins, which may have a material adverse effect on our Company's business, financial condition, cash flows and results of operations.**

Employee compensation in India has historically been significantly lower than employee compensation in the United States and Western Europe for comparably skilled professionals. However, compensation increases in India may erode some of this competitive advantage and may negatively affect our Company's profit margins. Employee compensation in India is increasing at a faster rate than in the United States and Western Europe, which could result in increased costs relating to managers and other mid-level professionals. Our Company may need to continue to increase the levels of our Company's employee compensation to remain competitive and manage attrition.

Risk related to Equity shares & Issue

18. **There can be no assurance that an active trading market for our Equity Shares will develop or be sustained on the SME Platform, and the discontinuation of market-making activities after the mandatory period may adversely impact the liquidity and market price of our Equity Shares.**

Our Equity Shares are proposed to be listed on the SME Platform of the Stock Exchange. The SME Platform is generally characterized by lower trading volumes, lower public float, reduced analyst coverage and comparatively lower liquidity than the main board platforms of stock exchanges. As a result, investors may experience difficulty in buying or selling our Equity Shares at desired prices or in the desired quantities following the completion of the Issue.

In accordance with applicable regulations governing SME listings, a Market Maker is required to provide two-way quotations for a specified period after listing of the Equity Shares. While such market-making arrangements are intended to facilitate liquidity in the Equity Shares, there can be no assurance that the Market Maker will be able to maintain adequate liquidity, narrow bid-ask spreads or meaningful trading volumes at all times. Further, the market-making arrangement is subject to the applicable regulatory framework and is intended to continue only for the prescribed period following listing. After the expiry of such mandatory market-making period, there can be no assurance that any market participant will continue to provide liquidity in our Equity Shares.

The liquidity of our Equity Shares following listing may be influenced by several factors beyond our control, including our financial performance, investor perception, trading interest, market conditions, sector performance, regulatory developments, research coverage, shareholding concentration and general economic conditions. Any

reduction in liquidity may result in wider bid-ask spreads, increased price volatility and difficulty for investors seeking to dispose of or acquire our Equity Shares.

In addition, a substantial portion of our Equity Shares may continue to be held by our Promoters and members of the Promoter Group following the Issue, which may further limit the number of Equity Shares available for trading in the public market. Consequently, even relatively small trades may have a disproportionate effect on the market price of our Equity Shares.

Accordingly, investors may not be able to sell their Equity Shares at or above the Issue Price, at the time they desire, or at all. The absence of an active and liquid trading market, whether during or after the market-making period, could adversely affect the market price, liquidity and tradability of our Equity Shares and may result in losses to investors.

19. Certain past issues managed by our BRLM are currently trading below their issue prices and there can be no assurance that the Equity Shares issued in this Issue will not face similar price performance. The determination of the Issue Price is based on various factors and assumptions and the Issue Price, price to earnings ratio and market capitalization to revenue multiple. Issue Price of our Company may not be indicative of the market price of our Company on listing or thereafter.

Certain past public issues managed by our BRLM are presently trading below their respective issue prices. *For further details, see head titled "Price information of past issues handled by the BRLM" under the chapter titled "Other Regulatory and Statutory Disclosures" beginning on page no. 325.* There can be no assurance that the Equity Shares issued pursuant to this Issue will not demonstrate similar price behaviour.

The Price Band and Issue Price will be determined by our Company, in consultation with the BRLM, in accordance with the SEBI ICDR Regulations. Such determination is based on various qualitative and quantitative factors, including those described under "Basis for Issue Price" beginning on page no. 124 and on an assessment of market demand through the Book Building Process. These pricing parameters, including the price-to-earnings ratio and market capitalisation-to-revenue multiple, may not be indicative of the market price of our Equity Shares upon listing or at any time thereafter.

The table below provides details of our price to earnings ratio and market capitalization to revenue from operations at the Issue Price of our Company:

Particulars	Price to Earnings Ratio*	Market Capitalisation to Revenue**
Fiscal [●]	[●]	[●]

*Price to Earnings Ratio has been determined as Issue Price per equity share divided by the EPS per equity share (as on [●])
**Market capitalisation has been computed as number of equity shares post the issue multiplied by the issue price per equity share. Revenue has been considered as on [●]

Any valuation for the purposes of this issue has been undertaken solely for the issue and may not be comparable to valuations of industry peers or to future valuations of our Company.

Prior to this issue, there has been no public market for our Equity Shares. An active or sustained trading market may not develop following the listing of the Equity Shares and listing does not guarantee liquidity.

The market price of our Equity Shares after listing may be affected by numerous factors, including but not limited to:

- overall market conditions and investor sentiment;
- fluctuations in our operating results;
- developments relating to the industry in which we operate;
- economic, legal, regulatory or political developments in India;
- announcements by third parties or initiation of significant claims or proceedings;
- variations in research analysts' estimates; and
- global or domestic market volatility.

These factors, individually or collectively, may result in substantial volatility or decline in the market price of our Equity Shares, including to levels below the issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the issue Price at any time.

20. Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (ASM) and Graded Surveillance Measures (GSM) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in the respective securities and advice market participants to carry out necessary due diligence while dealing in the respective securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

Upon listing or thereafter, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Issue due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation. In the event our Equity Shares are covered under such pre-emptive surveillance measures implemented by SEBI and the Stock Exchanges, we may be subject to certain additional restrictions in relation to trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active market for and trading of our Equity Shares.

21. A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian law.

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

22. Fluctuations in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on NSE Emerge. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India with respect to the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. The exchange rate between the Indian Rupee and the U.S. dollar or other global currencies has fluctuated in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

23. The Equity Shares of our Company have never been publicly traded and the current Issue may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile and the investors may be unable to resell the Equity Shares at or above the Issue Price or at all.

Prior to the Current Issue, there has been no public market for the Equity Shares and an active trading market on the stock exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop or if developed, the liquidity of such market for the Equity Shares. Our Equity Shares are expected to trade on NSE Emerge after the Issue, but we cannot assure you that active trading in our Equity Shares will develop after the Issue or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

There has been significant volatility in the Indian stock markets in the recent past and the trading price of our Equity Shares after the Issue could fluctuate significantly as a result of market volatility or due to various internal or external risks, including but not limited to those described in this Red Herring Prospectus. The market price of our Equity Shares may be influenced by many factors, some of which are beyond our control, including, among others:

- the failure of security analysts to cover the Equity Shares after the Issue or changes in the estimates of our performance by analysts;
- the activities of competitors and suppliers;
- future sales of the Equity Shares by us or our Promoters & Promoter Group;
- investor perception of us and the industry in which we operate;
- our quarterly or annual earnings or those of our competitors;
- developments affecting fiscal, industrial or environmental regulations; and
- the public's reaction to our press releases and adverse media reports.

A decrease in the market price of our Equity Shares could cause investors to lose some or all of your investment.

24. Investors may be subject to Indian taxes arising out of income arising on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company is generally taxable in India. A securities transaction tax ("**STT**") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months may be subject to long-term capital gains tax in India at the specified rates depending on certain factors, such as STT paid, the quantum of gains and any available treaty exemptions. Accordingly, investors may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of our Equity Shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. While non-residents may claim tax treaty benefits in relation to such capital gains income, generally, Indian tax treaties do not limit India's right to impose tax on capital gains arising from the sale of shares of an Indian company.

Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident read with the Multilateral Instrument ("**MLI**"), if and to the extent applicable and the seller is entitled to avail benefits thereunder. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action including dividends.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020 and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action including dividends.

Our Company cannot predict whether any tax laws or other regulations impacting it will be enacted or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have an adverse effect on our business, results of operations, financial condition and cash flows.

25. Investors will not be able to immediately sell any of the Equity Shares on the Stock Exchange that they purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the NSE Emerge. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry or 'demat' accounts with depository participants in India, are expected to be credited with the Equity Shares within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in this Issue and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately two Working Days from the Bid Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within three Working Days of the Bid Closing Date. There could be a failure or delay in the listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise any delay in commencing trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. We

cannot assure you that the Equity Shares will be credited to investors' demat accounts or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

26. Any future issuance of Equity Shares or convertible securities or other equity linked instruments by us may dilute the investors' shareholding and sale of Equity Shares by shareholders with significant shareholding may adversely affect the trading price of the Equity Shares.

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. Any disposal of Equity Shares by our major shareholders or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. We cannot assure you that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future. Any future issuances could also dilute the value of your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares.

27. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents is freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities.

Further, under Press Note 3 (2020 Series) and the corresponding proviso to Rule 6(a) of the FEMA Non-debt Rules, any foreign investment from countries sharing land borders with India or where the beneficial owner of the Equity Shares is situated in or is a citizen of such countries, requires prior Government approval. As the term "beneficial owner" is not defined under the FDI Policy or FEMA Rules, its interpretation and enforcement remain uncertain. These uncertainties, along with the unpredictability of approval timelines, may adversely affect our ability to raise foreign capital. We also cannot assure that any required approvals from the RBI or other governmental authorities will be obtained on timely or favorable terms or at all.

For further information, see chapter titled "Restrictions on Foreign Ownership of Indian Securities" beginning on page no. 387 of this Red Herring Prospectus.

28. Individual Investors, Non-Institutional Investors and QIBs are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after the submission of their Bid.

Pursuant to the SEBI ICDR Regulations, Individual Investors, Non-Institutional Investors and QIBs are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed, including Allotment, within three Working Days from the Issue Closing Date or such other period as may be prescribed by the SEBI, events affecting the investors' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur and such events may limit the Investors' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

29. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the relevant stock exchange in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

30. Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and wide-spread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder of our Company than as a shareholder of an entity in another jurisdiction.

31. Compliance with provisions of Foreign Account Tax Compliance Act may affect payments on the Equity Shares.

The Foreign Account Tax Compliance Act ("FATCA") is a U.S. tax law that aims to prevent tax evasion by U.S. persons holding investments through non-U.S. entities. It imposes reporting obligations on certain non-U.S. financial institutions and intermediaries and may subject certain payments to a 30% withholding tax if the recipient or intermediary is not compliant with FATCA requirements. Although FATCA withholding generally applies to U.S.-source payments, it may also apply to certain "foreign passthru payments," a term that has not yet been conclusively defined under final U.S. Treasury regulations. As a result, it remains uncertain whether and to what extent, any payments made in respect of the Equity Shares could be regarded as "foreign passthru payments" and therefore be subject to FATCA withholding in the future.

Furthermore, while the United States and India have entered into an intergovernmental agreement that modifies certain FATCA obligations, it is not yet clear how these rules will ultimately apply to payments on the Equity Shares or to financial institutions or intermediaries through which such payments are made. If we, any financial intermediary or any investor fail to comply with applicable FATCA requirements, payments made to such investors may be subject to withholding. Any such withholding could reduce the amounts payable to investors and adversely affect the value of the Equity Shares.

32. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

33. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents is freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupee proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

34. If security or industry analysts do not publish research or publish unfavourable or inaccurate research about the business of our Company, the price and trading volume of the Equity Shares may decline.

The trading market for the Equity Shares may depend, in part, on the research and reports that securities or industry analysts publish about us or our business. Our Company may be unable to sustain coverage by established and / or prominent securities and industry analysts. If either none or only a limited number of securities or industry analysts maintain coverage of our Company or if these securities or industry analysts are not widely respected within the general investment community, the trading price for the Equity Shares would be negatively impacted. In the event our Company obtains securities or industry analyst coverage, if one or more of the analysts downgrade the Equity Shares of our Company or publish inaccurate or un-favourable research about our business, the price of the Equity Shares may decline. If one or more of these analysts cease coverage of our Company or fail to publish reports on our Company regularly, the demand for the Equity Shares of our Company could decrease, which might cause the price and trading volume of the Equity Shares of our Company to decline.

1. CAPITAL EXPENDITURES:

From the proceeds of the IPO, our Company proposes to undertake the expansion of our manufacturing plant by increasing the sugarcane crushing capacity from 1,250 TCD (Metric Tonnes Crushed per Day) to 2,000 TCD. The intended expansion is proposed considering that our Company has been utilising ~ 90% (average) of its existing crushing capacity. This capacity expansion is expected to enhance the operational efficiency of the plant and enable our Company to process a significantly higher volume of sugarcane during the crushing season. Consequently, the production of Jaggery Powder & Khandsari Sugar and other by-products is expected to increase proportionately, subject to the availability of adequate sugarcane and prevailing market conditions.

It is herewith stated that our Company has license to crush 1,500 TCD of Sugarcane for the purpose of production of Jaggery Powder and crush 900 TCD of Sugarcane for the purpose of production of Khandsari Sugar.

Thus, with the proposed expansion our company will be able to process more Sugarcane to increase the production of both its main products i.e., Jaggery Powder & Khandsari Sugar and its by-products i.e., Bagasse, Molasses, Press-mud & Ash.

Our Company completed the setup of the factory for production of Jaggery Powder during FY 2023-2024, for which our company incurred a total cost of ₹ 3,785 lakhs (exclusive of GST). Our Company further purchased and installed machinery worth ₹ 9 lakhs (exclusive of GST) at its existing factory location for production of value-added food products i.e. Jaggery based Pre-Mixes (Instant Rice Kheer, Jaggery Tea, Jaggery Laddoo, Jaggery Lapsi and Jaggery Coffee premixes) during FY 2024-2025. Further, during FY 2025-2026 our Company completed the setup of expansion of its existing manufacturing facility for production of Khandsari Sugar in addition to its existing production capacity of Jaggery Powder, for which our company incurred a total cost of ₹ 1,017.33 lakhs (exclusive of GST).

For details with respect to the history of our Company in setting up our existing manufacturing facility kindly refer heading titled "Capacity/ Facility Creation, Location of Plants" under the Chapter titled "Our History and Certain Corporate Matters" beginning on page no. 208 of the Red Herring Prospectus.

2. PRE-PAYMENT/RE-PAYMENT, IN PART OR FULL, OF CERTAIN OUTSTANDING BORROWINGS OF OUR COMPANY

Our Company has entered into various financing arrangements for setting up its Manufacturing Facility and facilitating its business operations by way of Term Loans and Working Capital Loans. As at October 31, 2026, the outstanding secured borrowings of our Company from Financial Institutions/Banks on a consolidated basis was ₹ 5,053.98 lakhs.

We intend to utilize an amount of ₹4,850 lakh (i.e. amounting to 95.96 % of the total secured loan portfolio as October 31, 2026) from the Net Proceeds for financing the repayment/pre-payment, in part or full of certain borrowings availed by our Company, the details of which are listed out in the table below.

Given the nature of the borrowings and the terms of repayment or prepayment, the aggregate outstanding amounts under the secured borrowings from the Financial Institutions/Banks may vary from time to time and our Company may, in accordance with the relevant repayment schedule, repay or refinance some of its existing secured borrowings prior to the date allotment. Further, the amounts outstanding under the secured borrowings as well as the sanctioned limits are dependent on several factors and may vary with our Company's business cycle with multiple intermediate repayments, drawdowns and enhancement of sanctioned limits. However, the aggregate amount to be utilized from the Net Proceeds towards prepayment or repayment of the secured borrowings (including refinanced or additional facilities availed, if any) from Financial Institutions/Banks, in part or full, would not exceed ₹4,850 lakh.

The repayment/ pre-payment of such loans will help reduce our outstanding indebtedness, debt servicing costs, improve our financial position, performance and debt-to-equity ratio and enable utilization of our internal accruals for further investment in the growth and expansion of our business. Additionally, a reduction of our outstanding indebtedness will improve our ability to raise further resources in the future to fund our potential business development opportunities.

In accordance with the terms of the relevant secured borrowing arrangements, prepayment of certain secured borrowings may attract prepayment penalties as stipulated in the relevant borrowing documents. Such prepayment charges, as applicable, will also be funded out of the Net Proceeds, in accordance with the requirements of our Company. If the Net Proceeds are insufficient for making payments for such pre-payment penalties, the excess amount shall be funded through our internal accruals.

The details of the outstanding secured borrowings, availed by our Company from Financial Institutions/Banks, proposed to repaid or pre-paid, in full or part, from the Net Proceeds are as set out in the table below.

1. Global Economic Outlook

As per the IMF's World Economic Outlook (WEO) published in April 2026, global growth is projected to remain resilient at 3.1 percent in 2026 and at 3.2 percent in 2027. After withstanding higher trade barriers and elevated uncertainty last year, global activity now faces a major test from the outbreak of war in the Middle East. Assuming that the conflict remains limited in duration and scope, the outlook reflects the impact of heightened geopolitical tensions, trade disruptions and cautious investment sentiment, which are expected to weigh on global economic momentum.

Global headline inflation is projected to rise modestly in 2026 before resuming its decline in 2027. Slowdown in growth and increase in inflation are expected to be particularly pronounced in emerging market and developing economies. This is driven by elevated geopolitical tensions, commodity price volatility, external financing pressures and spillover effects from trade and policy uncertainty. Downside risks dominate the outlook, as a longer or broader conflict, worsening geopolitical fragmentation, renewed trade tensions, or a reassessment of expectations surrounding artificial-intelligence-driven productivity could significantly weaken growth and destabilize financial markets. Elevated public debt and eroding institutional credibility further heighten vulnerabilities, while faster-than-anticipated productivity gains from AI or sustained easing in trade tensions could provide upside support. Fostering adaptability, maintaining credible policy frameworks and reinforcing international cooperation remain essential to navigating current shocks and future disruptions.

Note: F = Forecast
Source: IMF World Economic Outlook April 2026
Note: Advanced Economies and Emerging & Developing Economies are as per the classification of the World Economic Outlook (WEO). This classification is not based on strict criteria, economic or otherwise and it has evolved over time. It comprises of 40 countries under the Advanced Economies including the G7 (the United States, Japan, Germany, France, Italy, the United Kingdom and Canada) and selected countries from the Euro Zone (Germany, Italy, France etc.). The group of emerging market and developing economies (156) includes all those that are not classified as Advanced Economies (India, China, Brazil, Malaysia etc.)

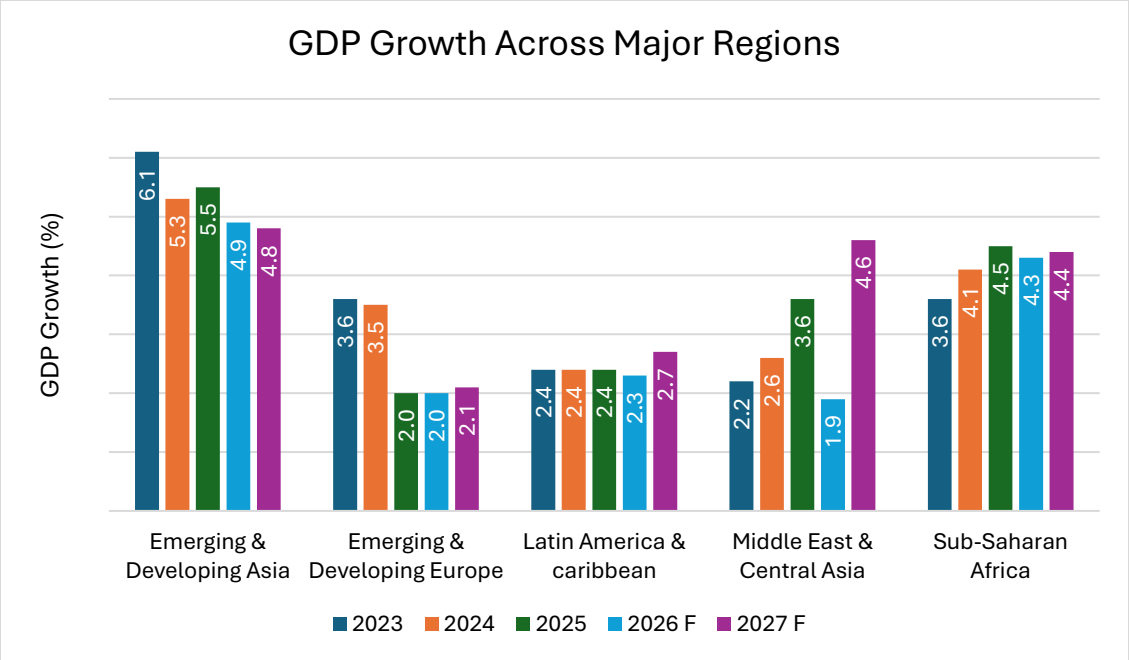

Growth across the global economy is projected to remain resilient, though moderate over the forecast period. Global GDP growth declined from 3.5 percent in 2023 to 3.3 percent in 2024, before increasing marginally to 3.4 percent in 2025. However, growth is projected to moderate to 3.1 percent in 2026 before recovering slightly to 3.2 percent in 2027, reflecting the impact of geopolitical uncertainty, trade disruptions and cautious investment sentiment.

Growth in Advanced Economies is expected to remain relatively subdued, increasing from 1.7 percent in 2023 to 1.8 percent in 2024 and 1.9 percent in 2025, before moderating to 1.8 percent in 2026 and 1.7 percent in 2027. This reflects persistent structural constraints, tighter financial conditions and slower demand conditions across developed markets.

Emerging and Developing Economies are expected to continue to outperform advanced economies and remain the key drivers of global growth. Growth declined from 4.7 percent in 2023 to 4.3 percent in 2024, before improving to 4.4 percent in 2025. However, it is projected to moderate to 3.9 percent in 2026 and recover to 4.2 percent in 2027, reflecting short-term pressures arising from geopolitical risks, commodity price volatility and external financing constraints, followed by a gradual improvement in macroeconomic conditions.

1.1 GDP Growth Across Major Regions

GDP growth across major global regions—including Europe, Latin America & the Caribbean, Middle East & Central Asia and Sub-Saharan Africa—continues to display varied trajectories. The global outlook presents a mixed scenario, with emerging economies continuing to outperform advanced economies.

Note: F = Forecast
Source: IMF World Economic Outlook April 2026 update

Growth across Emerging Market and Developing Economies is projected to moderate from 4.4 percent in 2025 to 3.9 percent in 2026, before recovering to 4.2 percent in 2027, reflecting near-term pressures from global uncertainty, geopolitical risks and tighter financial conditions, followed by a gradual rebound.

Within this, Emerging and Developing Asia is expected to remain the fastest-growing region, although growth is projected to ease from 5.5 percent in 2025 to 4.9 percent in 2026 and 4.8 percent in 2027, reflecting moderation in regional momentum. China's growth is projected to decelerate from 5.0 percent to 4.4 percent and further to 4.0 percent over the period, driven by structural headwinds and softer domestic demand, while India is expected to remain resilient, with growth moderating from 7.6 percent in 2025 to 6.5 percent in 2026 and remaining at that level in 2027, supported by domestic demand and investment activity.

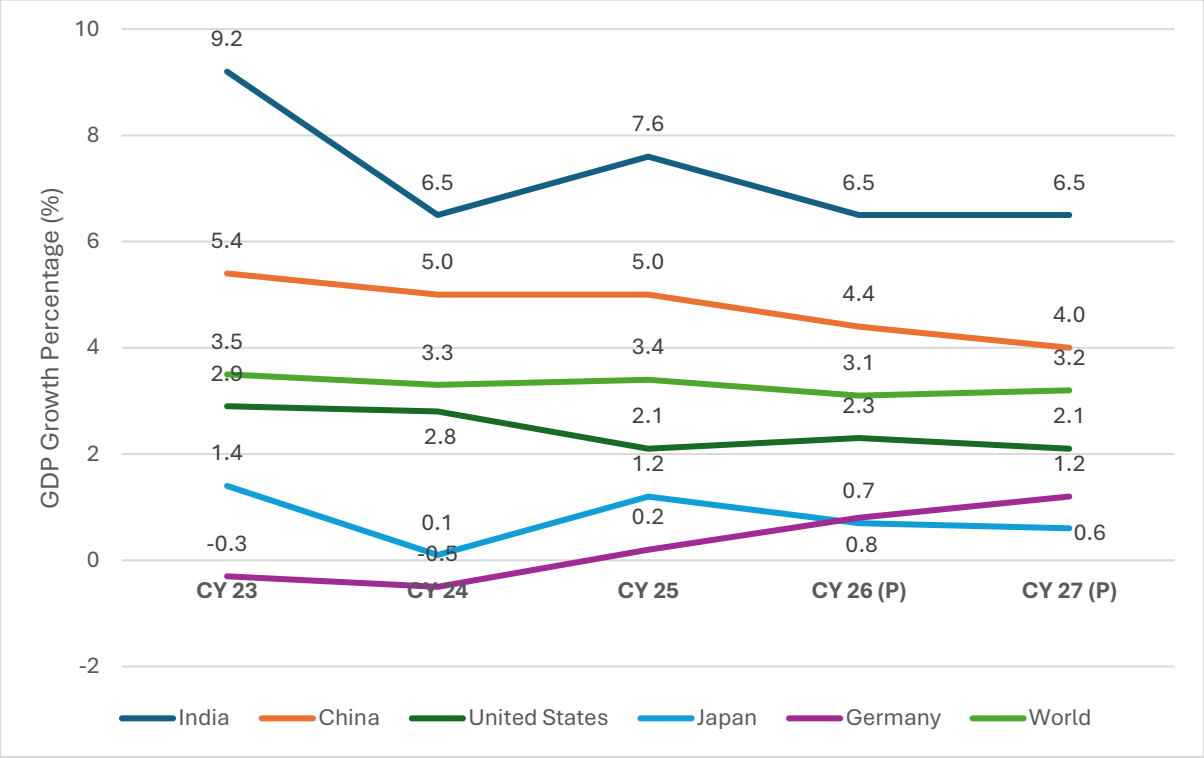

Emerging and Developing Europe is projected to remain relatively stable, with growth at 2.0 percent in 2025 and 2026, improving marginally to 2.1 percent in 2027. Russia is also expected to record modest growth, rising from 1.0 percent in 2025 to 1.1 percent in both 2026 and 2027.

Latin America and the Caribbean is projected to witness moderate growth, easing slightly from 2.4 percent in 2025 to 2.3 percent in 2026, before recovering to 2.7 percent in 2027. Within the region, Brazil's growth is expected to soften from 2.3 percent to 1.9 percent in 2026 before improving to 2.0 percent in 2027, while Mexico is projected to show a stronger rebound, increasing from 0.6 percent in 2025 to 1.6 percent in 2026 and 2.2 percent in 2027.

Growth in the Middle East and Central Asia is projected to slow sharply from 3.6 percent in 2025 to 1.9 percent in 2026, before rebounding significantly to 4.6 percent in 2027, indicating volatility linked to geopolitical conditions and oil market dynamics. Saudi Arabia mirrors this trend, with growth moderating from 4.5 percent in 2025 to 3.1 percent in 2026 before recovering to 4.5 percent in 2027.

Sub-Saharan Africa is expected to remain relatively stable, with growth moderating slightly from 4.5 percent in 2025 to 4.3 percent in 2026 and recovering marginally to 4.4 percent in 2027. Nigeria is projected to improve gradually from 4.0 percent to 4.3 percent over the period, while South Africa is expected to post subdued growth, easing from 1.1 percent in 2025 to 1.0 percent in 2026 before improving to 1.3 percent in 2027. Overall, the projections indicate that while emerging markets face short-term pressures, growth recovery is expected to strengthen in several regions by 2027.

Overall, the outlook indicates that while global growth is expected to soften in the near term, resilience in emerging markets and a gradual recovery thereafter are expected to support global economic momentum over the medium term.

2.3 Overview on Key Demographic Parameters

2.3.1 Population growth

India's economic trajectory and consumption dynamics are closely tied to its demographic shifts. India's population expanded from approximately 0.75 billion in 1984 to 1.45 billion in 2024 and is further reached around 1.47 billion in 2025, consolidating its position as the world's most populous nation. This sustained growth underlines the emergence of a vast labour force and consumer base, which is essential for driving long-term economic growth, supporting rising consumption demand and strengthening the country's overall economic potential.

Source: World Bank Database. Population Data 2025 - Worldometer, Infomerics Analytics & Research

2.3.2 Labour Force in India

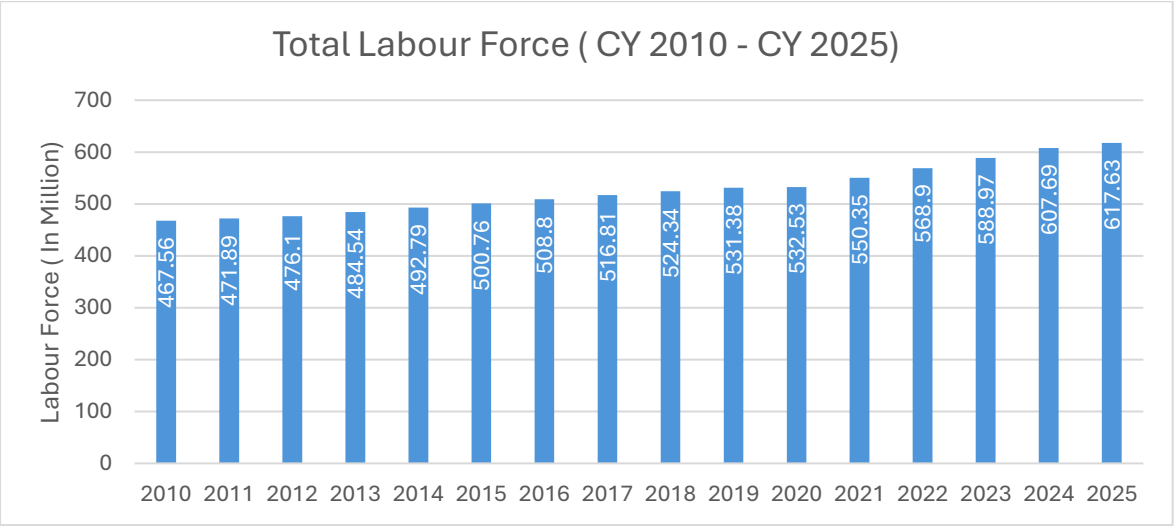

India's labour force has experienced steady growth over the past decade. In 2010, the total labour force was approximately 467.56 million. By 2025, this number had increased to 617.63 million.

This upward trend underscores the expanding working-age population, improving labour force participation and gradual recovery in employment post the pandemic period. The sharp increase observed after 2020 highlights the rebound in economic activity and rising workforce engagement across sectors. However, it also emphasizes the need for sustained job creation to effectively absorb the growing labour pool.

The labour force participation rate (LFPR) has also witnessed variations over time due to changing socio-economic conditions, including urbanization, education levels and sectoral employment shifts.

These trends highlight the importance of implementing policies that not only generate employment opportunities but also improve job quality, productivity and inclusivity across key sectors of the economy.

2.3.3 Disposable Income and Consumer Spending

Gross National Disposable Income (GNDI) represents the total income available to a nation's residents for consumption and saving after accounting for income transfers with the rest of the world. Per Capita GNDI has shown a consistent upward trajectory, rising from INR91,843 in FY14 to INR2,48,572 in FY26 (SAE). In FY25 (FRE), Per Capita GNDI stood at INR2,30,474, which further increased to INR2,48,572 in FY26 (SAE), reflecting a growth of approximately 7.9%. This steady increase indicates that households and businesses had more income at their disposal, which is critical for supporting both consumption and savings: key components of economic resilience and expansion.

The rise in GNDI has translated into higher consumer spending, as reflected in the growth of Private Final Consumption Expenditure (PFCE), which measures the total value of goods and services consumed by households. Per Capita PFCE has also maintained a consistent upward trend, growing from INR51,701 in FY14 to INR1,37,813 in FY26 (SAE). In FY25 (FRE), Per Capita PFCE stood at INR1,27,627, which further increased to INR1,37,813 in FY26 (SAE), reflecting a growth of approximately 8.0%, highlighting strong consumer confidence and robust domestic demand.

2.3 Union Budget FY26-27 Highlights

The Union Budget FY 2026–27, presented by Finance Minister Nirmala Sitharaman, introduces a comprehensive set of measures aimed at stimulating economic growth, enhancing infrastructure and fostering inclusive development. With a focus on sectors such as agriculture, MSMEs, infrastructure, innovation and exports, the budget seeks to create a conducive environment for sustained economic expansion.

- **Capital Expenditure and Infrastructure Development**
  In FY2026-27, the Union Budget has increased the public capex towards to INR 12.2 lakh crore from the previous INR 11.21 lakh crore (3.1% of GDP) which was earmarked in FY 2025–26. To strengthen the confidence of private developers regarding risks during infrastructure development and construction phase, the budget proposed to set up an Infrastructure Risk Guarantee Fund to provide prudently calibrated partial credit guarantees to lenders.

- **Support for MSMEs**
  Recognizing the pivotal role of Micro, Small and Medium Enterprises (MSMEs) in India's economic landscape, the budget introduced a three-pronged approach to support the sector. The budget introduced a dedicated INR 10,000 crore SME Growth Fund as well as proposed to top up the Self-Reliant India Fund set up in 2021, with INR 2,000 crore to continue support to micro enterprises and maintain their access to risk capital. With TReDS, more than INR 7 lakh crore has been made available to MSMEs. To leverage its full potential, the budget further proposed four measures: (i) mandate TReDS as the transaction settlement platform for all purchases from MSMEs by CPSEs, serving as a benchmark for other corporates; (ii) introduce a credit guarantee support mechanism through CGTMSE for invoice discounting on TReDS platform; (iii) link GeM with TReDS for sharing information with financiers about government purchases from MSMEs, encouraging cheaper and quicker financing; (iv) introduce TReDS receivables as asset-backed securities, helping develop a secondary market, enhancing liquidity and settlement of transactions. Moreover, Government will facilitate Professional Institutions such as ICAI, ICSI, ICMAI to design short-term, modular courses and practical tools to develop a cadre of 'Corporate Mitras', especially in Tier-II and Tier-III towns, which will help MSMEs meet compliance requirements at affordable costs.

- **Agriculture Related Schemes**
  To diversify farm outputs, increase productivity, enhance farmers' incomes and create new employment opportunities, the budget announced support schemes related to high value crops such as coconut, sandalwood, cocoa and cashew in coastal areas. Agar trees in Northeast and nuts such as, almonds, walnuts and pine nuts in hilly regions will also be supported. India is the world's largest producer of coconuts.

  About 30 million people, including nearly 10 million farmers, depend on coconuts for their livelihood. To further enhance competitiveness in coconut production, the Budget proposed a Coconut Promotion Scheme to increase production and enhance productivity through various interventions including replacing old and non-productive trees with new saplings/plants/varieties in major coconut growing States. A dedicated programme is proposed for Indian cashew and cocoa to make India self-reliant in raw cashew and cocoa production and processing, enhance export competitiveness and transform Indian Cashew and Indian Cocoa into premium global brands by 2030.
  Further, the Central Government will partner with State Governments to promote focused cultivation and post-harvest processing to restore the glory of the Indian Sandalwood ecosystem. To rejuvenate old, low-yielding orchards and expand high-density cultivation of walnuts, almonds and pine nuts, the budget announced to support a dedicated programme to enhance farmer incomes and in bringing value addition by engaging youth.

  The Union Budget FY 2026–27 presents a balanced approach to economic growth by addressing immediate consumption needs and laying the foundation for long-term sustainability. Through targeted investments in infrastructure, support for MSMEs and sector-specific initiatives, the budget aims to foster an inclusive and resilient economy. These measures are expected to create new opportunities for financial institutions, as the growing demand for investment products will provide avenues for expansion and innovation in the financial services sector.

3. Industry Overview – Processed Food Industry with respect to Jaggery, Khandsari & Instant Premix

3.1 Introduction

The processed food industry represents a significant and evolving component of the agri-food economy, encompassing the transformation of agricultural produce into safe, hygienic and value-added food products that meet modern consumption needs. Within this broader industry, the jaggery industry occupies an important niche, bridging traditional food processing practices with organised and semi-organised food markets. By converting sugarcane juice into a natural sweetener through relatively minimal processing, the jaggery segment supports farm livelihoods, rural enterprises and decentralised production systems, while aligning with growing consumer preference for natural, less refined and culturally familiar food products. As dietary awareness increases and demand for alternative sweeteners rises, jaggery and khandsari gained relevance within the processed food ecosystem.

The jaggery, khandsari and instant premix industry comprises a diverse range of products catering to both traditional and evolving consumer preferences. The segment includes conventional jaggery in solid, powdered, granulated and liquid forms, khandsari sugar as a minimally processed sweetener and instant premixes formulated for the convenient preparation of beverages, desserts and other food products. While jaggery and khandsari serve as staple sweetening agents across households and traditional food applications, instant premixes address the growing demand for convenience, consistency, improved shelf life and ease of preparation among urban consumers, food service establishments and institutional buyers.

Beyond direct consumption, the industry plays a significant role in the processed food value chain by providing a stable market for sugarcane producers, supporting rural livelihoods and employment, encouraging value addition through processing and packaging and reducing post-harvest losses. The increasing adoption of quality standards, mechanised processing, branded offerings and innovative product formats is gradually transforming the sector from a predominantly unorganised, commodity-driven market into a more organised, value-added and quality-focused segment within India's processed food industry.

3.3 Operational Flow Analysis

The jaggery, Khandsari and Instant Premix operates through an integrated multi-stage value chain encompassing sugarcane procurement, juice extraction, clarification, thermal processing, crystallisation, packaging, distribution and by-product utilisation. The efficiency, profitability and product quality within the industry are significantly influenced by the level of operational integration, recovery efficiency, energy optimisation and utilisation of by-products such as bagasse and press mud across various stages of the manufacturing process.

1. **Sugarcane Procurement**
   The value chain commences with procurement of sugarcane from farmers and nearby cane-growing regions. Due to the highly perishable nature of sugarcane and the rapid decline in sucrose content after harvesting, procurement is generally localised and closely integrated with crushing operations. Harvested sugarcane is transported to the manufacturing facility through tractors and trucks, enabling timely processing and minimising recovery losses.

2. **Weighment, Cane Preparation & Handling**
   Upon arrival at the manufacturing facility, sugarcane is weighed at weighbridges to record the quantity received. Thereafter, the cane undergoes preparation activities including chopping, shredding and fibrisation to increase surface area and improve extraction efficiency. Efficient cane preparation supports higher juice recovery and operational productivity.

3. **Juice Extraction & Crushing**
   Prepared sugarcane is crushed through multi-stage milling systems to extract raw juice. This stage represents the core processing activity within the value chain and significantly impacts overall sugar recovery and production economics. During crushing, fibrous residue known as bagasse is generated as a major by-product. Typically, from 100 kg of sugarcane processed, approximately 30–40 kg of bagasse may be generated depending on cane quality and recovery efficiency.

4. **Bagasse Handling & Power Generation**
   Bagasse generated during crushing is conveyed to boilers and utilised as fuel for generation of steam and electricity required for captive consumption within the manufacturing facility. Utilisation of bagasse reduces dependence on external fuel sources and enhances energy efficiency of operations. Surplus bagasse may also be stored and sold to external industries as industrial fuel, thereby creating an additional revenue stream. Further, ash generated from combustion of bagasse is sold to brick manufacturers and construction-related industries, supporting resource optimisation and circular economy practices.

5. **Juice Heating, Liming & Clarification**
   The extracted raw juice undergoes heating and treatment with lime and other clarifying agents to remove impurities and suspended solids. The treated juice is transferred to clarifiers where impurities settle down through sedimentation. This stage is critical in determining the colour, purity, texture and shelf life of the final products. Post clarification, the juice becomes suitable for concentration and crystallisation processes.

6. **Press Mud Generation & By-product Utilisation**
   The impurities separated during clarification are combined with small quantities of bagasse to produce press mud, which emerges as another commercially valuable by-product. Press mud is widely utilised in the agricultural sector as organic manure and soil conditioner owing to its nutrient-rich composition. Effective utilisation of press mud supports waste minimisation and provides incremental revenue opportunities for manufacturers.

7. **Evaporation & Syrup Formation**
   The clarified juice undergoes concentration in multiple-effect evaporators to remove excess moisture and form thick syrup. This controlled evaporation stage improves process efficiency, reduces energy consumption and prepares the syrup for subsequent crystallisation and product manufacturing processes.

8. **Product Manufacturing & Crystallisation**

   a) **Jaggery Powder**
      For jaggery powder production, the thick syrup is concentrated under reduced pressure in vacuum pans followed by controlled crystallisation using slurry. The crystallised mass is cooled in crystallisers to facilitate crystal growth and thereafter processed through centrifugation to separate molasses from jaggery crystals. The crystals are subsequently dried and converted into fine jaggery powder through powdering units. A portion of the jaggery powder produced may also be captively consumed for manufacturing jaggery-based premix products, enabling downstream value addition and product diversification

   b) **Khandsari Sugar**
      For khandsari sugar production, the thick syrup is further concentrated in open pans through controlled heating. Natural crystallisation occurs during gradual cooling without the addition of slurry, resulting in formation of sugar crystals. The crystallised mass is centrifuged to separate molasses, followed by drying through hot and cold air treatment and grading based on crystal size and quality specifications.

c) **Instant Premix**

For instant premix production, jaggery powder, khandsari sugar and other ingredients such as coffee, tea, milk solids, cocoa, spices, flavouring agents or nutraceutical ingredients, depending on the product formulation, are blended in predetermined proportions using automated mixing systems to achieve uniform composition and consistency. The blended mixture undergoes quality testing to ensure homogeneity, moisture content and product stability before being packed into sachets, pouches or bulk packaging formats. Instant premixes are designed to provide convenience, standardised taste, longer shelf life and ease of preparation for consumers as well as institutional and food service customers. The production of instant premixes enables manufacturers to undertake downstream value addition, diversify product offerings, improve realisations and cater to the growing demand for ready-to-use food and beverage products across domestic and export markets.

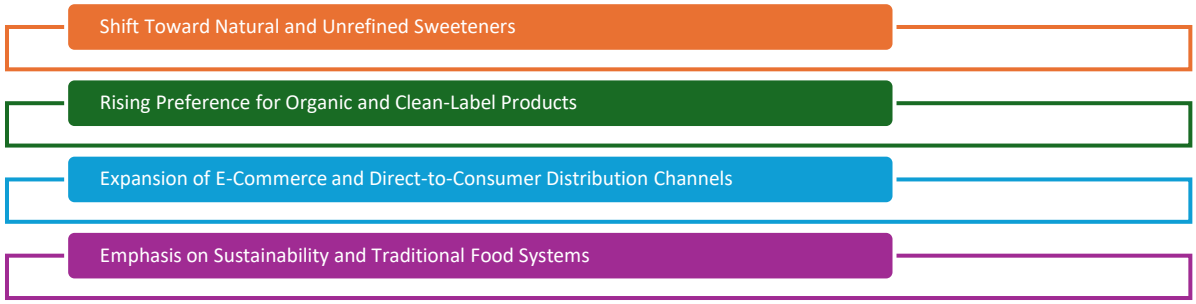

9. **Packaging, Storage & Dispatch**

Finished jaggery powder and khandsari sugar are packed in bulk packaging formats and stored under controlled dry conditions to maintain product quality, texture and shelf life. The products are thereafter dispatched primarily to wholesalers, institutional buyers and B2B customers.

10. **Distribution & Marketing**

Distribution of jaggery powder and khandsari sugar takes place through diversified channels including wholesalers, agricultural mandis, food processors, sweet manufacturers, institutional buyers, hotels, caterers and retail distributors. Increasing health consciousness and preference for traditional sweeteners have also supported growth through organised retail and online distribution channels. Product pricing across channels is influenced by sugarcane availability, seasonality, recovery rates, regional demand-supply dynamics, quality grades, packaging formats and transportation costs.

3.4 Market Trends in Jaggery, Khandsari & Instant Premix

The jaggery, khandsari & Instant Premix segment is undergoing a gradual transformation, driven by evolving consumer preferences, increasing awareness of natural and minimally processed food products and the growing emphasis on sustainable and traditional sweeteners. While jaggery and khandsari have historically been consumed primarily in specific geographies, its relevance and visibility in international markets are expanding as part of broader trends within the global food and sweetener ecosystem.

1. **Shift Toward Natural and Unrefined Sweeteners**

The food manufacturing sector presents a significant opportunity for organised manufacturers of jaggery, khandsari and instant premixes. As food processing companies increasingly adopt clean-label formulations and reduce dependence on refined sugar, natural sweeteners are being incorporated into bakery products, confectionery, dairy products, beverages, breakfast cereals, snack bars and traditional food preparations. At the same time, instant premixes formulated using jaggery or khandsari are witnessing growing demand from consumers seeking convenience without compromising on natural ingredients.

- Consistent product specifications, including controlled moisture, microbial quality, sweetness profile and year-round availability, have become key procurement criteria for food manufacturers and institutional buyers.
- The use of jaggery and khandsari enables manufacturers to position products with claims such as "No Refined Sugar", "Naturally Sweetened" and "Traditional Ingredients", while instant premixes provide ready-to-use solutions aligned with modern consumption patterns and convenience-oriented lifestyles.

2. **Rising Preference for Organic and Clean-Label Products**
   Consumers are increasingly preferring packaged, hygienically processed and organically certified jaggery, khandsari and instant premix products that offer transparency in sourcing and manufacturing practices. This trend is supported by growing health awareness, preference for minimally processed foods and increasing demand for products free from artificial additives and preservatives. Manufacturers are strengthening their market positioning through quality certifications, improved packaging and traceability, while introducing premium product variants targeted at health-conscious consumers and organised retail channels.

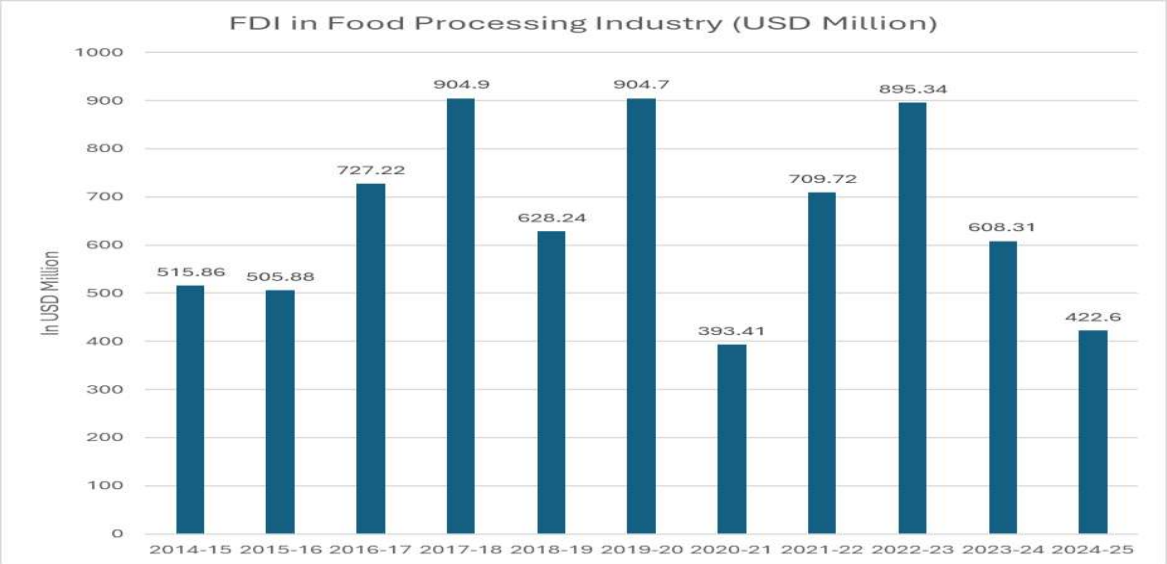

3. **Expansion of E-Commerce and Direct-to-Consumer Distribution Channels**
   The rapid expansion of organised retail, e-commerce platforms, quick commerce and direct-to-consumer distribution channels has significantly improved market access for branded jaggery, khandsari and instant premix products. These channels provide wider geographical reach, enhanced product visibility and greater consumer awareness regarding ingredients, nutritional benefits and quality certifications. The digital marketplace has also enabled manufacturers, including small and medium enterprises, to expand beyond regional markets and cater to a growing urban customer base seeking premium and convenience-oriented food products.

4. **Emphasis on Sustainability and Traditional Food Systems**
   Growing emphasis on sustainable agriculture, responsible sourcing and traditional food systems has strengthened the market positioning of jaggery, khandsari and related value-added products. The industry supports rural livelihoods through sugarcane cultivation and local processing while promoting efficient utilisation of by-products such as bagasse and press mud. The combination of traditional manufacturing practices, resource optimisation and increasing adoption of environmentally responsible processing technologies is enhancing the long-term sustainability of the industry and reinforcing consumer preference for naturally processed sweetening products.

4. Indian Food Processed Industry w.r.t Jaggery, Khandsari & Instant Premix

The Indian food processing industry represents a critical link between agriculture and consumers, contributing significantly to value addition, employment generation and reduction of post-harvest losses. The sector encompasses a wide range of activities including processing, preservation, packaging and distribution of agricultural and food products. India's large agricultural base, diverse raw material availability, expanding domestic consumption and increasing export opportunities support the growth of the industry. The Government of India has undertaken policy initiatives to encourage investments in this sector, including permitting 100% foreign direct investment (FDI) under the automatic route in food processing and in trading of food products manufactured or produced in India. These measures, along with infrastructure development and regulatory support, have enhanced the attractiveness of the food processing industry for domestic and foreign investors.

4.1 Foreign Direct Investments in Food Processing Industry

4.2 Indian Jaggery, Khandsari & Instant Premix Segment

The jaggery, khandsari and instant premix industry is fundamentally dependent on sugarcane as its primary raw material and forms an important value-added segment within the sugarcane processing ecosystem. Jaggery and khandsari are manufactured directly from freshly extracted sugarcane juice through clarification, concentration and controlled crystallisation processes, while instant premixes utilise jaggery, khandsari or their derivatives as key ingredients in the formulation of ready-to-use food and beverage products. Accordingly, the availability, quality and pricing of sugarcane have a direct bearing on the production capacity, cost structure and profitability of manufacturers across these product segments.

Production of Sugarcane / Key Raw Materials

Source: UPAG- Department of Agriculture & Farmers Welfare, Infomerics Analytics and Research.
Note: Data for the year FY 2026 is of 2nd Advance Estimates.

Sugarcane production in India has exhibited an overall upward trend during the period from FY 22 to FY 26, despite interim fluctuations, with both yield levels and cultivation area broadly supporting production performance. Production increased from approximately 4,395 lakh tonnes in FY 22 to about 4,905 lakh tonnes in FY 23, despite a marginal decline in yield from around 84,906 kg per hectare to 83,349 kg per hectare, supported by a significant expansion in cultivation area from approximately 51.75 lakh hectares to 58.85 lakh hectares, indicating favourable agro-climatic conditions and increased acreage.

In FY 24, production declined to approximately 4,532 lakh tonnes, accompanied by a sharper reduction in yield to about 78,953 kg per hectare and a contraction in cultivation area to approximately 57.4 lakh hectares, reflecting the adverse impact of weather variability and sub-optimal rainfall conditions.

Production levels stabilised marginally in FY 25 at around 4,546 lakh tonnes, supported by a recovery in yield to approximately 83,416 kg per hectare, although cultivation area declined further to about 54.5 lakh hectares, partially offsetting the gains from improved productivity.

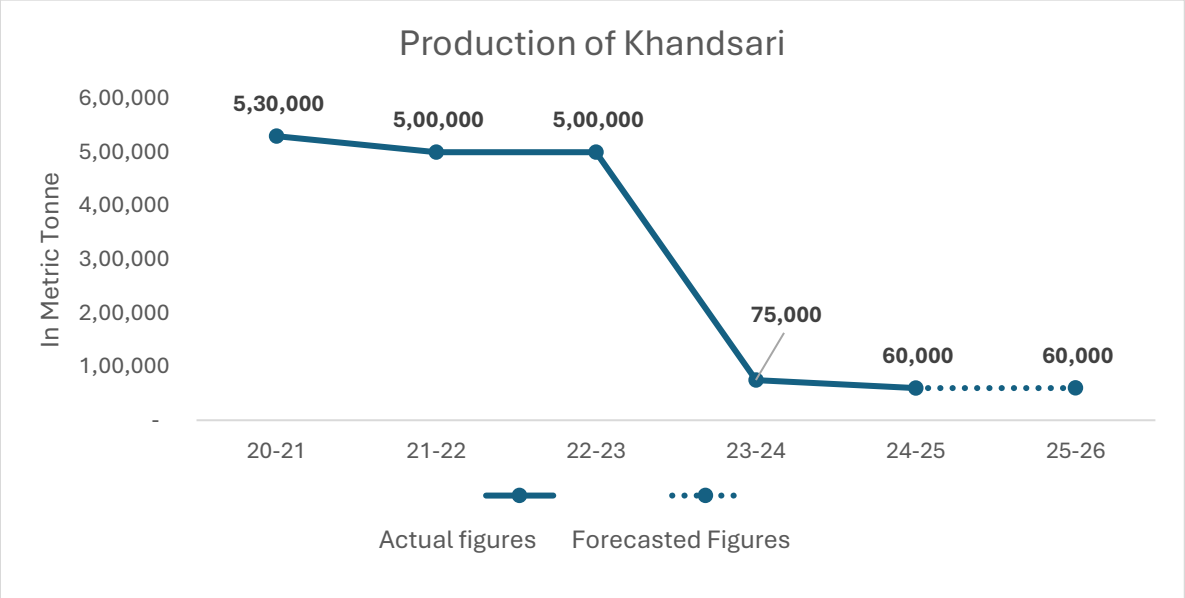

In FY 26, sugarcane production is estimated to increase significantly to about 5,002 lakh tonnes, representing the highest level during the period under review, alongside improvement in yield to approximately 85,495 kg

per hectare and expansion in cultivation area to about 58.51 lakh hectares, indicating recovery in agricultural productivity supported by improved climatic conditions and increased acreage under cultivation.

4.3 Production Trends

(A) Khandsari

Khandsari refers to a form of traditional, partially refined sugar obtained from sugarcane juice through a simple process of clarification, boiling and crystallization without undergoing full-scale refining as in plantation white sugar. It is characterized by its off-white to light brown colour, presence of residual molasses and a relatively coarse crystal structure.

Source: USDA FAS Sugar Annual Reports.

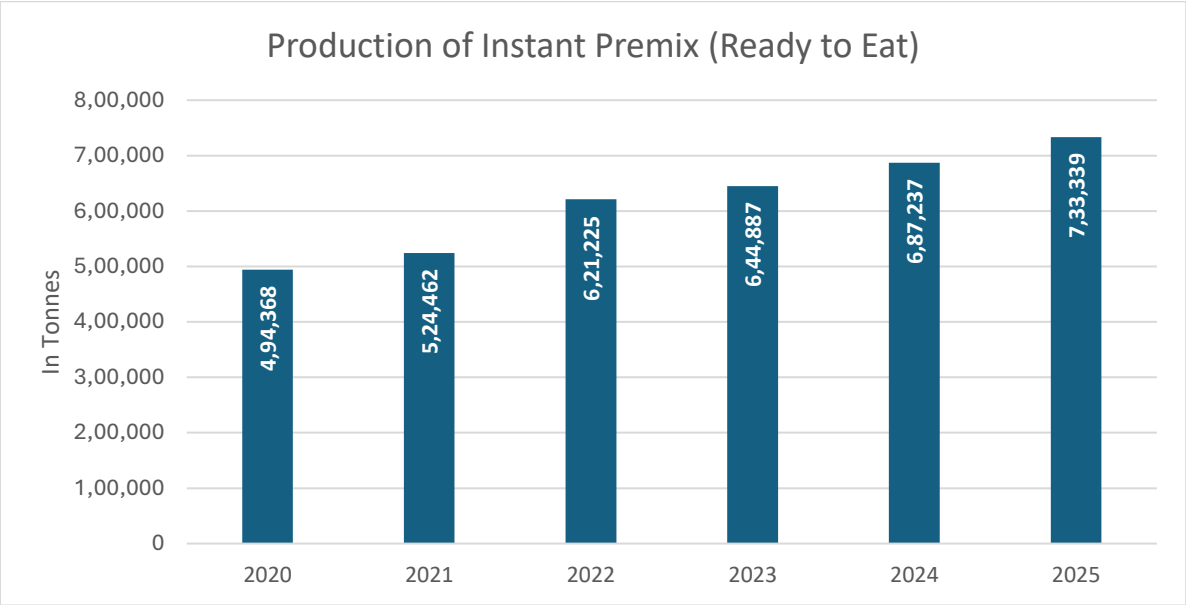

The production of khandsari witnessed a declining trend. Production stood at approximately 5,30,000 metric tonnes in FY 2020-21, which marginally declined to 5,00,000 metric tonnes in FY 2021-22 and remained stable in FY 2022-23. However, production dropped significantly to 75,000 metric tonnes in FY 2023-24, representing a substantial contraction compared to previous years.

The decline in khandsari production is because of changing consumer preferences, increasing health consciousness and growing demand for natural and minimally processed sweeteners such as jaggery powder and specialty sugarcane-based products. Industry participants are increasingly focusing on higher-margin value-added products, product diversification and organised processing capabilities, resulting in a gradual shift away from conventional khandsari production. Despite the moderation in production volumes, the khandsari segment continues to maintain relevance within the broader sugarcane processing industry due to its strong presence in regional markets, traditional consumption patterns and usage across food processing applications.

(B) Instant Premix (Ready to Eat)

The instant premix and ready-to-eat (RTE) segment constitute an important component of the food processing industry and addresses the increasing demand for convenient, consistent, and time-efficient food solutions. Instant premixes are semi-processed food products designed for quick preparation, requiring minimal cooking or simple additions such as water or milk, including products such as instant jaggery-based coffee or tea premixes and instant rice kheer premixes. In contrast, ready-to-eat products are fully processed and packaged foods intended for direct consumption without any further preparation. These product categories rely on advanced food processing, preservation, and packaging technologies to extend shelf life while maintaining product quality, taste, and nutritional attributes.

Source: CMIE, Infomerics Analytics and Research.

The production of instant (ready-to-eat) food in India has exhibited a sustained upward trend over the period from FY2019-20 to FY2024-25, increasing from approximately 4,94,000 tonnes to about 7,33,000 tonnes, reflecting a growth of nearly 48% over six years. The year-on-year progression indicates steady capacity expansion and rising consumer demand, with moderate growth observed in the initial years followed by sharper increases during FY2021-22 and continued incremental gains thereafter. This consistent rise underscores the structural shift in consumer food consumption patterns towards convenience-oriented products, driven by urbanisation, time-constrained lifestyles, increasing nuclear households and greater workforce participation. The absence of significant volatility over the period suggests demand resilience and maturation of the ready-to-eat segment within the packaged food industry. Overall, the production trend highlights strong long-term growth visibility for instant food products in India, supported by improving distribution reach, product acceptance and ongoing investments in food processing infrastructure.

4.4 Trade Dynamics of Jaggery & Khandsari

The trade dynamics of the jaggery and khandsari industry are influenced by domestic production, raw material availability and export demand, with trade flows shaped by sugarcane output, product quality, pricing competitiveness and regulatory compliance. Export demand for natural, minimally processed and traditional sweeteners, including packaged, branded and organic variants of jaggery and khandsari, continues to support international trade. The industry's trade performance is further influenced by seasonal sugarcane availability, adherence to food safety and quality standards, certification requirements, and the ability of manufacturers to ensure consistent product quality, packaging and timely supply to domestic and overseas markets.

The Indian trade profile of jaggery and khandsari in CY 2025 reflects a geographically concentrated export base alongside a highly skewed import structure.

On the export front, total exports stood at USD 2,133.97 million, with a diversified destination mix. Key export markets include Libya (13%), Sudan (12%) and Somalia (12%), followed by Djibouti (9%) and Sri Lanka (7%). Notably, the "Others" category constitutes the largest share at 47%, indicating a fragmented demand base across multiple smaller markets. The concentration of exports towards African and neighbouring developing economies suggests demand driven by traditional consumption patterns and price competitiveness.

On the import side, total imports were recorded at USD 1,231.77 million, exhibiting a highly concentrated structure. Brazil dominates global imports with a significant share of 98.06%, indicating near-monopolistic import dependence. Other importing countries such as the United Arab Emirates (0.66%), France (0.40%), Germany (0.29%) and Poland (0.23%) contribute marginally to overall imports, reflecting limited penetration in developed markets.

Overall, while exports demonstrate moderate diversification across regions, the import landscape remains heavily concentrated, highlighting a structural imbalance in global trade dynamics. This concentration risk on the import side may expose the trade ecosystem to demand-side volatility originating from a single dominant market.

Detailed Driver Commentary

1. **Increasing substitution of refined sugar in food formulations**
   Food manufacturers, bakeries, beverage producers and institutional kitchens are increasingly substituting refined sugar with jaggery, Khandsari & instant premix in selected applications to cater to demand for natural sweeteners. Due to its ease of handling and consistency is particularly gaining acceptance as an input in processed foods, snacks and ready-to-mix products.
2. **Rising demand for instant premix and ready-to-eat**
   It reflects a structural shift in eating habits. Consumers are increasingly opting for quick meals and frequent snacking, making processed foods an integral part of daily consumption rather than an occasional choice.
3. **Young demographic profile and evolving taste preferences**
   The processed food industry is accelerating category expansion. A large youth population is more experimental and open to trying global cuisines, innovative formats and diverse flavours, thereby increasing demand for processed food products.
4. **Urbanization and evolving lifestyles**
   These are the most fundamental drivers of the processed food industry in India. As city living becomes more fast-paced and time-constrained, consumers are increasingly moving away from traditional cooking toward convenient food solutions that fit into their daily routines.
5. **Sustainability and circular economy alignment**
   Jaggery, Khandsari and premix sector demonstrates alignment with sustainability principles through utilisation of by-products such as bagasse, molasses and press mud. Captive energy generation, organic fertiliser usage and waste monetisation contribute to lower environmental impact and improve overall economic viability, making this processing attractive in sustainability-focused investment environments.
6. **Product innovation and premiumization**
   These initiatives are helping companies stay competitive and relevant. Continuous introduction of new variants, healthier alternatives and premium offerings is enabling brands to cater to evolving consumer expectations and drive higher value realization.
7. **Energy Availability Constraints Driving Low-Cooking Food Consumption**
   In the short term, constraints in cooking fuel availability have led to increased consumption of ready-to-cook and no-cook food products as households seek energy efficient meal solutions. While the impact of such supply driven factors is expected to moderate over time, increased consumer exposure to convenience foods is likely to support sustained adoption alongside broader lifestyle-driven demand trends.

5.2 Market Restraints

The industry operates within an environment that presents several structural and operational constraints. The key restraints are:

Market Challenges and Impact Assessment

Detailed Overview

1. **Volatility in Raw Material Prices**
   Dependence on agricultural inputs such as sugarcane exposes manufacturers to climate variability, seasonality and commodity price fluctuations, impacting input costs and margin stability.

2. **Rising Input, Packaging & Logistics Costs**
   Inflation in fuel prices, packaging materials and transportation costs can compress margins, particularly in price sensitive segments.

3. **Regulatory Compliance & Food Safety Norms**
   Compliance with FSSAI regulations, labelling standards and traceability requirements increases operational complexity and cost, especially as regulatory standards continue to evolve.

4. **Managing Diverse Regional Tastes**
   India's heterogeneous culinary landscape necessitates continuous localisation of products, which adds complexity to product development and supply-chain management.

5. **Quality Consistency and Shelf-Life Challenges**
   The Jaggery, Khandsari & instant premixes are inherently hygroscopic and sensitive to moisture, making it vulnerable to quality deterioration, microbial spoilage and shorter shelf life if not properly processed and packaged. Ensuring consistent quality across batches requires enhanced processing controls and packaging solutions, increasing operational costs.

6. Government Initiatives and Policy Support

The processed food industry in India has benefited from sustained policy support from the Government of India aimed at strengthening food processing infrastructure, improving supply-chain efficiency, encouraging formalisation and enhancing global competitiveness. These initiatives are as follows:

1. **Production Linked Incentive Scheme for Food Processing Industry (PLISFPI)**
   The Production Linked Incentive Scheme for Food Processing Industry (PLISFPI) was approved by the Union Cabinet in 2021. The duration of the scheme will be six years i.e. 2021-22 to 2026-27. It aims to create global food manufacturing champions and promote Indian processed food brands internationally. The scheme incentivises incremental sales and capacity expansion in segments such as ready-to-cook foods, processed fruits & vegetables, marine products, dairy products and millet-based foods, along with dedicated support for branding and marketing abroad.

2. **Financial and Credit Support Measures**
   A INR 2,000 crore special fund has been created with NABARD to provide affordable credit for food parks, agro-processing units and related infrastructure projects. Food processing and cold chain activities are eligible for priority sector lending, improving access to institutional finance. Tax incentives such as profit-linked deductions under Section 80-IB and investment-linked deductions under Section 35-AD of the Income Tax Act support capital investment in food processing and packaging infrastructure.

3. **Scheme for Creation / Expansion of Food Processing and Preservation Capacities (CEFPPC)**
   This scheme was launched by MOFPI in 2017. It provides financial assistance for setting up, expanding or modernising food processing units, including those engaged in ready-to-eat, ready-to-cook, bakery, snack, dairy, fruit and vegetable processing and other processed food categories. The scheme supports induction of modern technology, improves processing efficiency and enhances shelf life, thereby strengthening the organised processed food ecosystem.

4. **Package Scheme of Incentives (PSI) 2019 – Government of Maharashtra**
   Under the PSI 2019 framework, eligible industrial units engaged in agro and food processing activities are entitled to avail various incentives including Industrial Promotion Subsidy (IPS) linked to reimbursement of State Goods and Services Tax (SGST), interest subsidy, power tariff subsidy, electricity duty exemption, technology upgradation assistance, incentives for cleaner production measures, quality certification support, patent registration subsidy, and incentives relating to energy efficiency, water conservation, water audit and energy audit. The scheme also seeks to strengthen industrial infrastructure and improve ease of doing business by reducing operational costs and encouraging adoption of advanced manufacturing technologies.

7. PESTEL Analysis

The PESTEL framework provides a structured assessment of the external macro environmental factors that influence the industry's operating landscape. It examines the political, economic, social, technological, environmental and legal dimensions that collectively shape industry performance, regulatory evolution and strategic direction. This analysis enables a comprehensive understanding of the opportunities and challenges impacting market stability, investment potential and long-term sectoral growth.

9.2 Barriers to Entry

The processed food industry continues to attract new entrants due to growing demand and evolving consumption patterns, the sector is characterised by several structural, regulatory and operational barriers that influence the ease with which new players can establish and scale their operations. These are as follows:

1. **Regulatory Compliance and Food Safety Requirements**
   Compliance with statutory standards prescribed by regulatory authorities requires investment in quality control systems, food testing, documentation and periodic audits. These requirements increase complexity and cost for new entrants, particularly those lacking prior experience in regulated food manufacturing.

2. **Supply Chain and Raw Material Sourcing**
   Reliable sourcing of agricultural raw materials with consistent quality is critical for processed food manufacturing. New entrants may lack established supplier relationships, procurement systems or backward linkages, exposing them to input price volatility and supply disruptions. Building stable supply chains requires time, scale and operational experience.

3. **Product Development and Technical Capabilities**
   Product formulation, shelf-life stability, taste consistency and packaging suitability require technical expertise and testing. New entrants may encounter challenges in achieving scalable production with consistent quality, particularly in ready-to-eat, ready-to-cook and perishability-sensitive categories.

4. **Regulatory Changes and Compliance Risk**
   Periodic changes in food safety norms, labelling requirements and taxation may increase compliance costs and operational uncertainty. New entrants with limited compliance infrastructure may find it challenging to adapt quickly to evolving regulatory expectations.

9.7 Company Positioning

Shree Siddhivinayak Greentech Industries Limited is positioned as a vertically integrated agro-processing company operating in the natural sweeteners and value-added traditional foods segment, with a primary focus on jaggery, jaggery powder, khandsari sugar and jaggery-based pre-mix products. The Company operates across the value chain, encompassing farmer-linked procurement, in-house processing, by-product utilisation, branding and multi-channel distribution, allowing it to exercise greater control over quality, traceability and cost structures as compared to conventional jaggery manufacturers.

Within the fragmented jaggery and traditional sweeteners industry, it distinguishes itself through a diversified product and end-use mix, serving both Business-to-Business (B2B) customers such as wholesalers, distributors and institutional buyers, as well as Business-to-Consumer (B2C) customers through branded offerings under its "FeelGuddy" brand. While bulk sales of jaggery powder and khandsari sugar provide scale and steady volumes, it's branded jaggery-based pre-mix portfolio (including instant beverage and dessert mixes) enables participation in the higher-margin convenience food segment aligned with evolving consumer preferences.

The Company's positioning is further strengthened by its farmer-centric and backward-linked operating model. Direct engagement with farmers, supported by an in-house sugarcane seed nursery, enables access to consistent quality raw material while promoting better agronomic practices and long-term sourcing stability. Backward integration is complemented by effective by-product monetisation, wherein bagasse, molasses and press mud generated during processing are utilised or sold, contributing to revenue diversification and operational efficiency.

From a differentiation standpoint, it focuses on natural, minimally processed and chemical-free alternatives to refined sugar, aligning its product philosophy with increasing consumer preference for clean-label and traditional ingredients. Its manufacturing processes emphasise standardisation, hygiene and moisture-controlled packaging, supporting product consistency and shelf life, which are key requirements for institutional buyers and organised retail channels. The "FeelGuddy" brand positions it in the emerging intersection of traditional foods and modern convenience formats, allowing it to extend the relevance of jaggery into contemporary consumption occasions.

Sustainability forms a structural element of the it's positioning. It follows Environmental, Social and Governance (ESG)-oriented practices through renewable energy use from bagasse, waste minimisation, farmer engagement initiatives and responsible manufacturing practices. These initiatives, combined with compliance-oriented governance frameworks, support the Company's objective of building a responsible, scalable and resilient business model, capable of long-term value creation for farmers, customers and other stakeholders.

Overall, the Company is positioned as a reliable supplier of natural sweeteners and value-added jaggery-based products, differentiated by vertical integration, product diversification, farmer linkage, branded retail presence and sustainability-linked operations, rather than competing solely on price or commoditised volume within the traditional jaggery industry.

10. Future Outlook

The Indian processed food industry is expected to grow at a CAGR of 6.59% between 2025 and 2035, reflecting healthy growth and structurally driven expansion supported by health consciousness, urbanisation and rising disposable incomes. Demand growth is expected to be led by natural sweetener's, ready-to-eat and instant premix foods driven by time constrained lifestyles, increasing nuclear households and higher workforce participation, particularly in urban and semi-urban areas. Traditional processed food categories such as jaggery, khandsari sugar (Natural Sweeteners) and regional snacks are expected to retain relevance, supported by strong cultural consumption habits and increasing adoption of branded & hygienically packaged products.

Health-oriented processed foods, including instant jaggery rice kheer, jaggery laddoo, low-sugar and plant-based offerings are expected to witness relatively faster growth as consumer awareness around nutrition and food safety continues to increase. Distribution is likely to evolve further with modern trade, e-commerce and quick-commerce platforms gaining incremental share alongside general trade, improving accessibility and consumption frequency. Government initiatives supporting food processing, cold-chain infrastructure and formalisation of micro food enterprises are expected to continue strengthening the sector's supply-side ecosystem.

While the processed food may be exposed to factors such as input cost volatility, competitive intensity and evolving regulatory and sustainability requirements, these are not expected to materially hinder its growth trajectory. The essential nature of food consumption, supported by India's large domestic market, regional diversity and significant scope for product innovation, continues to underpin stable and resilient demand. Overall, the processed food industry is expected to remain a key growth segment within India's FMCG sector with sustained long-term expansion driven by convenience, affordability and evolving consumer preferences.

BUSINESS

Our Company is engaged in the manufacture of Jaggery Powder & Khandsari Sugar from sugarcane through the crushing and clarification process. Further our Company is also engaged in manufacturing of value-added food products i.e., Jaggery based pre-mixes and our Company also operates nursery for cultivation of Cane Seeds.

Jaggery Powder: Unlike refined white sugar, Jaggery is minimally processed, so it retains some minerals like iron, potassium and calcium. It usually has a golden-brown to dark brown color and a rich, caramel-like flavor. In Indian cuisine, Jaggery (often called gur) is used in both sweet dishes (like desserts) and savory foods, as well as in drinks. It can come in solid blocks, powder or paste form. Our Company manufactures Jaggery in powder form. Our Company operates in the Business-to-Business ("B2B") segment with respect to these products.

Khandsari Sugar: Khandsari Sugar is a traditional, unrefined Indian sugarcane based sugar. Unlike regular white sugar, which is processed and bleached with chemicals like sulphur, Khandsari Sugar is minimally processed. It is usually yellowish in color and has caramel-like flavor. This allows Khandsari Sugar to retain trace minerals (like calcium and iron). Khandsari sugar is known to have a slightly lower glycemic index. Khandsari Sugar is manufactured in crystal form. Khandsari Sugar can be used as replacement to processed white sugar. Our Company operates in the Business-to-Business ("B2B") segment with respect to these products.

By Products: During the course of manufacturing Jaggery Powder and Khandsari Sugar, by-products and residues such as molasses, bagasse, press mud and ash are generated. Our Company operates in the Business-to-Business ("B2B") segment with respect to these products.

Value-Added Food Products:
Our Company is engaged in the manufacturing of Jaggery-based premix products, which are value-added convenience food products prepared using Jaggery Powder as a key ingredient. These products are marketed under our Company's brand Feel Guddy and are sold in consumer packs of 250 grams and 500 grams through our Company's Sales & Outreach Office for Pre-mix Product in Pune and online sales channels, including the Company-managed website, Amazon and Meesho. Accordingly, Our Company operates in the Business-to-Consumer ("B2C") segment with respect to these products.

Nursery:

Our Company has implemented backward integration measures by cultivating sugarcane seed in an on-site nursery (i.e., nursery located on the factory land) to support the availability and quality of sugarcane used in its operations.

- **Ensuring reliable raw material supply:** Sugarcane is a seasonal crop and the quality of the Sugarcane is measured on the basis of the yield of Sugar content in the said crop, which directly impacts the production of Jaggery Powder/ Khandsari Sugar. By cultivating healthy cane seeds and making the same available to the farmers, our Company is trying to implement a mechanism to manage its future sugarcane purchase which will happen in the FY 26-27 and onwards. Wherein the sugarcane which shall be purchased in the upcoming season, will be of higher quality.
- **Commercial sale of seed material:** The nursery also functions as a revenue-generating activity by selling sugarcane seed to farmers as an agricultural input.
- **Extension and ecosystem development:** As a backward integration process, nursery is part of "outgrower support" helping build a more productive and sustainable sugarcane-growing ecosystem. This will also benefit farmers and strengthen our company's relationships with the farmers.

Seasonal Nature of Operations

Our Company's manufacturing operations are seasonal in nature and are undertaken during the sugarcane crushing season. The sugarcane crushing season is the period each year when sugar mills process harvested sugarcane to extract juice and produce Sugar, Jaggery and other byproducts. During this season, farmers harvest mature sugarcane, trucks or carts transport the sugarcane to sugar mills, the mills "crush" the sugarcane using heavy rollers to squeeze out the juice, the juice is then processed into sugar and related products. In India, the crushing season usually starts around October-November and continues till April-May. The exact timing depends on climate, sugarcane variety, rainfall and the geographical location of harvest. Sugarcane begins losing sugar content soon after harvest, so our Company try to process it as quickly as possible. To handle the huge volume of sugarcane arriving from farms, our factory usually operates continuously on 24-hour basis in shifts until the season ends. *For risk associated with respect to seasonal nature of operations kindly refer to Risk Factor No 4 mentioned in Section titled 'Risk Factors' on page no. 27 of this Red Herring Prospectus.*

OUR MANUFACTURING PROCESS FLOW

MANUFACTURING CHART:

Common Process for Jaggery Powder and Khandsari Sugar

a) **Sugarcane Handling & Preparation System:**
Sugarcane received at the factory is unloaded using hydraulic tipplers or cranes and conveyed via the feeder table to the carrier. It is then chopped into smaller pieces using cutters/choppers and levelled through levellers. Thereafter, the sugarcane is processed through fibrizers, which shred and open the sugarcane fibres into fine form, thereby increasing the surface area for efficient juice extraction in the milling section.

b) **Juice Extraction (Milling Section):**
The prepared sugarcane is passed through a series of roller mills where hydraulic pressure is applied on the top rollers to extract juice. Hot imbibition water (approximately 65–75°C), i.e., the addition of hot water between milling stages to wash out residual juice from bagasse, is sprayed at intermediate stages to improve extraction efficiency. The extracted juice is *collected* as raw juice, while the remaining fibrous residue is discharged as bagasse.

c) **Bagasse Handling & Power Generation:**
Bagasse from the milling section is conveyed to the boiler house through conveyors/elevators, where it is used as fuel for steam generation. The steam produced is utilised for power generation through turbines. Excess bagasse is stored in the bagasse yard and sold to other industries.

d) **Juice Heating, Liming & Clarification:**
The raw juice is heated and treated with a controlled quantity of lime to adjust pH and facilitate coagulation of impurities. The treated juice is then fed into a clarifier, where impurities settle as press mud. The clarified juice is transferred to the evaporation stage.

e) **Press Mud Handling:**
During clarification, settled impurities are removed from the bottom of the clarifier as semi-liquid press mud. The press mud is mixed with bagasse to improve handling and reduce moisture content and is subsequently sold as organic manure.

f) **Evaporation & Syrup Formation:**
Clarified juice is concentrated in evaporators by controlled boiling. Water is removed and the juice is converted into thick syrup collected in a common supply tank.

It is herewith stated that our manufacturing facility is set up in such a manner that it can produce either Jaggery Powder or Khansari Sugar at any given point in time.

Manufacturing process for Jaggery Powder

a) **Vacuum Pan Crystallization:**
Syrup is concentrated under reduced pressure in a vacuum pan. Sugar crystal slurry is added to initiate controlled crystallization. The mass is gradually cooled in crystallizers to allow crystal growth while maintaining Jaggery characteristics.

b) **Centrifugation and Molasses Separation:**
The crystallized mass is transferred to centrifuge machines, where centrifugal force separates: (a) Molasses, which is collected in molasses storage tanks as a by-product and (b) Jaggery crystals, which are sent for further processing.

c) **Jaggery Powder Formulation and Packing:**
Separated Jaggery crystals are processed into powder form. The finished Jaggery Powder is packed in 30 kg food-grade bags.

d) **B2C segment:**
Part of the Jaggery Powder manufactured is captively used for the products under B2C segment.

Manufacturing process for Khandsari Sugar

a) **Open Pan Concentration:**
Syrup from the supply tank is further concentrated in open pans through direct heating.

b) **Natural Crystallization:**
Crystallization is carried out through controlled cooling, without the use of slurry, enabling the natural and gradual formation of sugar crystals.

c) **Centrifugation & Molasses Separation:**
The crystallized mass is fed into centrifuge machines to separate (a) Molasses, which is collected and stored as a by-product and (b) Khandsari Sugar crystals, which proceed to drying and grading.

d) **Drying, Grading & Packing:**
Sugar crystals are dried using hot and cold air treatment, graded by size and packed in 50 kg bags for storage and sale.

Depreciation on tangible fixed assets is provided on the Straight Line Method (SLM) over the useful lives of the assets estimated by the management. Depreciation on additions to fixed assets is provided on a pro-rata basis from the date of acquisition/installation, and on assets sold, discarded or demolished during the year, is provided up to the date on which such assets are sold, discarded or demolished.

The useful lives adopted by the Company in respect of certain classes of assets are different from those prescribed under Part C of Schedule II to the Companies Act, 2013. The useful lives have been determined based on technical evaluation carried out by the management, taking into consideration the nature of the assets, the estimated usage of the assets, the operating conditions, past history of replacement, anticipated technological changes and maintenance support. The management believes that the useful lives as adopted best represent the period over which the assets are expected to be used.

The useful life of the Assets has been taken as below;

Type of Assets	Useful life
Buildings	40 years
Plant and Equipment	35 years
Furniture & Fixture	15 years
Office Equipment	5 years
Computers	3 years

e. Impairment of Assets

At each balance sheet date, the management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset. Reversal of impairment loss is recognised as income in the statement of profit and loss.

f. Investment

Long-term investments and current maturities of long-term investments are stated at cost, less provision for other than temporary diminution in value. Current investments, except for current maturities of long-term investments, comprising investments in mutual funds, government securities and bonds are stated at the lower of cost and fair value.

g. Inventories

Raw materials are carried at the lower of cost and net realisable value. Cost is determined on a weighted average basis for all categories of Inventories. Purchased goods-in-transit are carried at the lower of cost and net realisable value. Work-in-progress is carried at the lower of cost and net realisable value. Stores and spare parts are carried at lower of cost and net realisable value. Finished goods produced or purchased by the Company are carried at lower of cost and net realisable value. Cost includes cost of purchase, direct material and labour cost and a proportion of manufacturing overheads, as applicable.

The valuation for inventories is as follows;

Classification	Valuation Policy
Finished Goods	At lower of cost or net realizable
Raw Material	At lower of cost or net realizable
WIP	At lower of cost or net realizable
Stores and spare parts	At lower of cost or net realizable

h. Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amount of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

i. Revenue recognition

Sale of goods

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, in accordance with Accounting Standard (AS) 9 – Revenue Recognition.

(a) Sale of Goods: Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have been transferred to the buyer, usually on dispatch/delivery of goods, and no significant uncertainty exists regarding the amount of consideration that will be derived from the sale. Sales are disclosed net of Goods and Services Tax (GST), trade discounts, rebates, and sales returns, wherever applicable.

(b) Sale of Services: Revenue from services is recognised on rendering of services to customers, based on the stage of completion of the underlying contract and when no significant uncertainty exists regarding the amount of consideration that will be derived.

(c) Interest Income: Interest income is recognised on a time proportion basis, taking into account the amount outstanding and the applicable rate of interest.

(d) Dividend Income: Dividend income is recognised on receipt basis.

(e) Other Income: Other items of income are recognised on an accrual basis, except where the receipt of income is uncertain.

j. Employee Benefits

Post-employment benefit plans
Contributions to defined contribution plans, including Provident Fund, Employees' State Insurance Scheme (ESIC) and Labour Welfare Fund (LWF)are recognised as expense when employees have rendered services entitling them to such benefits.

For defined benefit schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in full in the statement of profit and loss for the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested, or amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

Other employee benefits
The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service. These benefits include compensated absences such as paid annual leave, overseas social security contributions and performance incentives.

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as an actuarially determined liability at the present value of the defined benefit obligation at the balance sheet date.

k. Borrowing Cost

Borrowing cost attributable to the qualifying fixed assets during construction/exploration, renovation and modernisation are capitalised.

l. Taxation

Current tax
Tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the applicable provisions of Income Tax Act, 1961/ Income Tax Act, 2025, as applicable) and deferred tax charge or credit (reflecting the tax effect of timing differences between accounting income and taxable income for the period).

Current tax: Provision for income tax is recognized based on estimated tax liability computed after adjusting for allowances, disallowances and exemptions in accordance with the applicable provisions of Income Tax Act, 1961/ Income Tax Act, 2025, as applicable.

Deferred taxation: The deferred tax charge or credit and the corresponding deferred tax liabilities and assets are recognized using the tax rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the asset can be realised in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of the assets. Deferred tax assets are reviewed at each balance sheet date and written down or written-up to reflect the amount that is reasonably/ virtually certain (as the case may be) to be realised.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.
The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

Deferred tax
Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

m. Segment accounting

(i) Business Segment
The Company operates in a single business segment. Accordingly, the disclosure requirements of AS 17 "Segment Reporting" in respect of business segments are not applicable, and the figures appearing in these financial statements relate to that single segment.

(ii) Geographical Segment
The Company's operations are conducted entirely within India. As there are no operations outside India, the Company has a single geographical segment, and the figures appearing in these restated financial statements relate to that segment.

n. Government Grants

Government grants are recognized when there is reasonable assurance that the Company will comply with the conditions attached to such grants and that the grants will be received.

In accordance with the requirements of Accounting Standard (AS) 12 – “Accounting for Government Grants”, an appropriate amount in respect of such grants, estimated on a prudent basis, is recognized in the Statement of Profit and Loss in the period in which the related benefits are earned, even if the actual receipt of such grants occurs subsequent to the end of the reporting period.

Where at the end of the reporting period, it is reasonably expected that the grant will be received in the subsequent financial year, the income in respect thereof is recognized in the current financial year on an accrual basis.

Grants related to revenue are recognised in the Statement of Profit and Loss over the periods necessary to match them with the related costs. Grants related to capital assets are deducted from the gross value of the assets concerned in arriving at their book value.

o. Earnings Per Shares

Basic earning per share is computed by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Diluted earning per share is computed by taking into account the weighted average number of equity shares outstanding during the period and the weighted average number of equity shares which would be issued on conversion of all dilutive potential equity shares into equity shares.

p. Provisions, Contingent liabilities and Contingent assets

A provision is recognised when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

q. Leases

Leases are classified as finance leases or operating leases in accordance with AS 19, Leases. Lease payments under operating leases are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term. Assets acquired under finance leases are recognised at the lower of fair value and the present value of minimum lease payments, with finance charges recognised over the lease term.

r. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of non-cash items and changes in working capital. Cash flows are classified into operating, investing and financing activities in accordance with AS 3, Cash Flow Statements. Cash and cash equivalents comprise cash on hand and balances with banks.

To handle the huge volume of cane arriving from farms, our factory usually operates continuously on 24-hour basis in shifts until the season ends. Through our sugarcane nursery, we seek to improve the availability and quality of sugarcane by supplying healthy cane seeds to farmers, while also generating revenue from seed sales and strengthening long-term relationships with farmers.

We follow a zero-wastage and zero-discharge manufacturing model, whereby all by-products generated during production are either utilized internally or commercially sold. Bagasse is used as boiler fuel for captive steam and power generation, with the balance being sold for industrial applications. Molasses, press mud and ash are sold for use in ethanol production, organic fertilizers, construction materials and other industrial applications, enabling efficient resource utilization and additional revenue generation.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE (UPI)

SEBI has issued various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the SEBI circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, SEBI circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, SEBI circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, SEBI circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, SEBI circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 ("**Previous UPI Circulars**") and the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by UPI Bidder through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars and the Previous UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 01, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an Individual Investor had the option to submit the ASBA Form with any of

the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 01, 2019, and the continuation of this phase has been extended until March 31, 2020. Under this phase, submission of the ASBA Form by Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

Phase III/T+3: This phase has become applicable on a voluntary basis for all issues opening on or after September 01, 2023 and on a mandatory basis for all issues opening on or after December 01, 2023 vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

Individual Investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

The processing fees for applications made by UPI Bidder using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022. NPCI vide circular reference no. NPCI/UPI/OC No. 127/ 2021-22 dated December 09, 2021, inter alia, has enhanced the per transaction limit in UPI from more than ₹2.00 Lakhs to ₹5.00 lakhs for UPI based ASBA in initial public issue.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders into the UPI Mechanism.

Pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 issued by SEBI, as amended by the SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 (the "UPI Streamlining Circular"), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the Book Running Lead Manager will be required to compensate the concerned investor. Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the BRLMs, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB -+in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law.
